MISLEADING CLAUDE-STYLE BRANDING AND PURCHASE WARNING · AI ASSISTANTS

Claude’s look. Someone else’s subscription.

This app repeats the brand-impersonation and free Google Sites website pattern documented in our earlier Pakistan-linked scam investigations, while displaying a misleading “4.8 Rating” badge despite zero recorded US ratings. Its Claude-like orange identity and “Built on Claude Anthropic API” wording can make Faheem Akram’s independent Mac app look like Anthropic’s official product.

Apple developer accounts: **Faheem Akram · ID 6808681125** · **Official Anthropic · ID 1719695350**

VISUAL EVIDENCE

Claude-like colours and emblem. Different publisher.

Left: the independent app uses a symmetric white emblem on orange. Right: official Claude uses a different, irregular white radial mark on orange. Combined with the Claude-led subtitle and promotions, the resemblance can confuse users about who publishes the app.

Examined app · Faheem Akram

Independent app, Faheem Akram. Original Apple icon retrieved 14 November 2026. E3.

Official Claude · Anthropic PBC

Official Claude by Anthropic. Original Apple-hosted brand reference, 14 November 2026. E13/E14.

By Alex Kleber · Published 2026-11-14 · Updated 2026-11-14

Follow the seller behind the Claude-style identity.

The confirmed chain is simple: this Mac app belongs to Faheem Akram's Apple account, and its linked policy names FA AI Apps as the publisher. The FA AI Apps homepage links back to the same app. Official Claude belongs to Anthropic PBC.

The diagram separates ownership from a claimed service connection. A developer can connect an independent app to another company's AI service without becoming that company or its official app. No second developer account was verified from the checked records.

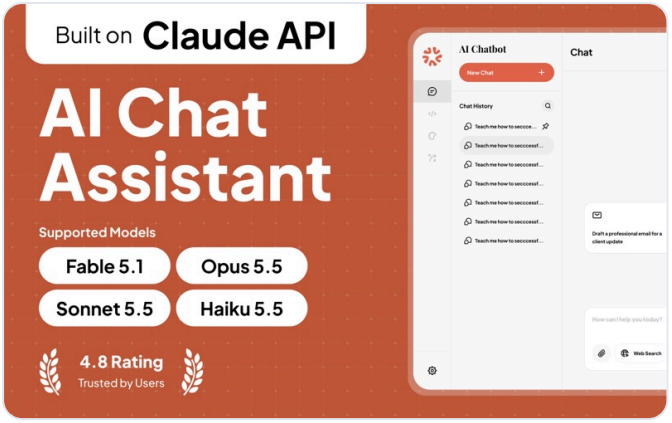

Editorial connection diagram based on Apple records and reciprocal publisher-site links. Original app icons; each arrow states what the evidence proves. E2–E16.

E2/E3/E6–E16. Confirmed seller/site connection; API use is a developer claim, not a network-tested result.

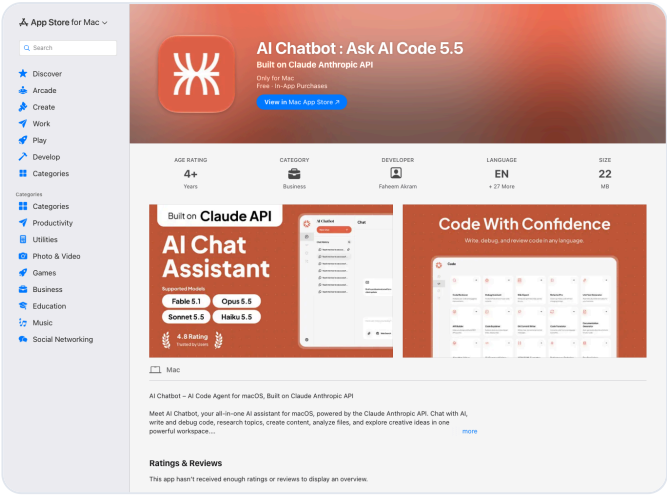

LOOK FOR YOURSELF

The screenshots tell the story.

The first promotion combines Claude API wording, orange branding, model names and a 4.8 Rating badge. The fresh App Store capture shows the actual seller and Apple's ratings notice. These are current original advertisements, not reconstructed history.

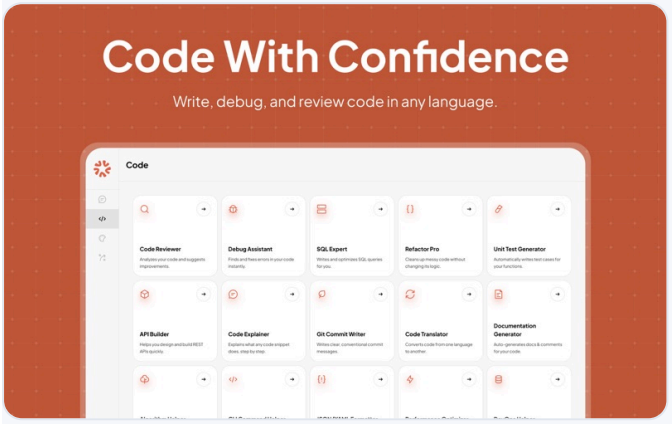

Original Apple promotion: Built on Claude API, orange identity and an unexplained 4.8 Rating badge. The adjacent page capture shows Apple's independent ratings notice. E1 page 5; E2/E3.

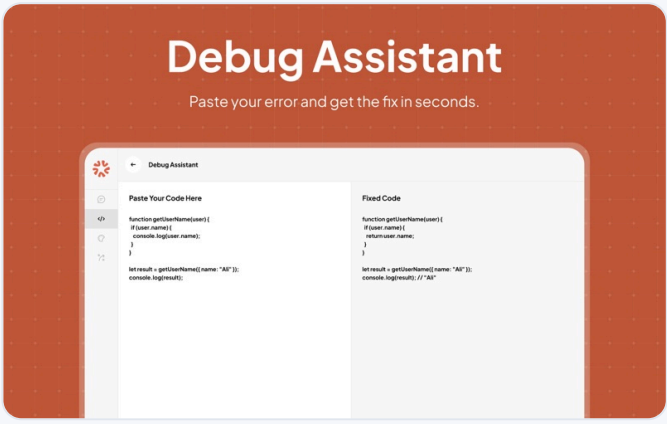

Actual US App Store page, 14 November 2026: independent seller, Claude-led promotion and not-enough-ratings notice on the same page. E2.

Code With Confidence: coding roles promoted through the same orange visual identity. Original Apple artwork. E1 page 5; E2/E3.

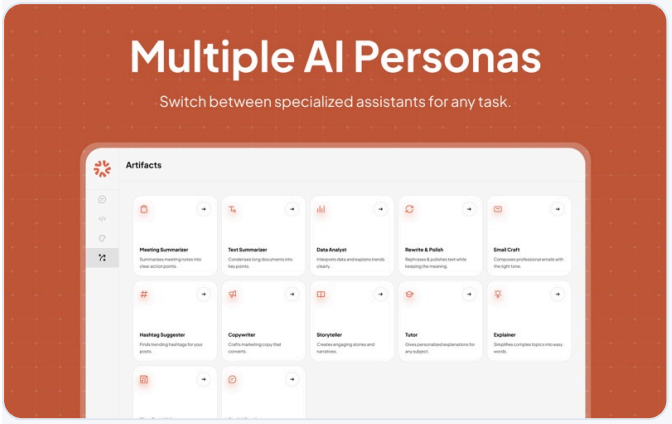

Debug Assistant: developer-supplied feature advertisement; functionality was not tested. Original Apple artwork. E1 page 5; E2/E3.

