BRANDING, BILLING AND DISCLOSURE WARNING · AI ASSISTANTS

Claude keywords, orange branding and a Kodeora account link.

Poulami Das's Code AI is linked through Kodeora support and copyright to another Apple developer account, Mr Siddharth. Separately, both submitted apps put Claude in their subtitles and pair it with orange palettes and radial imagery—an abuse of Claude brand recognition in App Scam DB's assessment, risking confusion with Anthropic's official product. A AI Chatbot - Ask AI Anything customer reports a new payment demand after buying lifetime access, while Code AI's no-middleman promise is qualified by an optional proxy in its policy.

By Alex Kleber · Published 2026-11-02 · Updated 2026-11-02

VISUAL EVIDENCE

Three distinct icons: shared colour cues, different geometry

Original Apple-hosted assets retrieved 2 November 2026. AI Chatbot - Ask AI Anything uses a sharp white burst on terracotta. Code AI uses AI lettering surrounded by eight short white rays on a lighter orange tile. Official Claude uses a distinctive irregular, long-rayed asterisk. Both third-party presentations evoke Claude in context, but the icons differ materially; the source monitor's matching 70% scores are not a copying verdict.

AI Chatbot - Ask AI Anything - Farhat Tahir

App 6761327994, seller Farhat Tahir. Current original Apple asset; source PDF pages 1 and 3. E1/E3/E4.

Code AI - Poulami Das

App 6769354677, seller Poulami Das. Current original Apple asset; source PDF pages 1 and 3. E2/E3/E7.

Official Claude - Anthropic PBC

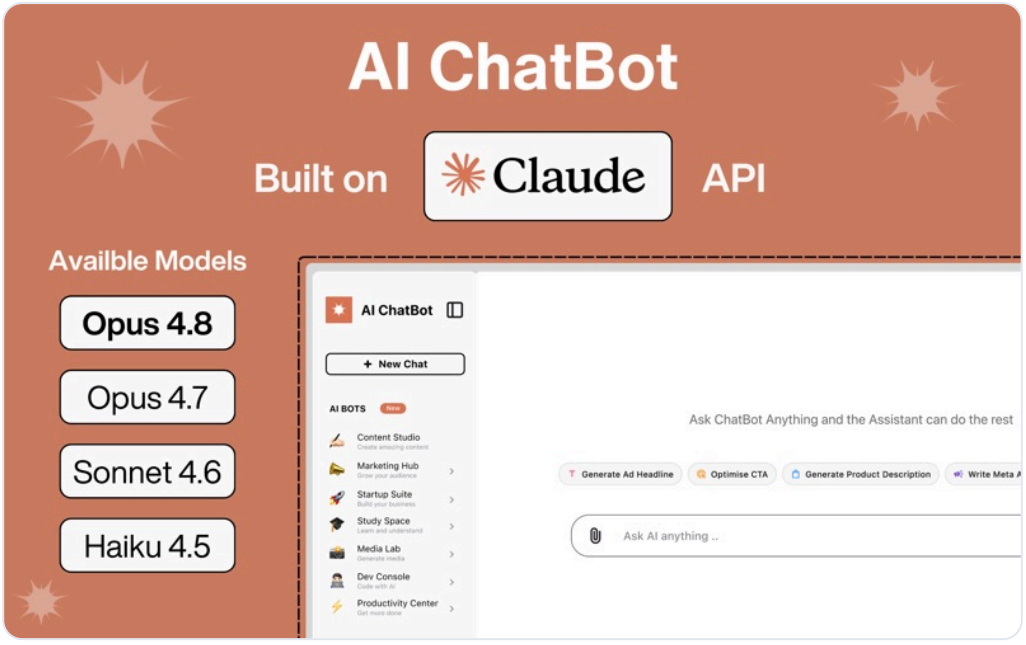

Official app 6473753684, Anthropic PBC. Current original Apple reference, 2 November 2026. E3/E10.

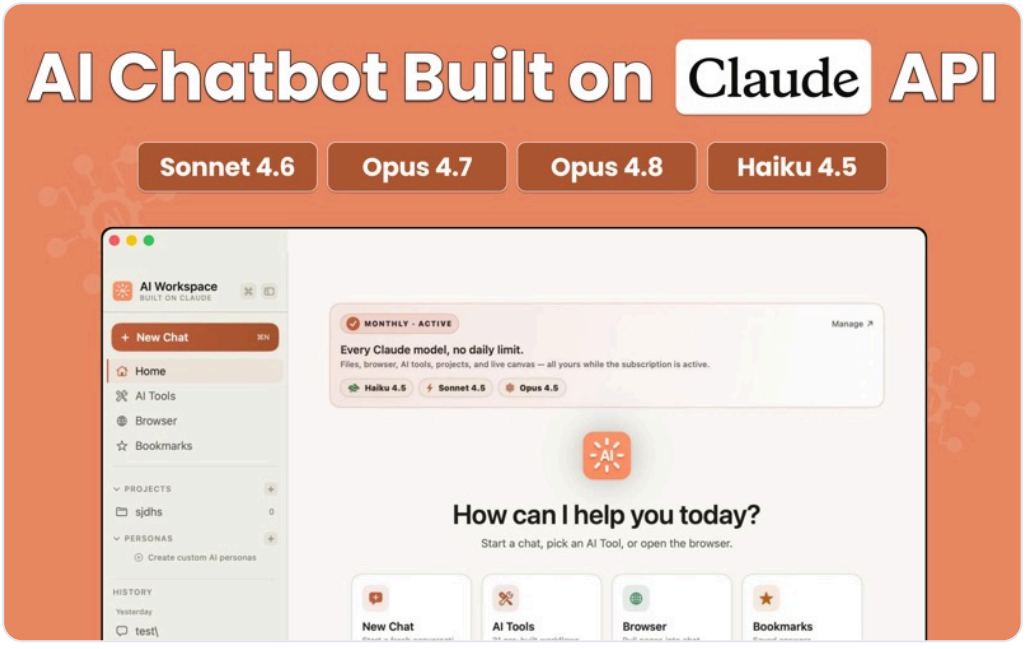

LOOK FOR YOURSELF

The screenshots tell the story.

All five AI Chatbot - Ask AI Anything and four Code AI original advertisements are included, followed by an official Claude reference. Both apps use Claude prominently in their first promotion; their current descriptions expressly disclaim Anthropic affiliation. Images document marketing, not verified model access or performance.

