MISLEADING BROWSER IDENTITY AND MISTAKEN-DOWNLOAD WARNING · BROWSER UTILITIES

Hub, TechSphere, Innovatech, IdeaNest and AppVance: the documented connections.

Hub for Chrome has a compiled service-domain trail to TechSphere's historical GmiX product. TechSphere, Innovatech and IdeaNest share exact company-filing contacts, addresses and registered-agent history; IdeaNest's app retains an AppVance support and product-history trail. The reporter estimates combined annual revenue of approximately US$3 million across the analysed accounts. The brand-led listings examined in this investigation show recurring misleading-presentation indicators: familiar product names, recognisable visual cues and paid third-party offers alongside documented wrong-product purchase complaints. The opening spider and account lookup key identify the connections first; the evidence and assessments for each examined application follow below.

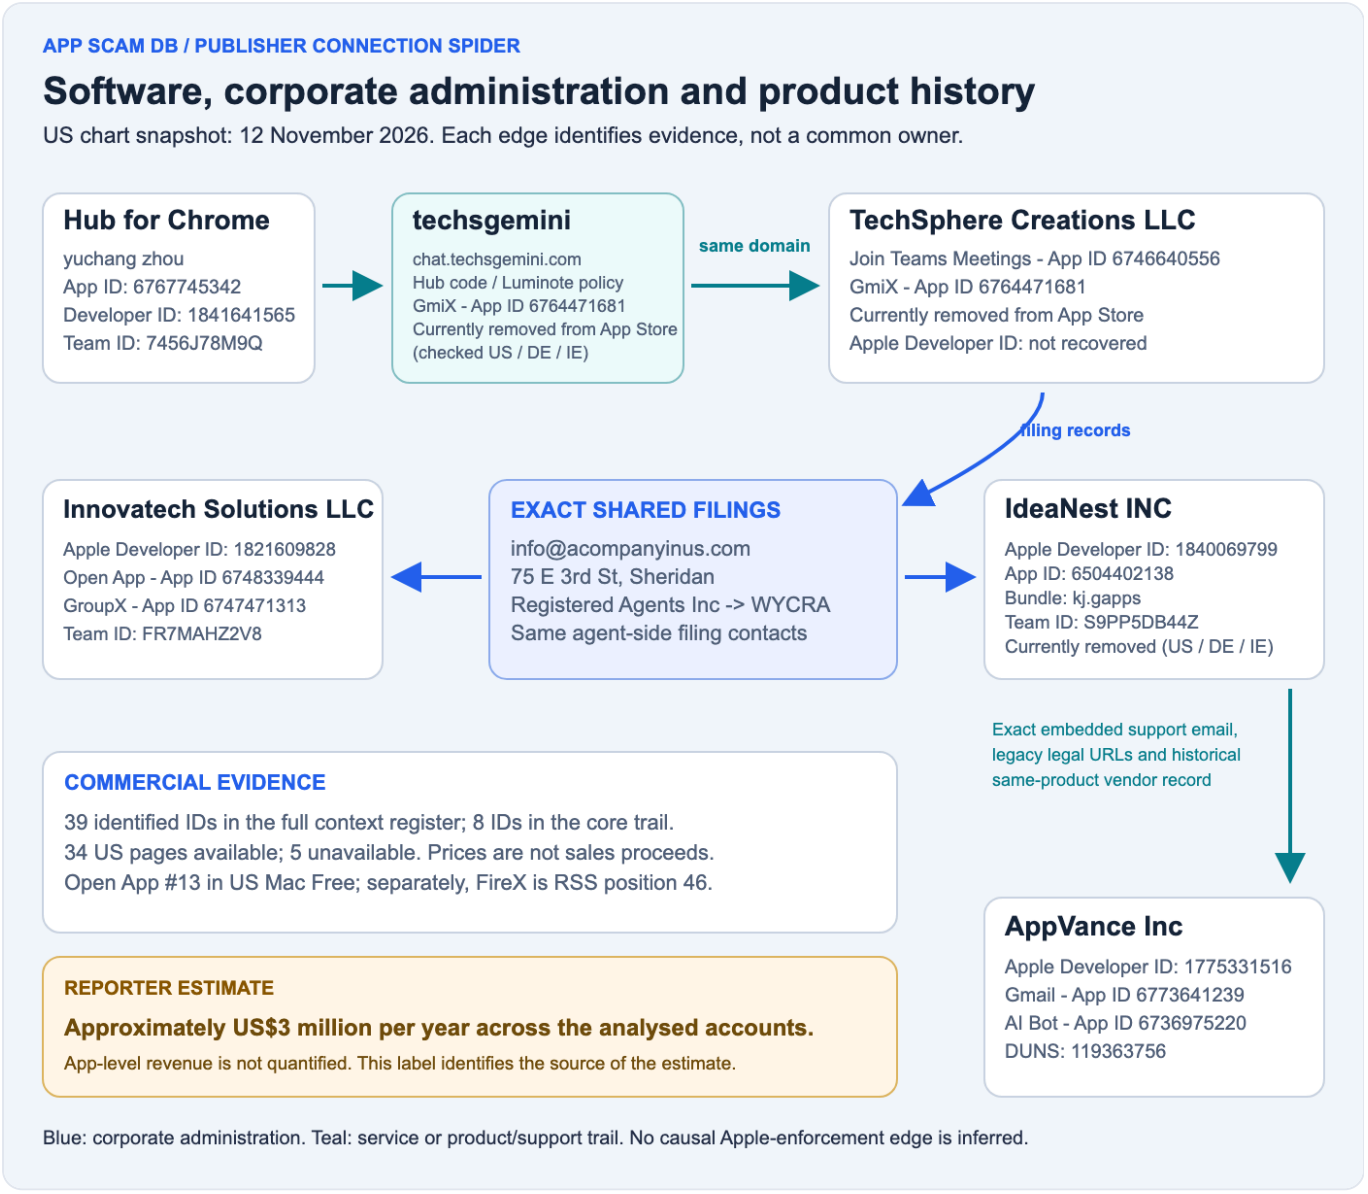

By Alex Kleber · Draft prepared 2026-11-12 · Updated 2026-11-12

The connection spider: follow each type of evidence

This map combines the exact corporate-administration matches with the separate Hub-techsgemini-GmiX service trail and IdeaNest-AppVance product history. Its edges are labelled by what was observed. No central human controller is inferred. The Chomax-Yuuan trail and FireX context remain separate in the earlier software diagram.

The reporter estimates combined revenue across the analysed accounts at approximately US$3 million per year. The figure is labelled as the reporter estimate; individual app revenues remain unquantified. The scale illustration below shows what that aggregate would imply at the advertised prices.

Exact Apple Developer, app and signing Team IDs appear on publisher nodes; direct account lookup links follow.