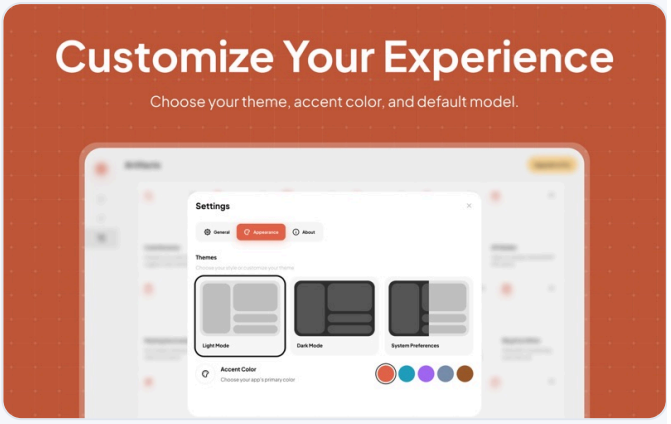

Ask Anything: an orange emblem inside the interface reinforces the brand resemblance. Original Apple artwork. E1 page 5; E2/E3.

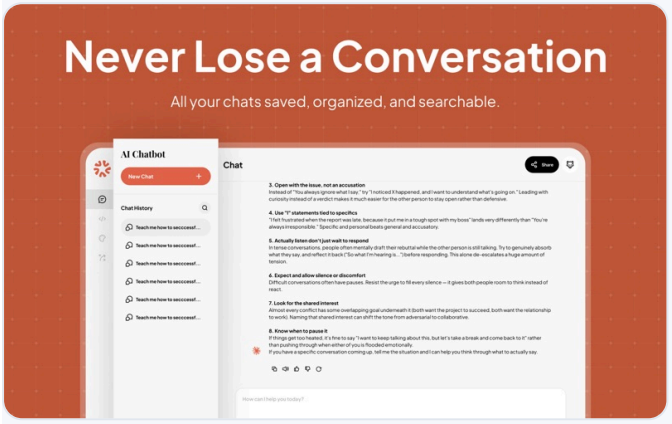

Design Anything Instantly: this promotion also uses the name Quill AI. That wording alone does not identify another app or owner. Original Apple artwork. E1 page 5; E2/E3.

Multiple AI Personas: the developer advertises Artifacts and specialist task tools. Original Apple artwork. E1 page 5; E2/E3.

Customize Your Experience: the advertised settings include different accent colours; the public promotion still leads with orange. Original Apple artwork. E1 page 5; E2/E3.

Never Lose a Conversation: the support FAQ says history is local and deleted conversations cannot be recovered by the developer. Original Apple artwork. E1 page 5; E2/E3.

WHAT YOU NEED TO KNOW

Three reasons to check the seller before paying.

01

Claude’s identity does the selling. A different seller takes payment.

Orange branding, a white emblem and prominent Claude/Anthropic wording give a third-party Mac app an official-looking identity. Apple lists Faheem Akram, and the app’s own description denies Anthropic affiliation.

E1 pages 1/3/5/6; E2/E3/E13/E14.

E2 E3 E13 E14

02

A 4.8 badge without a disclosed rating source.

The first promotion says 4.8 Rating / Trusted by Users. Apple’s checked US record returns zero ratings and the page has no ratings overview. No source, count, region or date explains the advertised score.

E1 page 5; E2/E3.

E2 E3

03

Weekly costs add up. Lifetime has a service limit.

Continuous weekly renewal has an estimated yearly cost of $311.48, versus $39.99 for the yearly plan. The $59.99 Lifetime purchase lasts while the developer offers the app/service and remains subject to fair use.

E1 pages 2/3; E2/E5/E10.

E2 E5 E10

WHAT IT COSTS

The independent app’s listed purchase options

Free download with limited free AI requests, according to the support FAQ. These are listed US and Irish prices, not observed charges. They are purchases from this independent app and do not establish an official Claude subscription. E1 pages 2/3; E2/E5/E10/E11.

Estimated yearly cost: about 7.8 times the US yearly plan.

Continuous weekly renewal at unchanged prices has an estimated yearly cost of $311.48 in the US, versus $39.99 yearly (about 7.8 times as much). In Ireland it is approximately €363.48, versus €44.99 yearly (about 8.1 times as much).

Estimates assume continuous renewal without cancellation, a trial, discounts or a price change; actual calendar-year billing can vary. Terms describe Pro access with fair-use restrictions. No purchase or paid feature entitlement was tested; the price gap alone is not proof of fraud.

Prices displayed in the saved listing

Purchase option	United States	Ireland
Weekly	$5.99	€6.99
Monthly	$12.99	€14.99
Yearly	$39.99	€44.99
Lifetime · service conditions apply	$59.99	€69.99

First released

2026-11-06

The Claude name and orange identity work together.

The warning is the combined presentation: a white emblem on an orange icon, orange promotional backgrounds, Claude/Anthropic in the subtitle and a Built on Claude API headline. The app's emblem is symmetric and curved; official Claude uses an irregular radial mark. These are different drawings, but the shared visual language and prominent brand wording can make the independent product look official.

App Scam DB assesses that combination as misleading. A user searching for Claude should not have to investigate a lower description disclaimer to discover who is charging them. The developer does publish an independence disclaimer: it denies Anthropic affiliation, endorsement and sponsorship. That statement is preserved alongside the first impression buyers see.

The bundle identifier also contains claude. That is a technical product identifier, not proof of a partnership. One design promotion says Quill AI, but no exact-ID product or ownership link was established for that extra name.

E1 pages 1/3/5/6; E2/E3/E13/E14. Visual and editorial comparison, not a pixel-identical claim or adjudicated infringement.

Brand impersonation and Google Sites: a familiar pattern.

Earlier App Scam DB investigations documented the same combination of borrowed brand identity and Google Sites pages. Anam Shehzadi's Claude-branding case recorded a declared Faisalabad, Pakistan address; Muhammad Basit's Microsoft-like Authenticator case recorded another declared Faisalabad address and Google Sites legal pages.

Those are separate, dated seller records.

The comparison here is the presentation pattern, not a verified ownership link or a country attribution for Faheem Akram. Google Sites offers free hosting, but the URL does not reveal this developer's actual account plan or expenditure. This site also has working, app-specific policies and support; the misleading branding and unsupported rating badge are the substantive warning signs.