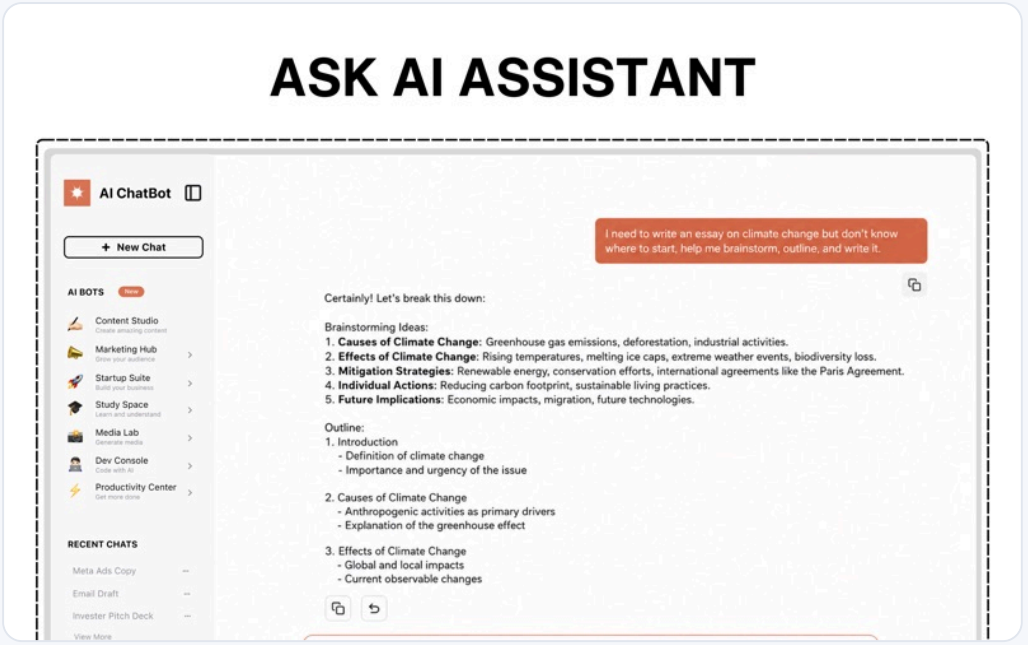

CHAT original promotion 1: Claude API/model promotion and AI Chatbot - Ask AI Anything workspace. Apple-hosted asset retrieved 2 November 2026; also shown in supplied source PDF page 4. Advertised capabilities, not a runtime test.

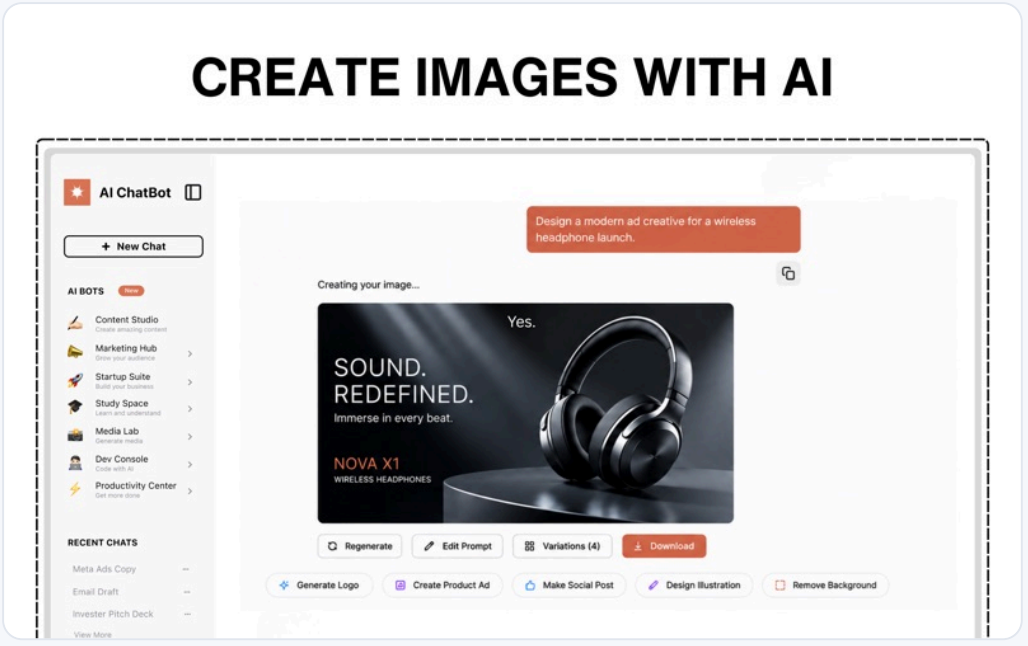

CODE original promotion 1: AI Chatbot Built on Claude API: orange model/workspace promotion. Apple-hosted asset retrieved 2 November 2026; also shown in supplied source PDF page 4. Advertised capabilities, not a runtime test.