Earlier Claude-branding investigation: Anam Shehzadi

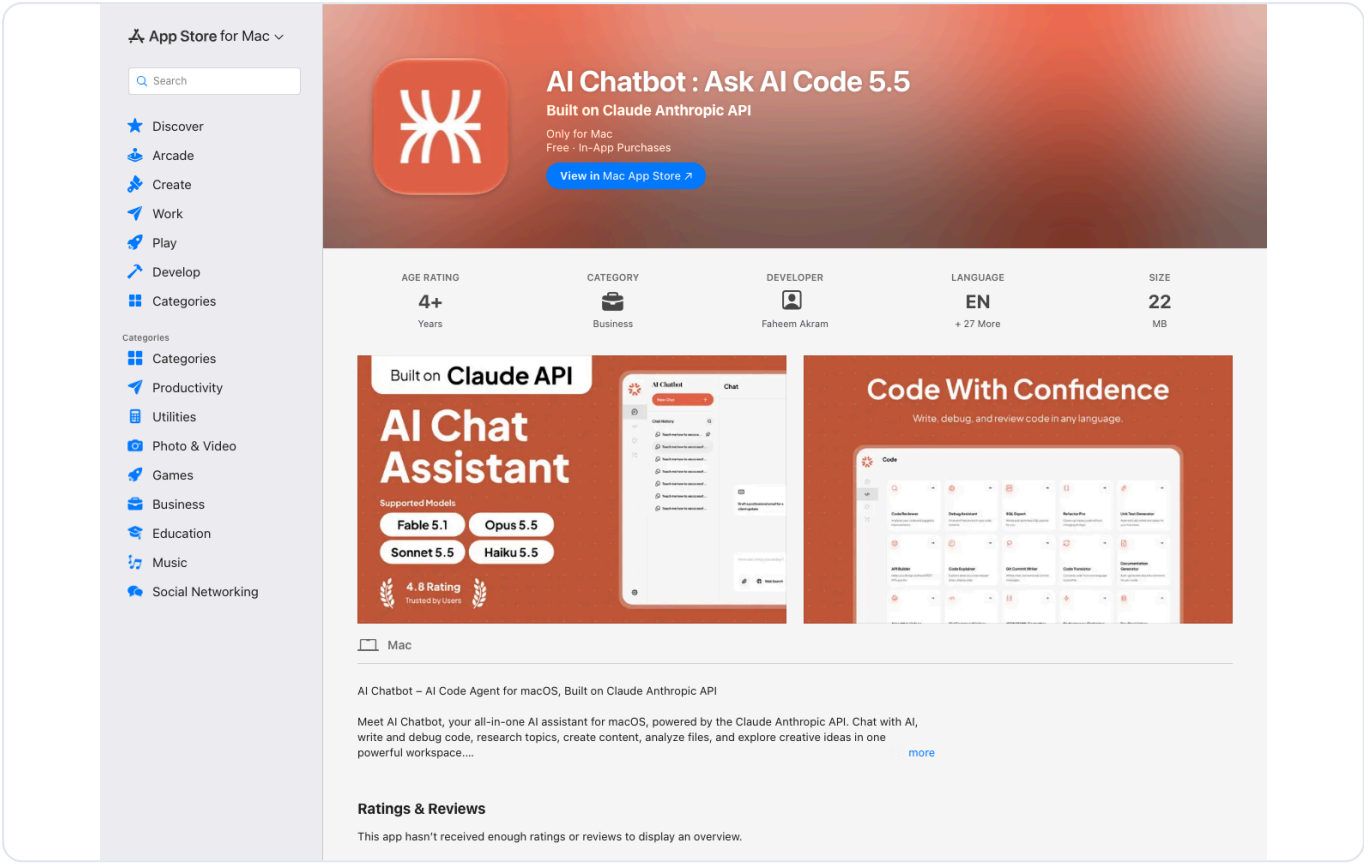

Earlier Microsoft-like Authenticator investigation: Muhammad Basit Google's explanation of free Sites hosting

E2/E3/E9–E12/E21–E23. Pattern comparison only; no shared operator established.

The promotion says 4.8. The US record shows no ratings.

The first promotional image prints 4.8 Rating and Trusted by Users inside a laurel badge. The inspected US page says there are not enough ratings or reviews to display an overview, and Apple's exact-ID US record returns a rating count of zero.

No rating source, review count, region or date is printed beside the badge. The records therefore do not substantiate the impression that this is the app's Apple rating. A worldwide history of every possible rating source was not recovered; the precise finding is an unexplained marketing score beside an empty checked US rating record.

The actual US page shows the 4.8 badge in the first promotion and Apple's not-enough-ratings notice below it. Full-size capture available. E2/E3.

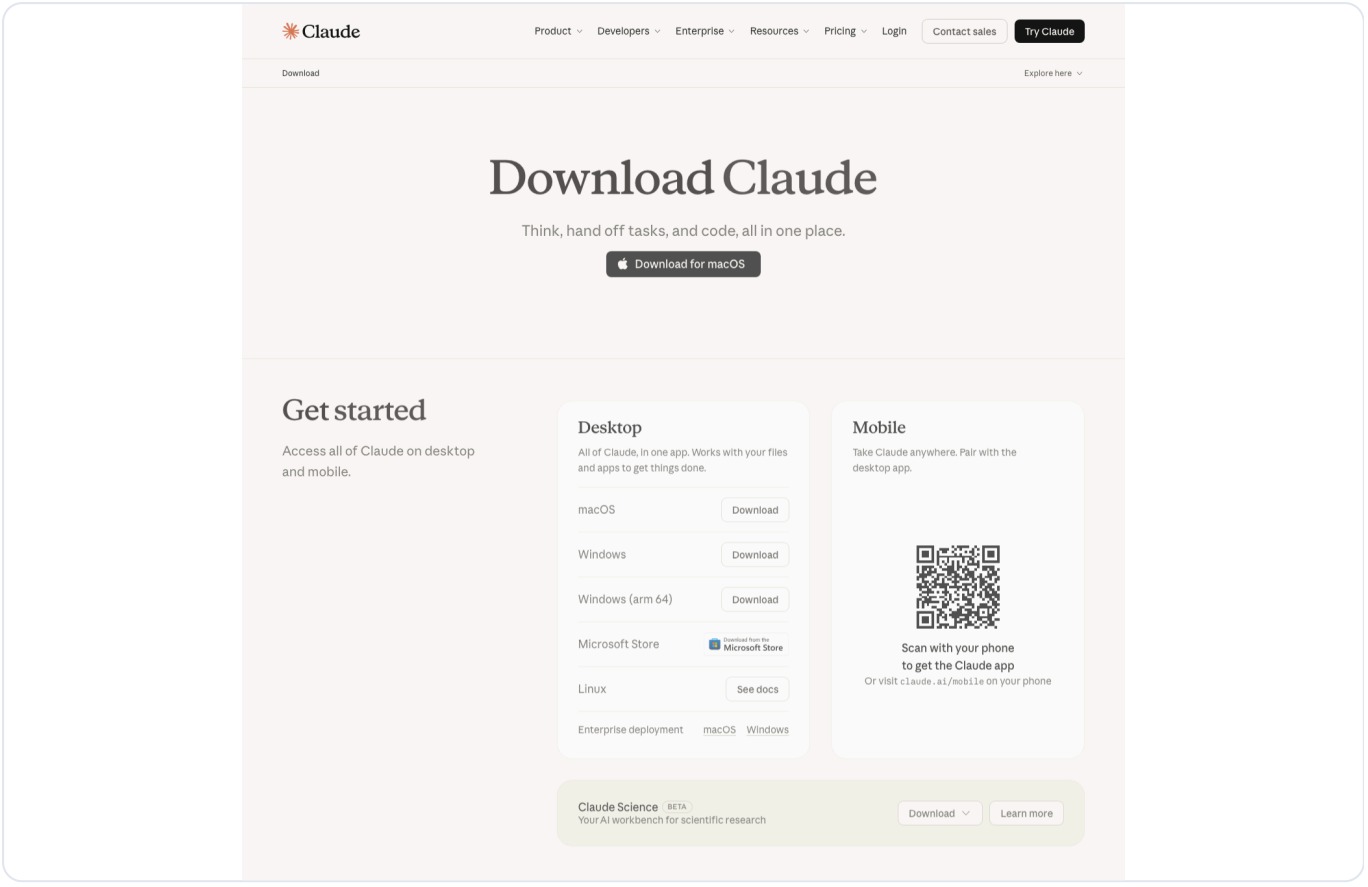

E2/E3; original first promotion in E1 page 5. No claim of observed fake customer reviews.

Using Claude models does not make an app official Claude.

An API is a connection that lets an app send requests to another company's service. Anthropic itself calls its service the Claude API; Claude is a model brand as well as an app name. The subtitle is not false simply because it says Claude API instead of Anthropic API.

The important distinction is who publishes the product and what permission the developer has to present the brand. Even a genuine connection to Claude models would not by itself establish Anthropic sponsorship or permission to give an independent app a Claude-like identity. This app's actual backend connection and model access were not tested.

Anthropic's brand rules require approved use, forbid changes to supplied marks and restrict presentation implying unauthorized sponsorship or affiliation. The observed icon, subtitle and promotional styling warrant a specific brand review. No app-specific licence record or enforcement decision was recovered.

Actual Anthropic download page, 14 November 2026: the official Claude desktop route is offered directly by Anthropic. Cookie dialog dismissed; no installer downloaded. E15.

Anthropic's official Claude API overview Anthropic Trademark Guidelines Official Claude downloads, including macOS

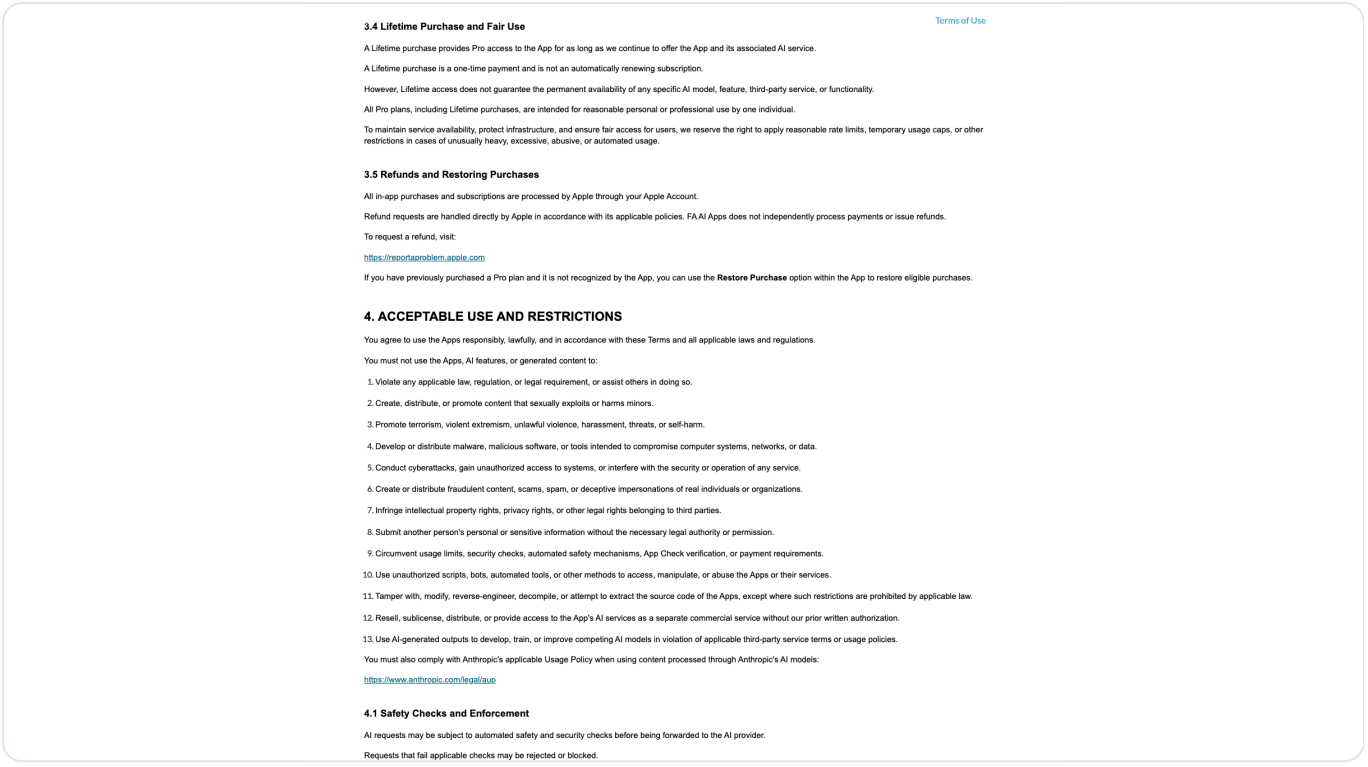

E9/E13–E17. API terminology verified in Anthropic's own documentation.

Lifetime means the service’s lifetime, under these terms.

The US listing offers a $59.99 Lifetime purchase; Ireland lists €69.99. Section 3.4 limits Pro access to the period in which the publisher continues to offer the app and its associated AI service. It also says particular models and features are not guaranteed forever.

All Pro plans, including Lifetime, are subject to fair use. The developer reserves rate limits and temporary caps for excessive use. A one-time payment therefore does not promise permanent, unrestricted access to Anthropic’s service. Buyers should read that condition before choosing it.

API services have ongoing usage costs, but that fact alone does not prove a one-time plan is fraudulent or financially impossible. The report documents the actual offer and its limits; no payment, service shutdown or loss was observed.

Terms of Use

3.4 Lifetime Purchase and Fair Use

A Lifetime purchase provides Pro access to the App for as long as we continue to offer the App and its associated AI service.

A Lifetime purchase is a one-time payment and is not an automatically renewing subscription.

However, Lifetime access does not guarantee the permanent availability of any specific AI model, feature, third-party service, or functionality.

All Pro plans, including Lifetime purchases, are intended for reasonable personal or professional use by one individual.

To maintain service availability, protect infrastructure, and ensure fair access for users, we reserve the right to apply reasonable rate limits, temporary usage caps, or other restrictions in cases of unusually heavy, excessive, abusive, or automated usage.

3.5 Refunds and Restoring Purchases

All in-app purchases and subscriptions are processed by Apple through your Apple Account.

Refund requests are handled directly by Apple in accordance with its applicable policies. FA AI Apps does not independently process payments or issue refunds.

To request a refund, visit:

https://reportaproblem.apple.com

If you have previously purchased a Pro plan and it is not recognized by the App, you can use the **Restore Purchase** option within the App to restore eligible purchases.

4. ACCEPTABLE USE AND RESTRICTIONS

You agree to use the Apps responsibly, lawfully, and in accordance with these Terms and all applicable laws and regulations.

You must not use the Apps, AI features, or generated content to:

1. Violate any applicable law, regulation, or legal requirement, or assist others in doing so.
2. Create, distribute, or promote content that sexually exploits or harms minors.
3. Promote terrorism, violent extremism, unlawful violence, harassment, threats, or self-harm.
4. Develop or distribute malware, malicious software, or tools intended to compromise computer systems, networks, or data.
5. Conduct cyberattacks, gain unauthorized access to systems, or interfere with the security or operation of any service.
6. Create or distribute fraudulent content, scams, spam, or deceptive impersonations of real individuals or organizations.
7. Infringe intellectual property rights, privacy rights, or other legal rights belonging to third parties.
8. Submit another person's personal or sensitive information without the necessary legal authority or permission.
9. Circumvent usage limits, security checks, automated safety mechanisms, App Check verification, or payment requirements.
10. Use unauthorized scripts, bots, automated tools, or other methods to access, manipulate, or abuse the Apps or their services.
11. Tamper with, modify, reverse-engineer, decompile, or attempt to extract the source code of the Apps, except where such restrictions are prohibited by applicable law.
12. Resell, sublicense, distribute, or provide access to the App's AI services as a separate commercial service without our prior written authorization.
13. Use AI-generated outputs to develop, train, or improve competing AI models in violation of applicable third-party service terms or usage policies.

You must also comply with Anthropic's applicable Usage Policy when using content processed through Anthropic's AI models:

https://www.anthropic.com/legal/aup

4.1 Safety Checks and Enforcement

AI requests may be subject to automated safety and security checks before being forwarded to the AI provider.

Requests that fail applicable checks may be rejected or blocked.

Actual terms section 3.4: Lifetime is tied to continued app/service operation and fair-use restrictions. Section 3.5 directs refunds to Apple. E10.

Read the app’s purchase terms

E1 pages 2/3; E2/E5/E10.

Your chat is saved locally. Your AI request still goes online.