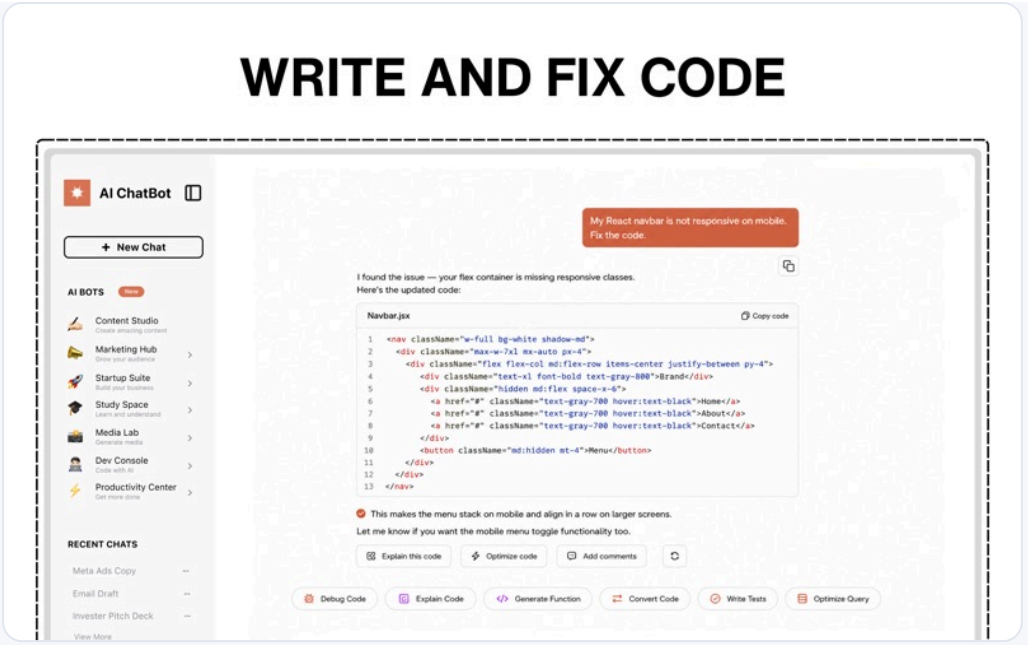

▼ See all 8 additional screenshots

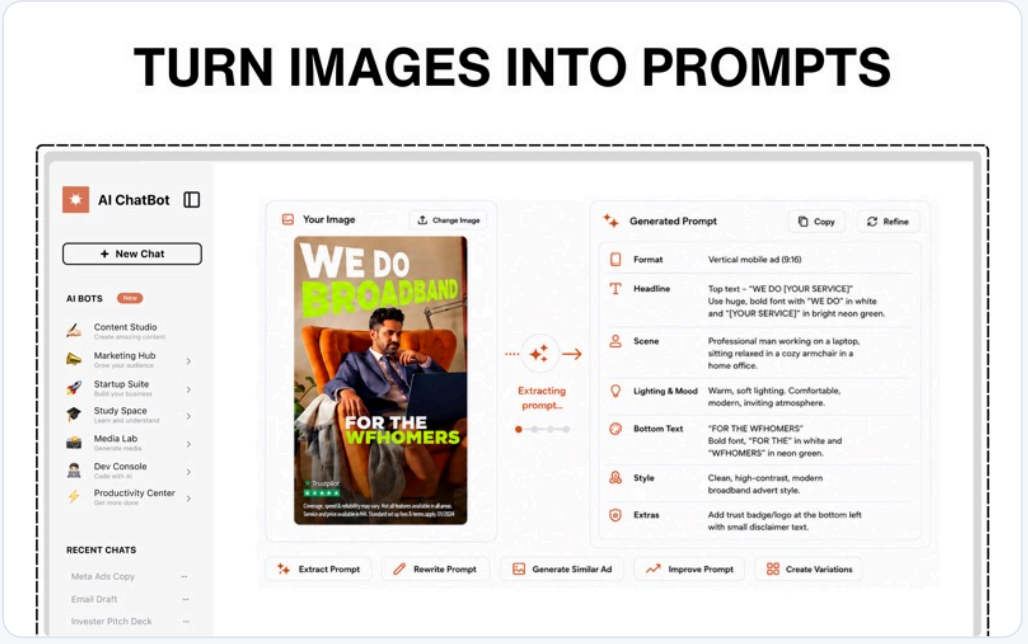

CHAT original promotion 2: Ask AI Assistant: advertised chat workspace. Apple-hosted asset retrieved 2 November 2026; also shown in supplied source PDF page 4. Advertised capabilities, not a runtime test.

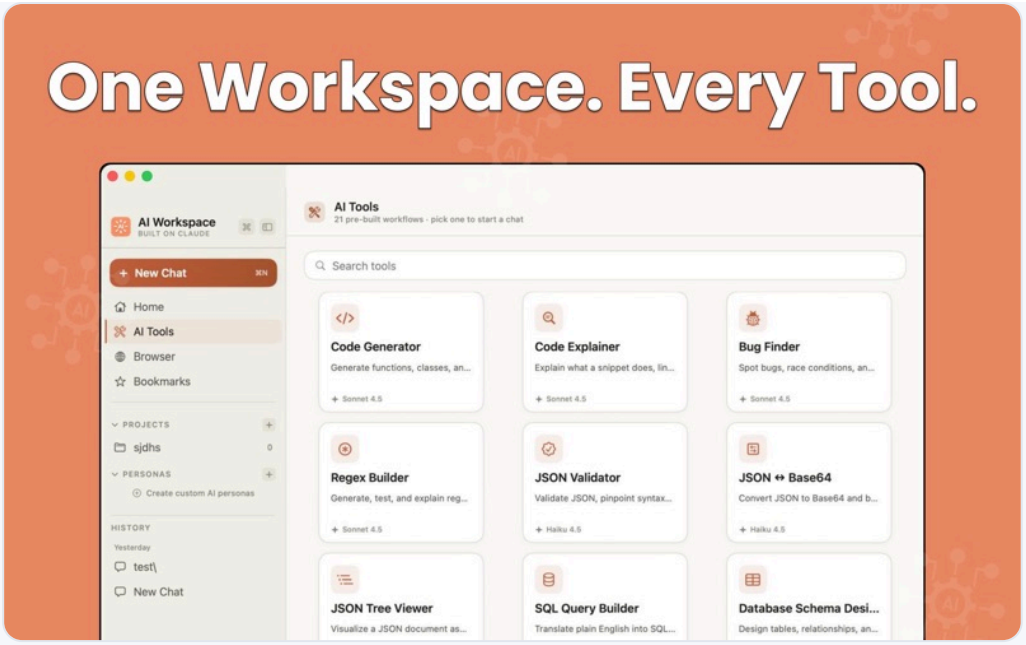

CHAT original promotion 3: Create images with AI: advertised image-generation interface. Apple-hosted asset retrieved 2 November 2026; also shown in supplied source PDF page 4. Advertised capabilities, not a runtime test.

CHAT original promotion 5: Turn images into prompts: advertised image-to-text workflow. Apple-hosted asset retrieved 2 November 2026; also shown in supplied source PDF page 4. Advertised capabilities, not a runtime test.

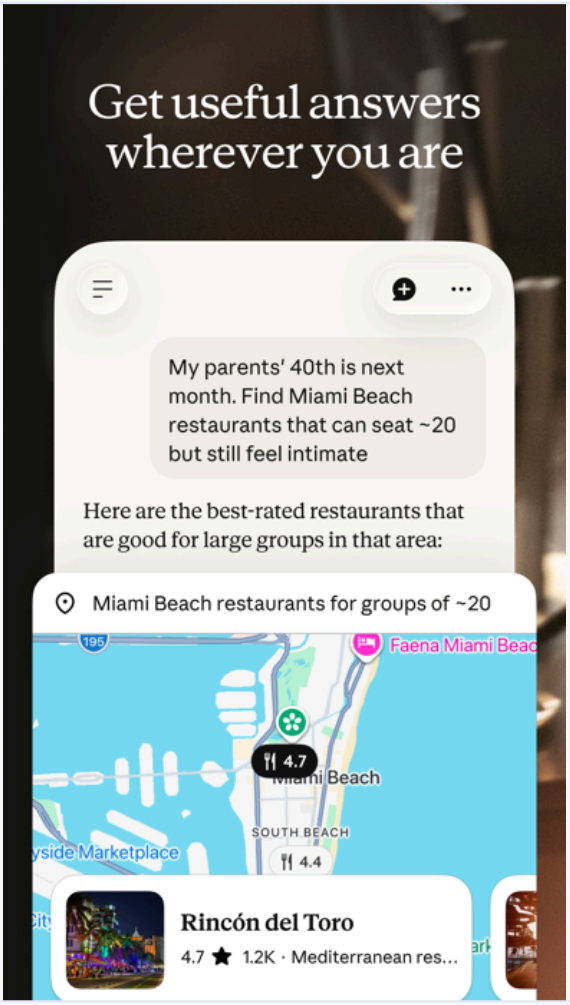

CODE original promotion 2: One Workspace, Every Tool: advertised tool collection. Apple-hosted asset retrieved 2 November 2026; also shown in supplied source PDF page 4. Advertised capabilities, not a runtime test.

CODE original promotion 3: Smart JSON Validator: advertised JSON editor. Apple-hosted asset retrieved 2 November 2026; also shown in supplied source PDF page 4. Advertised capabilities, not a runtime test.

CODE original promotion 4: Encode & Decode JSON: advertised coding utility. Apple-hosted asset retrieved 2 November 2026; also shown in supplied source PDF page 4. Advertised capabilities, not a runtime test.

Original official Claude promotion, 2 November 2026. Brand reference on a different device platform; not a like-for-like feature comparison. E10.

WHAT YOU NEED TO KNOW

Claude search recognition and familiar visual cues lead to separately billed third-party apps.