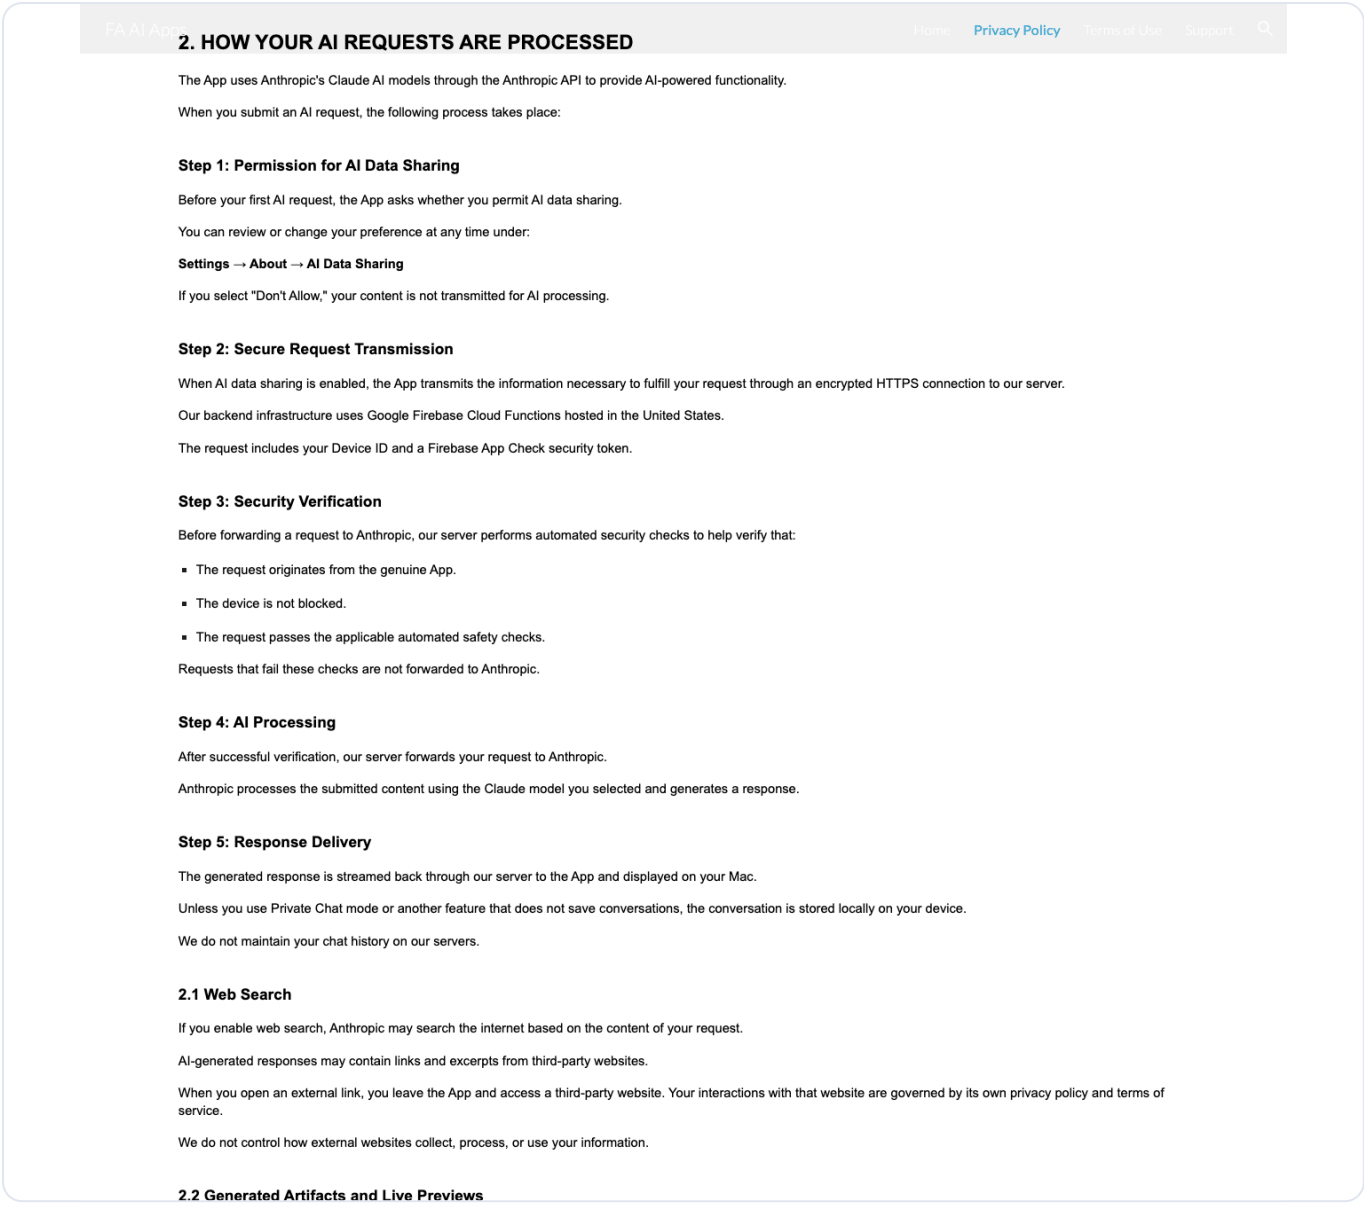

The policy gives a specific explanation: after permission, prompts, relevant earlier messages, documents, images and dictated text go through the developer’s US-hosted Firebase server to Anthropic. Responses return through that server. Local chat storage does not mean AI processing stays on the Mac.

According to the policy, request content is not retained by the developer after delivery; technical logs can remain for up to 30 days and server Device ID records for up to 12 months after the last request. A Device ID is a random identifier used for limits and security. The policy says it may remain on the Mac after deletion and reinstalling.

Private Chat is described as avoiding regular local history. The support page explicitly says it does not prevent online AI processing when sharing is enabled. These are the publisher's disclosures, not verified observations of the installed app.

Editorial data-flow explanation drawn from the app-specific policy and support FAQ. The diagram shows declared processing, not a measured network trace. E9/E11.

FA AI App

Home Privacy Policy Terms of Use Support

2. HOW YOUR AI REQUESTS ARE PROCESSED

The App uses Anthropic's Claude AI models through the Anthropic API to provide AI-powered functionality.

When you submit an AI request, the following process takes place:

Step 1: Permission for AI Data Sharing

Before your first AI request, the App asks whether you permit AI data sharing.

You can review or change your preference at any time under:

Settings → About → AI Data Sharing

If you select "Don't Allow," your content is not transmitted for AI processing.

Step 2: Secure Request Transmission

When AI data sharing is enabled, the App transmits the information necessary to fulfill your request through an encrypted HTTPS connection to our server.

Our backend infrastructure uses Google Firebase Cloud Functions hosted in the United States.

The request includes your Device ID and a Firebase App Check security token.

Step 3: Security Verification

Before forwarding a request to Anthropic, our server performs automated security checks to help verify that:

- The request originates from the genuine App.
- The device is not blocked.
- The request passes the applicable automated safety checks.

Requests that fail these checks are not forwarded to Anthropic.

Step 4: AI Processing

After successful verification, our server forwards your request to Anthropic.

Anthropic processes the submitted content using the Claude model you selected and generates a response.

Step 5: Response Delivery

The generated response is streamed back through our server to the App and displayed on your Mac.

Unless you use Private Chat mode or another feature that does not save conversations, the conversation is stored locally on your device.

We do not maintain your chat history on our servers.

2.1 Web Search

If you enable web search, Anthropic may search the internet based on the content of your request.

AI-generated responses may contain links and excerpts from third-party websites.

When you open an external link, you leave the App and access a third-party website. Your interactions with that website are governed by its own privacy policy and terms of service.

We do not control how external websites collect, process, or use your information.

2.2 Generated Artifacts and Live Previews

Actual privacy-policy section 2 names consent, the Firebase-hosted intermediary and Anthropic processing. E9.