01

A 14-app account and a separate Kodeora-associated publisher

Fourteen exact app IDs identify Poulami Das. Prayer lock under Mr Siddharth repeats Kodeora support/copyright. That associates publishing/support identities without proving common legal ownership.

Supplied evidence and live public sources, 2 November 2026.

E3 E12 E18 E22 E23

02

Both sellers exploit the Claude keyword and familiar visual cues

Both subtitles use Claude; first promotions reinforce the word with orange/terracotta palettes and radial symbols. App Scam DB assesses this combination as abuse of Claude search/brand recognition that risks confusion with the official product. The icons differ, and both descriptions disclaim affiliation; search rankings, model access and trademark permission were not independently verified.

Supplied evidence and live public sources, 2 November 2026.

E4 E7 E10 E28 E30 E38 E39

03

A lifetime buyer reports being asked to pay again

A one-star AI Chatbot - Ask AI Anything reviewer reports a repeat payment request after lifetime purchase and non-working AI access. The review is reproduced as a customer allegation, not a verified transaction or a finding against Code AI.

Supplied evidence and live public sources, 2 November 2026.

E1 E4

04

Code AI’s direct-only claim is broader than its proxy policy

The listing promises no middleman servers. The linked policy and terms explicitly allow an optional Vercel managed-key proxy for subscribers. Actual routing was not tested.

Supplied evidence and live public sources, 2 November 2026.

E7 E15 E16 E17

05

AI Chatbot - Ask AI Anything’s policy does not explain its advertised AI recipient

The complete policy says personal information is not shared with third parties and mentions Apple purchase handling, but does not explain prompt/image processing by Anthropic or other advertised AI services. Runtime collection and retention were not tested.

Complete public Notion policy and current listing, 2 November 2026.

E4 E13 E28 E32

06

One verified trader country and one undisclosed country

Poulami Das declares India in both checked EU storefronts. Farhat Tahir is shown as a non-trader without a business country; no name-based country attribution is made.

Supplied evidence and live public sources, 2 November 2026.

E5 E6 E8 E9

WHAT IT COSTS

Separate subscriptions and separate lifetime promises

US tables checked 2 November 2026. Euro prices are shown separately in the detailed pricing section. No purchase or refund test performed.

Weekly renewal: $311.48 and $259.48 estimated annually

AI Chatbot - Ask AI Anything's $5.99 weekly offer has an estimated annual cost of $311.48, about 6.23 times its $49.99 yearly plan. Code AI's $4.99 weekly offer has an estimated annual cost of $259.48; no yearly offer appears in its current purchase table.

Continuous-renewal estimates at unchanged prices. Actual calendar-year charges can vary. A paid subscription alone does not prove deception.

Prices displayed in the saved listing

Purchase option	AI Chatbot - Ask AI Anything - US	Code AI - US
Weekly	$5.99	$4.99
Monthly	$14.99	$14.99
Yearly	$49.99	Not listed
Lifetime	$99.99	$99.99

WHO IS BEHIND IT?

Version

AI Chatbot - Ask AI Anything 3.0 / Code AI 1.0.1

First released

AI Chatbot - Ask AI Anything: 5 May 2026; Code AI: 26 May 2026

The first link: Kodeora appears under two Apple seller names

Code AI is sold under Poulami Das, Apple developer ID 1869693603, and uses the Kodeora business support identity. Prayer lock :muslims is sold under Mr Siddharth, developer ID 1859651378, and repeats support@kodeora.com and © 2026 Kodeora. These exact public contacts and copyright statements establish the association across different Apple accounts.

This connection shows why a different Apple seller name does not, by itself, establish a separate publishing/support operation. It does not identify common legal ownership or document an account suspension followed by a replacement account. The current catalog pages were accessible when refreshed; no Apple termination notice or independently corroborated suspension timeline was obtained. The report does not label either account a confirmed return after a fraud ban.

Farhat Tahir's AI Chatbot - Ask AI Anything remains a separate primary case. Its Claude-oriented marketing is comparable, but no direct operator link between Farhat Tahir and Kodeora was established. The lifetime-payment complaint belongs to AI Chatbot - Ask AI Anything and is not transferred to the other sellers.

The verified public association, not an inferred replacement-account sequence

Apple seller	Developer ID	Verified app	Business identity link
Poulami Das	1869693603	Code AI - 6769354677	Kodeora support/domain and copyright
Mr Siddharth	1859651378	Prayer lock - 6773007594	Same Kodeora support address and copyright

Poulami Das catalog Mr Siddharth catalog

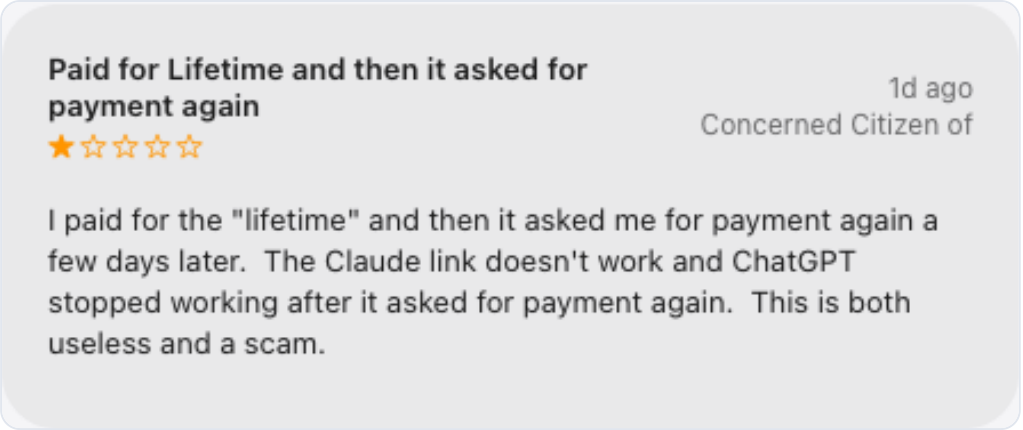

E3, E11, E12, E15-E25, E37, E40. The identity link and any alleged enforcement history are separate questions.

A buyer says lifetime access led to another payment request

AI Chatbot - Ask AI Anything lists a $99.99 Lifetime Purchase. In the supplied analysis, a one-star reviewer dated 31 October 2026 says that after buying lifetime access, another payment request appeared a few days later and AI access stopped working. The same complaint was visible in the independently retrieved US listing. The original native review card is shown below.

This is a concrete billing/access allegation, rather than an automated keyword score. The investigation did not obtain a receipt, reproduce the paywall, verify account restoration or establish how the developer handled the complaint. The reviewer's scam characterization belongs to the reviewer; the report does not turn it into a confirmed fraud verdict.

A second visible AI Chatbot - Ask AI Anything review complains of being asked to pay before getting an answer. That alone does not establish deception because the listing is free to download with paid access. It is recorded separately from the lifetime-entitlement complaint. Code AI is a different app from a different seller; the AI Chatbot - Ask AI Anything complaint is not attributed to it.

Original Apple review card, 2 November 2026. Source PDF page 6 dates the complaint 31 October. Visible customer allegation; no payment was independently tested.

E1 page 6; E4. Original review-card capture taken during independent checks.

Claude in the subtitle, orange around it: the combined branding concern

The exact subtitles are Built on Claude Anthropic API (AI Chatbot - Ask AI Anything) and Built on Claude , Anthropic AI (Code AI). Both developers place the searchable Claude brand prominently in the subtitle and reinforce it with orange/terracotta palettes and radial symbols in their icons and first advertisements. App Scam DB assesses that combination as abuse of Claude brand recognition: users seeking Anthropic's official chatbot may be drawn toward separately published, separately billed products. The assessment concerns the public presentation; the internal keyword fields, search advertising and actual ranking effects were not measured.

The icons are not the same. AI Chatbot - Ask AI Anything uses a pointed white burst on terracotta; Code AI uses AI letters inside short rounded rays on brighter orange. Official Claude uses its own irregular asterisk. The concern is their combined visual/wording context, rather than treating orange alone or every radial motif as exclusive to Anthropic.

Both current descriptions expressly say they are independent third-party applications and are not affiliated with or endorsed by Anthropic. Those statements materially affect the interpretation and are reproduced here. They do not answer every question about the overall impression created by icons and advertisements, but the report does not suppress them or claim the listings explicitly say Anthropic is the seller.

Anthropic officially calls its model family Claude and its developer service the Claude API. Claude is therefore not only the consumer chatbot's name. Built on Claude can describe a genuine model integration; Built on Anthropic API is another possible description, not the only technically correct wording. Actual access to the claimed models was not tested. The branding concern is distinct from whether an API integration is possible.

The shared colour cues and model wording do not establish that Farhat Tahir and Poulami Das are the same operator. Their exact developer accounts, bundle IDs and policy domains differ. No direct ownership, shared contact or shared backend identifier between these two primary apps was established.

The API is real; the visual branding still needs scrutiny

Identity	AI Chatbot - Ask AI Anything	Code AI	Official Claude
Apple seller	Farhat Tahir	Poulami Das	Anthropic PBC
App ID	6761327994	6769354677	6473753684
Developer ID	1888934860	1869693603	1719695350
Bundle ID	com.danaichatbot	com.kodeora.lumen	com.anthropic.claude
Explicit independence notice	Yes	Yes	Official publisher

E1-E4, E7, E10, E13-E17, E28-E30, E37-E39.

What Anthropic's trademark rules actually prohibit

Anthropic's published guidelines require specific permission and prior approval of materials using its marks. They prohibit alterations to supplied marks, including changes to colour, type or proportions, and forbid implying unauthorized sponsorship, endorsement or affiliation.

That supports scrutiny of the Claude wording, brand elements and overall impression of these advertisements. It is not a blanket statement that a third party cannot say its software uses Claude models. No app-specific brand permission or right-holder enforcement finding was obtained, so this report does not declare a confirmed violation solely from an API reference.

The report's editorial finding is that both sellers use the Claude keyword with familiar orange/radial presentation to borrow brand recognition and risk consumer confusion. Their independence disclaimers remain relevant context; permission to access a model and permission to use brand assets are separate questions.

Anthropic Trademark Guidelines Official Claude API overview

Anthropic Trademark Guidelines, refreshed 2 November 2026 (E38); official Claude API terminology (E39).

What the two sellers charge

AI Chatbot - Ask AI Anything lists weekly, monthly, yearly and lifetime offers. Code AI lists weekly, monthly and lifetime offers, and its description promises all models forever for the one-time lifetime purchase. That is a marketing promise, not a verified guarantee of ongoing model access.

At current US prices, the annual estimate is $311.48 for AI Chatbot - Ask AI Anything's weekly plan and $259.48 for Code AI's weekly plan. AI Chatbot - Ask AI Anything's yearly offer is $49.99. Code AI has no yearly entry in its current purchase table, even though its linked terms refer to annual and lifetime subscriptions and a seven-day free trial. The listed offer and generic terms are not fully aligned.

Euro offers in Germany and Ireland agree: AI Chatbot - Ask AI Anything is €6.99 weekly, €17.99 monthly, €59.99 yearly and €99.99 lifetime. Code AI is €5.99 weekly, €17.99 monthly and €99.99 lifetime. Continuous weekly renewal has estimated annual costs of €363.48 and €311.48 respectively. Prices are distinct from official Anthropic subscriptions and API usage charges.

What the two sellers charge

Plan	AI Chatbot - Ask AI Anything - DE/IE	Code AI - DE/IE
Weekly	€6.99	€5.99
Monthly	€17.99	€17.99
Yearly	€59.99	Not listed
Lifetime	€99.99	€99.99
Estimated annual cost of weekly renewal	€363.48	€311.48

E4-E9, E17. Figures are continuous-renewal estimates; actual calendar-year billing can vary.

No middleman servers — except the policy allows a proxy

Code AI's App Store description says it talks directly to the Anthropic Claude API with no middleman servers. Its Lumen product website repeats that direct-only message. The privacy policy explains direct Anthropic requests, but section 3 also names Vercel as host of an optional managed-key proxy endpoint used by subscribers. The terms likewise refer to a managed-key proxy.

Those documents distinguish bring-your-own-key access from a managed subscriber mode. A direct BYOK route could coexist with a proxy-based subscriber route. The problem is that the headline no-middleman promise is absolute while the linked legal text qualifies it. This is a documented disclosure inconsistency, not a measurement of the app's actual network route or proof that prompts are retained.

Both listings say Data Not Collected. Lumen's app-specific policy describes transmitted chat text, attachments, prior turns, model/system settings and subscription providers while denying analytics/device identifiers. Apple's privacy-label rules distinguish retained collection from real-time processing and specific exceptions. Transmission by itself does not prove a false label; the relevant question is which data any app or provider retains under each access mode.

AI Chatbot - Ask AI Anything's complete ten-section Notion policy says personal information is not shared with third parties, apart from limited Apple purchase handling, and describes local-first storage. It does not explain which prompts, attachments or images are sent to Anthropic or other AI providers, despite the advertised Claude API access and image tools. This is a material gap in the data-flow explanation; it does not establish that every prompt contains personal data, that data is retained, or that a leak occurred. The initial supplied capture is a viewport; the full public page was read in a later follow-up.

The AI Chatbot - Ask AI Anything policy and terms both give the generic address support@gmail.com. No operator-specific support identity or business jurisdiction was established through those pages. No message was sent to test that contact.

E4, E7, E13-E17, E21, E32. The general Kodeora portfolio policy is not substituted for Lumen's app-specific policy.