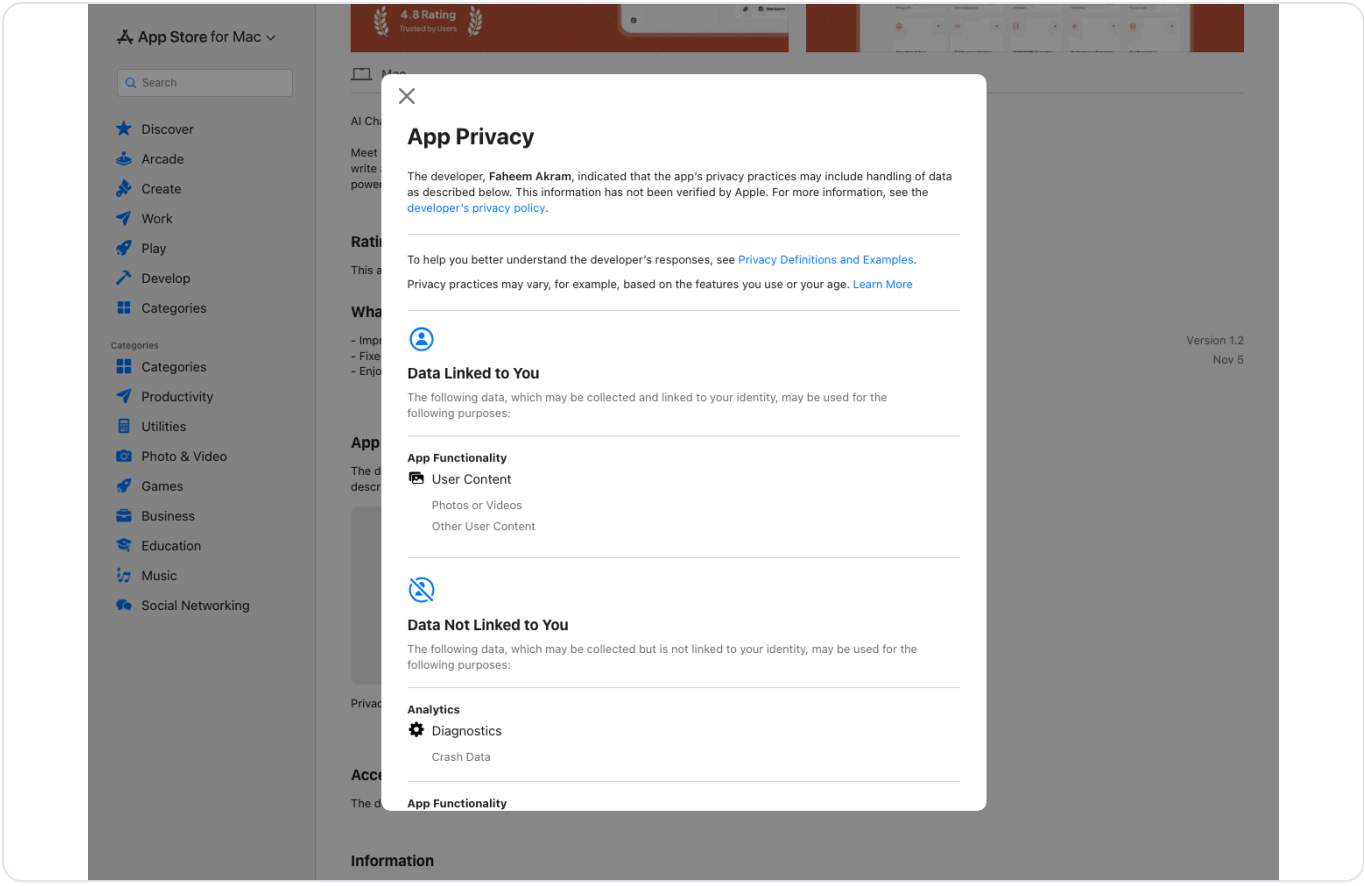

Read the app-specific privacy policy

E9 sections 1–7; E11. No app installation, real prompt submission, file upload or network test.

The privacy label and policy need a consistent explanation.

Apple’s expanded privacy card lists user content linked to identity, a Device ID not linked to identity, and crash data used for analytics. The policy says there are no third-party analytics or crash-reporting tools, while allowing limited technical server logs.

A statement about not using third-party software does not exclude every possible way to handle crash reports. These records therefore raise a focused question: what crash data is actually collected for analytics, and how does that fit the policy? They do not establish hidden tracking, a leak or malware.

Actual expanded Apple privacy panel, 14 November 2026. Crash Data appears under Analytics; compare the developer's policy wording. E2/E9.

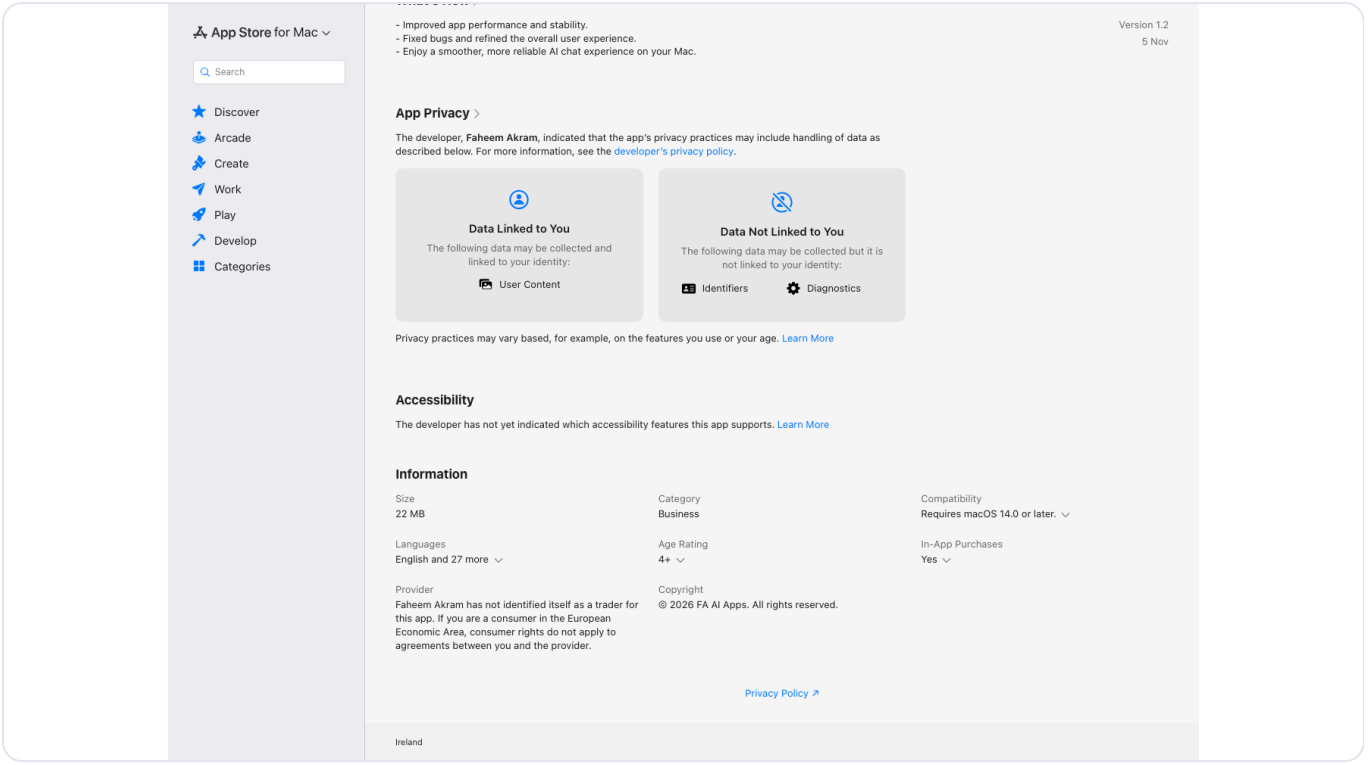

E2/E9. Public disclosure comparison; actual collection and consent behaviour remain untested.

One checked app. A directly linked publisher site.

Apple's US, Irish and UK catalogs each return this one app under Faheem Akram, developer account 6808681125. The privacy policy directly identifies FA AI Apps and the same seller. The website's download button returns to the exact app ID, making the connection stronger than a matching personal name.