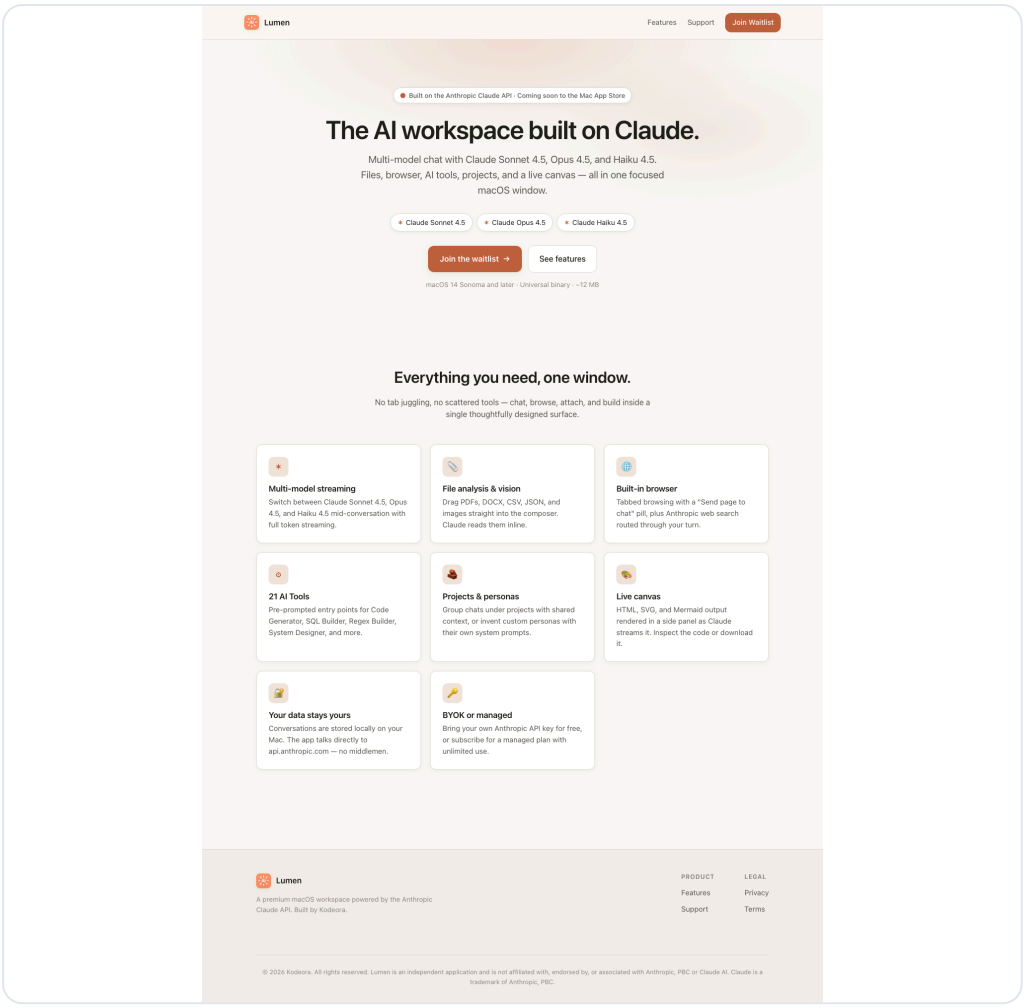

Several linked disclosures describe a different product state

The linked site calls the product Lumen and still says it is coming soon to the Mac App Store, while Apple dates the app's first release to 26 May 2026. Its website advertises 21 AI tools, compared with 19 in the current listing. Its privacy policy refers to a 4+ app rating, whereas the current store rating is 16+.

The Lumen terms, dated 13 May 2026, use ANTHROCHAT in the warranty and liability sections. These inconsistent names and stale fields support a finding of poorly maintained legal/product copy. They do not independently establish that the app had those earlier public names or that a dated rebrand occurred.

The Lumen website is a functioning Vercel-hosted product site with features, support and legal pages. AI Chatbot - Ask AI Anything links Notion-hosted policies. These hosting choices alone do not prove fraud or reveal what either developer pays for hosting. The concern is the content and clarity of the disclosures.

The studio homepage and about page identify Kodeora and use the legal styling Kodeora Digital Pvt. Ltd. The about page describes an AI-assisted build-and-own studio that ships frequently. The report records those public statements without treating AI-assisted development, shipping volume or an unverified corporate-directory match as proof of misconduct. Company ownership and directors were not independently established.

Original public product-page capture, 2 November 2026. E15; own-domain Kodeora contact links were inspected without submitting forms.

E13-E21, E37.

India is declared for Code AI; AI Chatbot - Ask AI Anything's country is unknown

Both German and Irish trader disclosures identify Poulami Das as a trader in Sagardighi, West Bengal, India. This is an Apple provider-location declaration, not a nationality inference. The report omits the personal street address, telephone and email from the HTML narrative.

Farhat Tahir is shown as a non-trader in both checked EU storefronts, without a business country. The Notion pages do not supply an account-linked business jurisdiction. Country remains Unknown. Similar-sounding names, language and third-party professional profiles are not used to assign a location.

Lumen's choice of Delaware law is a contractual jurisdiction clause, not evidence that the Apple seller operates in the United States. The primary country records remain India for Code AI and Unknown for AI Chatbot - Ask AI Anything. Related portfolio apps below are context, not extra primary entries in this report's country statistics.

India is declared for Code AI; AI Chatbot - Ask AI Anything's country is unknown

Primary app	Apple seller	DE/IE status	Declared business country
AI Chatbot - Ask AI Anything.	Farhat Tahir	Non-trader; no country	Unknown
AI Coding Assistant : Code AI	Poulami Das	Trader; Sagardighi, West Bengal	India

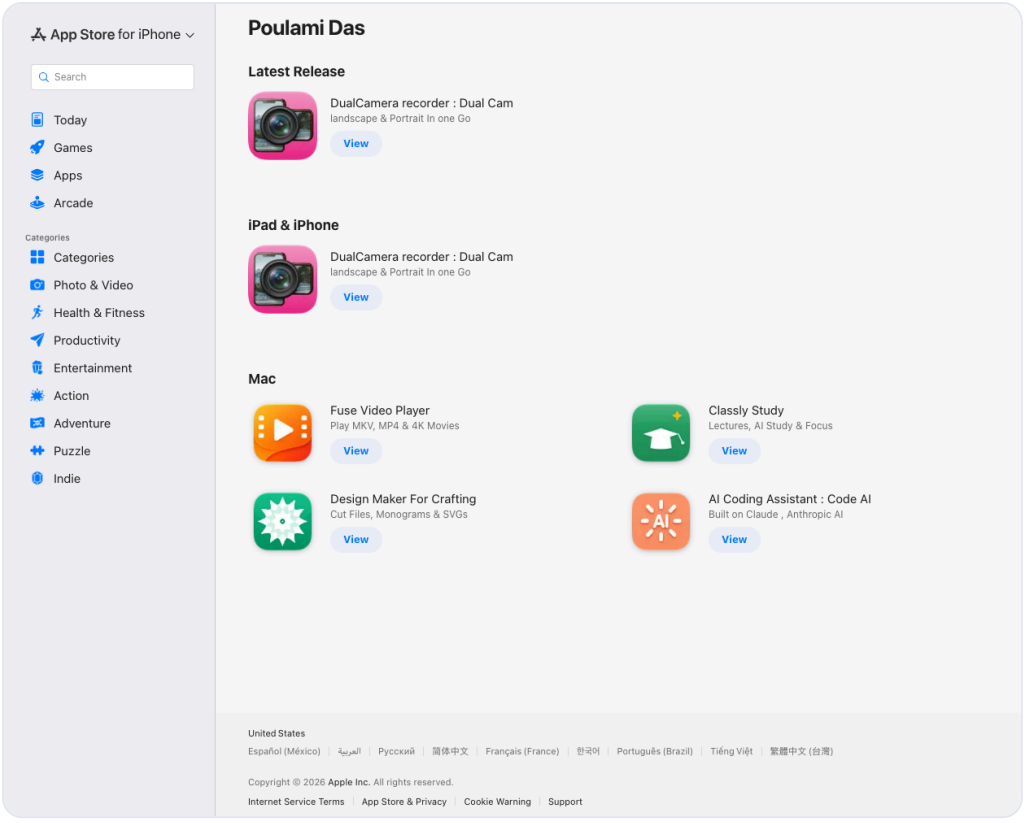

E5, E6, E8, E9, E14, E17.

Fourteen exact app IDs belong to the Poulami Das account

The supplied analysis lists 14 apps under Poulami Das. Independent Apple exact-ID lookup corroborates all 14 records with developer ID 1869693603. The browser catalog image below is a visible excerpt; the full set of exact IDs and current lookup names is listed in the table.

Several titles refer to established services, including HP, YouTube Kids, Netflix, Peacock and Gmail. Those names identify portfolio context and further subjects for review; use of a service name alone does not prove every listed app is a copycat. The present visual comparison concerns the two submitted AI apps.

The same account's Classly Study links a separate Classmate policy describing a Kodeora AI proxy and rate-limit records. That independently reinforces the portfolio's Kodeora connection. It does not prove Lumen routes through the Classmate endpoint or follows that app's logging practices.

Original native Apple catalog capture, 2 November 2026. E12. Fourteen exact-ID records are documented separately; the visible excerpt does not show every app.

Fourteen exact app IDs belong to the Poulami Das account

Kodeora contact evidence reaches Mr Siddharth's account

Prayer lock :muslims, app 6773007594, is published under Mr Siddharth, developer ID 1859651378. Its live US listing names the same support@kodeora.com address used by Lumen and displays © 2026 Kodeora. Lumen also points to the Kodeora domain through its business contacts. These are direct public business-contact and copyright associations across two different Apple accounts.

This evidence supports a connection to the Kodeora publishing/support identity. It does not, by itself, establish common legal ownership, a family relationship, an account transfer, a ban or review circumvention. Mr Siddharth's current DE/IE Prayer lock pages show non-trader status and no business country; Poulami Das's India address is not copied onto that account.

An indexed Peptide Tracker listing under Mr Siddharth also mentions the Kodeora support address, but the live US URL returned 404 and US lookup supplied no record. It is retained only as a research lead, not as an additional currently verified US app or proof of removal by Apple.

No equivalent contact, domain or identifier connection was established between Farhat Tahir / AI Chatbot - Ask AI Anything and Poulami Das / Kodeora. Their shared use of Claude-oriented marketing is not enough to combine their ownership identities.

Original current Apple listing viewport, 2 November 2026. E22. Business-contact association is documented in the source text; no account ownership was inferred from this screenshot alone.

Kodeora contact evidence reaches Mr Siddharth's account

Observed identity	Poulami Das / Code AI	Mr Siddharth / Prayer lock
Apple developer ID	1869693603	1859651378
Verified app ID	6769354677	6773007594
Public business support	support@kodeora.com	support@kodeora.com
Copyright/publisher styling	Kodeora	Kodeora
EU business country	India	Unknown

E15-E23, E24, E25, E37. The unavailable Peptide Tracker result is an access outcome, not an enforcement finding.

Current warnings, without an invented launch-to-rebrand story

AI Chatbot - Ask AI Anything was first released on 5 May 2026; its current version 3.0 is dated 10 June. Code AI was first released on 26 May, with current version 1.0.1 dated 19 June. Those are Apple release dates. Both supplied PDFs are one-off analyses from 2 November, not a monitored change history.

Earlier-history queries returned only same-day exact listing captures in the variants checked. The same-day primary listings and supplied Code AI Irish replay opened; the supplied AI Chatbot - Ask AI Anything Notion replay produced an empty body. No earlier neutral identity, later Claude transformation or previous account termination was established. Stale Lumen/ANTHROCHAT wording is a current document inconsistency, not a substitute for dated historical evidence.

Apple's accurate-metadata, copycat/artwork and intellectual-property rules are relevant to how the brand is presented; subscription rule 3.1.2 is relevant to clear paid access, alongside the customer's lifetime complaint. Privacy rule 5.1.1 is relevant to routing and collection disclosures. Anthropic's trademark rules address alterations and implied affiliation. These support a review request, not an existing Apple or court finding against either seller.

Description

Built with advanced Claude AI models including Claude Opus 4.8, Opus 4.7, Sonnet 4.6, and Haiku 4.5, all inside one elegant workspace designed for productivity, creativity, and intelligent assistance.

This independent third-party application is not affiliated with or endorsed by Anthropic. Claude model access is provided through Anthropic's API under applicable terms and policies.

Experience Next-Generation AI Assistance

Designed for professionals, creators, developers, marketers, entrepreneurs, and students, the app combines powerful AI capabilities in one seamless and intuitive macOS experience.

Whether you need a quick answer, creative inspiration, coding support, research assistance, or business productivity tools, the app helps you work faster, think smarter, and stay organized.

1. Access Advanced Claude Models

Choose the model that best fits your task:

• Claude Opus 4.8 for advanced reasoning and complex workflows
• Claude Opus 4.7 for high-performance intelligence tasks
• Claude Sonnet 4.6 for balanced speed and capability
• Claude Haiku 4.5 for fast everyday assistance

2. Specialized AI Workspaces

Work with dedicated assistants designed for different use cases:

• Content Studio for blogs, articles, captions, and copywriting
• Marketing Hub for SEO, campaigns, and advertising ideas
• Startup Suite for business planning and strategy
• Study Space for learning, research, and education
• Media Lab for creative projects and ideation
• Dev Console for coding and debugging assistance
• Productivity Center for planning and organization

3. Create Professional Content Instantly

Generate emails, reports, presentations, proposals, summaries, product descriptions, social media content, and more within seconds.

4. Smart Coding Assistance

Write, explain, optimize, and debug code across multiple programming languages with intelligent developer-focused support.

5. Voice Conversations

Interact naturally using voice and receive spoken AI responses for a more convenient and hands-free experience.

6. Export and Share Conversations

Save and export chats as PDF documents for easy sharing, printing, archiving, and collaboration.

7. Personalized Chat History

Access previous conversations, continue unfinished projects, and keep important work organized.

8. Context-Aware Intelligence

Receive intelligent responses that understand context and help with research, brainstorming, decision-making, learning, and productivity.

9. Beautiful macOS Experience

Enjoy a modern interface built specifically for macOS with smooth navigation, distraction-free workflows, and an optimized user experience.

Subscription Information

Payment will be charged to your Apple ID account once the purchase is confirmed.

Subscriptions renew automatically unless auto-renewal is disabled at least 24 hours before the current subscription period ends. Renewal charges depend on the selected subscription plan.