The Google Sites pages are working and app-specific. They explain subscriptions, support, data-sharing controls and service providers, and publish a direct contact mailbox. They should not be described as empty or generic solely because of their hosting platform. The checks did not identify an independently verified company registration or a second Apple publisher account.

The German and Irish listings say the provider has not identified as a business seller (a trader), and neither displays a business location. The developer's business country is recorded as Unknown. A US Firebase region describes server processing, not where the seller lives or operates. Searches returned people with the same name, but no app-specific contact or ownership evidence connected those profiles to this seller.

Actual Irish provider notice names Faheem Akram and says the seller has not identified as a trader. No business address or country is displayed. E5.

Apple developer: Faheem Akram · 6808681125 FA AI Apps homepage linked back to this app Working app support FAQ

E4–E12. Location and account-control findings require exact-app evidence.

The available records do not show a before-and-after rebrand.

The public version history lists 1.0 on 5 October, 1.1 on 19 October and 1.2 on 5 November. Apple's API instead reports 6 November as the first-release and current-version date. Both records are preserved; neither is treated as the date the person created the developer account.

Only same-day 14 November app captures were located in the checked archive index; replay was rate-limited. No older icon or launch-page design was recovered. The source therefore supports a current misleading-presentation warning, not a claim that a harmless app was later transformed or that this seller returned after a ban.

Apple should examine the complete icon/subtitle/screenshot presentation, require support for the rating badge and review how purchase and privacy disclosures fit the listing. Accurate marketing, copycat presentation and intellectual-property rules are relevant; this report does not assert an Apple enforcement decision.

E14 / Official Claude by Anthropic Apple listing

Independent primary reference for the official app and its Anthropic publisher. Its artwork has a white irregular radial emblem on orange, unlike the examined app's symmetric curved emblem. Checked 2026-11-14T07:43:36.141885+00:00; HTTP 200.

Open source ↗

SHA-256: 2aab410880ac5d25eb5d6903ff2867d0b75c7e125dc13229d191ad4bb1407849

E15 / Anthropic's official desktop download route

Official Claude download page offers macOS and Windows downloads and links the same official iOS App Store app. No executable was downloaded or installed. Native page capture retained after dismissing the cookie dialog. Checked 2026-11-14T07:44:31.340303+00:00; HTTP 200.

Open source ↗

SHA-256: da13f9d12e332cb186b509b05fac21aa0d2cbdf321df56f5cfa0ad78b26572bc

E16 / Anthropic's own API terminology

Official documentation calls the service Claude API and locates it at api.anthropic.com. Claude names models as well as applications. The term Claude API is therefore not fabricated; neither the term nor a claimed integration proves official publisher status or permitted branding. Checked 2026-11-14T07:43:37.050868+00:00; HTTP 200.

Open source ↗

SHA-256: 20c0cb067c1528c35f23cfa4f4b28fbfacacc00e8203c8af50009ce5a0c9c042

E17 / Anthropic Trademark Guidelines

Official guidelines require permitted/approved use, prohibit altered supplied marks and prohibit implied sponsorship or affiliation except as authorized. These are the relevant brand-use conditions. No app-specific permission record, court ruling or Anthropic enforcement decision was found. The primary PDF is linked by the official page. Checked 2026-11-14T07:46:13.437081+00:00; HTTP 200.

Open source ↗

SHA-256: c70acf7339abb0cee9c09b9b3333e0077c22e378bed0646abd37b7dcf9405517

E18 / Apple review rules for presentation and trust claims

Relevant review questions: 2.3.1 accurate marketing, 2.3.7 names/metadata, 4.1 copycat presentation, 5.2.1 intellectual property and 5.1.1 privacy. The icon/subtitle combination, unsourced rating badge and data-label wording are the specific conduct requiring examination, not an asserted Apple decision. Checked 2026-11-14T07:43:36.753090+00:00; HTTP 200.

Open source ↗

SHA-256: 7b6bc7b328bd49d819886689704d9510f4a11a309d27397370178b4f2ba05299

E19 / Archive index and replay investigation

Exact URL index returned only same-day 14 November captures at 05:20:30 and 06:45:25 UTC. Both app replays returned 429. Earlier/canonical/legacy wildcard queries did not recover older visuals. No generic-to-Claude rebranding or prior enforcement sequence is asserted. Checked 2026-11-14T07:44:31.714450+00:00; HTTP 200.

Open source ↗

SHA-256: 8f8a66e0808a3412e4e2aa020daef58d86f1b9e1d137121e4ac289c59b8cfc76

E20 / Archived policy supplied by the source analysis

14 November 2026 05:21:29 UTC policy replay loaded. It already names FA AI Apps/Faheem Akram and describes Firebase, Anthropic and retention periods. This supports that the policy detail existed in the archived source, not a claim of later correction. Checked 2026-11-14T07:44:34.026187+00:00; HTTP 200.

Open source ↗

SHA-256: 59680dd0280f4c1b9b3a48b7a3c0490be47f497b083b76c57f51a9c9978e0cd1

E21 / Earlier Pakistan-linked Claude-branding investigation

Published App Scam DB report dated 22 October 2026: Anam Shehzadi’s app adopted Claude/Anthropic wording and coral visuals, linked Google Sites pages and disclosed a Faisalabad, Pakistan provider location. Historical comparison, not a current availability assertion or a link to Faheem Akram.

Open source ↗

E22 / Earlier Pakistan-linked Microsoft-like Authenticator investigation

Published App Scam DB report dated 10 November 2026: Muhammad Basit’s app used a Microsoft-like blue icon, Google Sites legal pages and an Apple-declared Faisalabad, Pakistan provider address. Historical presentation-pattern comparison only; no common-control link to the current seller.

Open source ↗

E23 / Google’s official explanation of free Sites hosting

Official Google announcement of 21 May 2008 describes hosting a sites.google.com website and adding pages for free. This supports the platform-level description, not a conclusion about the examined developer’s account plan or actual expenditure.

Description

AI Chatbot – AI Code Agent for macOS, Built on Claude Anthropic API

Meet AI Chatbot, your all-in-one AI assistant for macOS, powered by the Claude Anthropic API. Chat with AI, write and debug code, research topics, create content, analyze files, and explore creative ideas in one powerful workspace.

Whether you're a developer, student, professional, or creator, AI Chatbot helps you work smarter with AI-powered conversations, coding assistance, web search, file attachments, and access to available AI models.

AI Chat with Claude API
- AI Chat Assistant: Ask questions, brainstorm, and explore ideas.
- Web Search: Research topics and discover online information.
- Thinking Mode: Tackle complex questions and problem-solving tasks.
- File Attachments: Provide supported files for contextual analysis and summarization.
- Multiple AI Models: Explore available models for different tasks and workflows.

AI Coding Assistant and Code Agent
- Code Reviewer: Identify potential improvements in your code.
- Debug Assistant: Understand errors and explore possible fixes.
- Code Explainer: Break down complex code into understandable explanations.
- Refactor Pro: Improve code structure and readability.
- SQL Expert: Create and optimize SQL queries.
- Unit Test Generator: Generate tests for your code.
- API Builder: Explore REST API design and implementation.
- Code Translator: Convert code between supported languages.
- Documentation Generator: Create documentation and code comments.
- Git Commit Writer: Draft clear commit messages.
- DevOps Helper: Get help with Docker, CI/CD, and deployment workflows.
- Performance Optimizer: Explore potential performance improvements.

AI Writing and Productivity
- Draft professional emails and business communications.
- Rewrite text to improve grammar, clarity, and tone.
- Summarize documents, articles, and meeting notes.
- Generate blog posts, marketing copy, and social media captions.
- Explore stories, ideas, and creative writing.
- Analyze information and simplify difficult concepts.
- Get learning assistance and step-by-step explanations.

AI Website Design and Creative Ideas
- Explore website layouts, UI/UX concepts, branding ideas, and digital product designs. Use AI to brainstorm landing pages, plan app interfaces, refine creative directions, and develop concepts for your next project.