Free trials, if available, automatically convert into paid subscriptions unless canceled before the trial period expires.

Users can manage or cancel subscriptions anytime through their Apple Account Settings. Cancellation takes effect after the current billing cycle ends.

Any unused portion of a free trial may be forfeited upon upgrading to a premium plan during the trial period.

User reviews mentioning possible fraud or deception (1)

Paid for Lifetime and then it asked for payment again

1/5 stars · 2026-10-31 · Concerned Citizen of the USAA · US App Store

I paid for the "lifetime" and then it asked me for payment again a few days later. The Claude link doesn't work and ChatGPT stopped working after it asked for payment again. This is both useless and a scam.

Matched terms: scam

Description

AI Coding Assistant is a premium macOS AI workspace built on the Anthropic Claude API. Chat with Claude Sonnet 4.5, Opus 4.5, and Haiku 4.5 with live token streaming, full conversation history, and search.

EVERYTHING YOU NEED, IN ONE WINDOW
• Multi-model chat — switch between Claude Sonnet, Opus, and Haiku mid-turn
• Built-in tabbed browser with "Send page to chat"
• Anthropic web search integrated per turn
• 19 pre-built AI tools (Code Generator, Regex Builder, SQL Builder, more)
• Custom personas with system prompts and starter questions
• Projects that group chats with shared context
• Live HTML / SVG / Mermaid / JSON canvas
• Bookmarks for the answers you want to keep
• Export any chat as Markdown to a folder you choose

YOUR DATA STAYS YOURS
Conversations are stored in a folder you choose on your Mac. AI Coding Assistant talks directly to the Anthropic Claude API — no middleman servers, no training on your prompts.

PRICING
• Free — Claude Haiku 4.5, 3 messages per day
• Weekly — $4.99 / week, cancel anytime
• Monthly — $14.99 / month, cancel anytime

• Lifetime — $99.99 one-time, all models forever

Privacy Policy

We collect as little as we possibly can. This page explains what that means in practice.

Last updated: 13 May 2026

This Privacy Policy explains how Kodeora ("we", "us") collects, uses, and protects information when you use the Lumen macOS application ("Lumen", the "app"). By using the app you agree to the practices described here.

Plain-English summary

- Your chats stay on your Mac. We don't have servers that store your conversations.
- When you send a message, it goes directly from your Mac to the Anthropic API.
- If you bring your own Anthropic API key, it's stored in your local macOS Keychain.
- If you subscribe, Apple and (optionally) RevenueCat handle the payment. We never see your card.
- We don't collect analytics, location, contacts, or any device identifiers.

1. What information we handle

1.1 Information stored locally on your Mac

The following is stored on your Mac only, inside the app's sandbox container. It never leaves your device unless you choose to send it to Anthropic as part of a chat message:

- Chat history (messages, attachments, model used, timestamps)
- Projects, personas, and bookmarks you create
- Browser tabs and bookmarks created inside the in-app browser
- Files you attach to a chat (copied into the sandbox container at `~/Library/Containers/com.kodeora.lumen/Data/Library/Application Support/Lumen/Attachments`)
- Your Anthropic API key, if you provide one — stored in the macOS Keychain, not in plain text
- Preferences (appearance, default model, etc.) in `UserDefaults`

1.2 Information sent to Anthropic

When you send a message, Lumen makes an HTTPS request to `api.anthropic.com` containing:

- The text of the message
- Attachments you added to the turn (encoded as image or document content blocks)
- Prior turns in the current conversation (so Claude has context)
- Your selected model, system prompt, and tool configuration
- Either your own API key (BYOK) or, for subscribers, our managed key

Anthropic's handling of this data is governed by Anthropic's own privacy policy (anthropic.com/legal/privacy) and their commercial usage terms. Lumen does not control or modify how Anthropic processes the request after it leaves your Mac.

1.3 Information collected by Apple and our payment processor

Subscriptions are handled by Apple's StoreKit and, optionally, RevenueCat. These services receive and process subscription transactions according to their own privacy policies. Lumen receives only an anonymized entitlement status (e.g.

"subscriber: yes / no") — no card numbers, no Apple ID, no email.

1.4 What we do not collect

Lumen does not collect or transmit any of the following:

- Contact info or address book
- Location
- Photos or files other than what you explicitly attach to a chat
- Browsing history (outside the in-app browser, which stays local)
- Device or advertising identifiers
- Crash reports or telemetry to any third-party analytics service

2. How we use information

Locally stored data is used to render the app's interface (chat history, sidebar, projects, etc.) and is not transmitted anywhere except as described in §1.2. Subscription status is used to gate access to paid features and chosen Claude models. We do not profile users, sell data, or share it with advertisers.

3. Third-party services

- **Anthropic API** — receives your chat content when you press send. Subject to Anthropic's own privacy policy and terms.
- **Apple App Store / StoreKit** — handles subscription billing and entitlement delivery.
- **RevenueCat** — used to coordinate subscription status across devices and the managed-key path. Subject to RevenueCat's privacy policy.
- **Vercel** — hosts this website and the optional managed-key proxy endpoint used by subscribers. Subject to Vercel's privacy policy.
- **DuckDuckGo** — used by the in-app browser's address bar as a search fallback when you type a non-URL query. Searches are sent to `duckduckgo.com` only when you initiate them.

4. Security

We store API keys in the macOS Keychain using the recommended Security framework APIs. The app is sandboxed and requests only the entitlements it needs (network client for Anthropic, user-selected file read for attachments). All network traffic is TLS-encrypted.

No system is perfectly secure. If you have reason to believe your account or data has been compromised, please contact support@kodeora.com.

5. Children's privacy

Lumen is not directed to children under 13 and we do not knowingly collect information from children. The app's App Store age rating is 4+ as the app itself has no objectionable content; the underlying Claude models follow Anthropic's own usage policies.

6. Your rights

Because we don't hold a copy of your data on our servers, requests to access, correct, or delete information are handled entirely on your device:

- **Access** — your chats live in the app and in the Application Support directory.
- **Delete** — Settings → Privacy → "Clear all chats" / "Clear bookmarks" wipes the local store. Removing your API key uses the "Clear" button in Settings → API Key.
- **Export** — each chat has an "Export as Markdown" action in its header menu.

For data held by Anthropic, Apple, or RevenueCat, please use those companies' own data access and deletion flows.

7. International users

Anthropic's API and our hosting providers operate primarily from the United States

Anthropic's API and our hosting providers operate primarily from the United States. By using the app and sending messages to Anthropic, you understand that your message content will be transmitted to the United States for processing.

8. Changes to this policy

If we materially change this policy we'll update the "Last updated" date at the top of this page and — for significant changes — surface a notice inside the app. Continued use of Lumen after a change constitutes acceptance of the updated policy.

9. Contact

Questions about this policy or how Lumen handles your data: support@kodeora.com.

Independence notice. Lumen is an independent third-party application and is not affiliated with, endorsed by, or associated with Anthropic, PBC or Claude AI. All trademarks belong to their respective owners. Lumen uses the Anthropic API to provide AI-powered features and is built in compliance with Anthropic's Usage Policies.