Appendix — the privacy policy linked from the listing as displayed

Full-page browser capture of https://sites.google.com/view/faaiapps/privacy-policy, taken 2026-11-14 06:45:14 UTC. Cookie-consent overlays (the host's, not the page's content) were hidden before the capture, and Google pages were opened in English. Only the first 3 pages are shown; the whole capture is in the evidence archive.

Last Updated: November 6, 2026

This Privacy Policy explains how AI Chatbot for macOS (the "App") collects, processes, uses, stores, and protects information when you use our application.

The App is published by **FA AI Apps** (App Store seller: Faheem Akram), referred to as "we," "us," or "our" throughout this Privacy Policy.

Contact Email: gethelp.faheem@gmail.com

AI Chatbot is an independent third-party application. It is not affiliated with, endorsed by, sponsored by, or officially connected to Anthropic, PBC. The App uses Anthropic's Claude AI models through the Anthropic API.

THE SHORT VERSION

Your privacy is important to us. We aim to minimize the information we collect, process information only as necessary to provide the App's functionality, and give you control over AI data sharing.

Here are the key points:

- **No Account Required:** You can use the App without creating an account or providing your name, email address, phone number, or password.
- **Local Data Storage:** Your conversations, profile information, and application preferences are stored locally on your Mac. We do not maintain your chat history on our servers.
- **Your Consent Matters:** Before your first AI request, the App asks for your permission to send content to AI services for processing. If you select "Don't Allow," your content is not sent for AI processing.
- **AI Request Processing:** When you permit AI data sharing, your requests are transmitted through our Firebase-hosted server to Anthropic, which processes them using Claude AI models.
- **Automatic Device ID:** The App generates a random Device ID to support application functionality, enforce usage limits, and prevent abuse. It is not linked to your name, email address, or Apple Account.
- **No Advertising or Analytics:** The App does not include advertising, third-party analytics, behavioral tracking, or crash-reporting SDKs.
- **Apple Handles Payments:** All in-app purchases and subscriptions are processed by Apple. We do not receive your payment card information or billing details.
- **No Sale of Personal Information:** We do not sell personal information or share it for targeted advertising.
- **Local Privacy Controls:** You can delete conversations, clear chat history, and use Private Chat mode without saving conversations to your regular chat history.

Please read the complete Privacy Policy below to understand how information is handled when you use the App.

DATA COLLECTION SUMMARY

This section summarizes the information processed through the App and its service providers.

Information That May Be Collected or Processed

1. Identifiers – Device ID

- A randomly generated identifier associated with your device.
- Used to support application functionality, enforce usage limits, prevent abuse, and maintain service security.
- Not used for advertising or cross-app tracking.
- Not linked to your name, email address, or Apple Account.

2. User Content – Other User Content

- Messages and prompts submitted to AI services.
- Relevant previous messages within the same conversation.
- Text files, documents, PDFs, and dictated text submitted with requests.

- Used to provide requested functionality and generate AI responses.
- Not used for advertising or tracking.

3. User Content – Photos

- Images attached to AI requests.
- Processed when necessary to fulfill your requests and generate AI responses.
- Not used for advertising or tracking.

Information We Do Not Collect Through Normal App Usage

The App does not request or collect the following categories as separate information categories:

- **Contact Information:** Your name, email address, phone number, and physical address are not required for normal App usage. Any display name you enter remains on your Mac.
- **Health and Fitness:** Not collected.
- **Financial Information:** Not collected.
- **Location Information:** Not collected.
- **Contacts:** Not collected.
- **Browsing History:** Not collected.
- **Purchases:** Not collected by us. Subscription eligibility is verified directly with Apple on your Mac.
- **Audio Recordings:** We do not receive or store your original voice recordings. Voice dictation uses Apple's Speech Recognition functionality.
- **Usage Analytics and Diagnostics:** We do not use third-party analytics or crash-reporting tools.
- **Other Locally Stored Information:** Your chat history, profile photo, and application preferences remain on your Mac.

Please note that information you voluntarily include in AI prompts or attachments may contain personal or sensitive information. Such content is processed as described in this Privacy Policy.

Tracking

We do not track users across third-party applications or websites. We do not use information collected through the App to create advertising profiles, support cross-context behavioral advertising, or participate in data-broker activities.

1. INFORMATION WE PROCESS

1.1 Content You Submit to AI Services

When you use Chat, Design, Code, or Artifacts features and have permitted AI data sharing, the App processes the information necessary to fulfill your request.

Depending on the features you use, this information may include:

- Messages and prompts you submit.
- Previous messages within the same conversation to provide relevant context.
- Documents, text files, PDFs, and images attached to your requests.
- Text generated through voice dictation.
- Your selected AI model and request preferences, including web search and extended thinking options.

This information is transmitted through our server to Anthropic for AI processing and response generation.

Your display name and profile photo are not included in AI requests.

We encourage you not to submit unnecessary sensitive information, including medical records, financial details, government identification numbers, passwords, or other people's private information.

1.2 Chat History, Profile Information, and App Settings

Your conversations and application preferences are stored locally on your Mac in the App's local database.

This information may include:

- Saved conversations and chat history.
- Your display name and profile photo, if provided.
- Language and appearance preferences.
- Theme and accent color settings.

- Your default AI model and other application preferences.

Your display name and profile photo are used only to personalize your experience within the App.

Conversations created using Private Chat mode and Artifact chats are not saved in your regular chat history.

We do not maintain a copy of your locally stored chat history on our servers. Consequently, we cannot access, view, or recover conversations stored exclusively on your Mac.

1.3 Device ID

When you first launch the App, it automatically generates a random Device ID for application functionality, usage-limit enforcement, and security purposes.

The Device ID:

- Is randomly generated by the App.
- Is not your Mac's serial number, hardware identifier, or advertising identifier.
- Is associated with your device but is not linked to your name, email address, or Apple Account.
- Is stored securely on your Mac and transmitted to our server when necessary.
- May remain on your Mac after the App is deleted and reinstalled so that usage limits can continue to apply.
- Helps enforce usage limits, prevent abuse, and maintain service security.
- Is not used for advertising, profiling, or cross-app tracking.

The Device ID is generated and managed automatically. You do not need to view, copy, or manage it manually.

1.4 App Verification and Security

The App uses Firebase App Check, which relies on Apple's device attestation services to help verify that requests originate from the genuine App running on an authentic Apple device.

Firebase App Check uses temporary security tokens to validate requests. These tokens are not intended to identify you personally.

This verification helps protect our backend services against unauthorized access, fraudulent requests, and misuse.

1.5 Free-Use Counter

The App maintains a counter of free AI requests you have used.

This counter is stored securely on your Mac and is not transmitted to our servers. It may remain on your Mac after the App is deleted and reinstalled so that applicable usage limits can continue to apply.

1.6 Analytics, Diagnostics, and Technical Logs

The App does not include third-party analytics SDKs, advertising SDKs, behavioral tracking tools, or crash-reporting SDKs.

For service security, reliability, and abuse prevention, our server may record limited technical information, including:

- Request timestamps.
- Response status.
- Device ID.

These technical logs help us monitor service functionality, investigate technical issues, prevent misuse, and maintain the security of our infrastructure.

Technical logs are not used for advertising or behavioral profiling.

1.7 Purchases and Subscriptions

All in-app purchases and subscriptions are processed directly by Apple through your Apple Account.

The App checks your subscription status with Apple on your Mac to determine whether you have an active Pro subscription and whether Pro features should be available.

We do not receive your payment card information, billing details, or Apple Account credentials from Apple.

Your purchase and subscription status are not transmitted to our server.

1.8 Subscription Cancellation and Refunds

Subscriptions are managed through your Apple Account, and refund requests are handled directly by Apple.

You can use the following official Apple resources:

- Manage or cancel your subscription: https://support.apple.com/HT202039
- Request a refund: https://reportaproblem.apple.com

Deleting the App does not automatically cancel an active subscription.