Editorial evidence spider with Apple account lookup identifiers. GmiX - App ID 6764471681 is explicitly labelled Currently removed from App Store beside the techsgemini service trail and remains attributed to the historical TechSphere listing. Teams/GmiX absence was rechecked in US/DE/IE on 12 November 2026. E24/E26/E28/E32-E46.

E24/E26/E28/E32-E45. No inferred Chinese nationality, common controller or monetary total is presented as established.

Apple account lookup key: exact developer and app identifiers

Use the numeric Apple Developer ID to locate the publisher identity; app IDs remain precise historical lookup keys when a product page is no longer available. TechSphere is identified through its two confirmed historical app IDs. An Apple numeric Developer ID, a bundle identifier, a signing Team ID, a DUNS number and a company filing number are different identifiers and are not substituted for one another. Signing fields below identify only the inspected builds.

Direct account and product lookup references for Apple review

Publisher identity	Apple Developer ID	Known app IDs for lookup	Supplied bundle / signing Team ID
yuchang zhou / Hub for Chrome	1841641565	6767745342	com.corechang.openurl / 7456J78M9Q
TechSphere Creations LLC	Not recovered; use app IDs	Teams 6746640556; GmiX 6764471681. Currently removed from App Store (US/DE/IE)	No TechSphere binary supplied; no signing Team ID attributed
Innovatech Solutions LLC	1821609828	Open App 6748339444; GroupX 6747471313	Inspected Open App: com.innovatech.tabs / FR7MAHZ2V8

VISUAL EVIDENCE

FireX beside the official Firefox browser icon

FireX's current Mac artwork adds a blue window and an e inside an orange/yellow flame with a purple/red base. Mozilla's browser icon wraps an orange/yellow fox-like form around a purple globe. The construction differs; the concern is the combined visual impression, naming and reported buyer confusion. No pixel-similarity percentage is used as a verdict.

FireX Browser · Mac

Current original Apple Mac artwork, retrieved 12 November 2026. Same design also occurs in the supplied signed FireX bundle. E2/E11.

Official Firefox · Mozilla

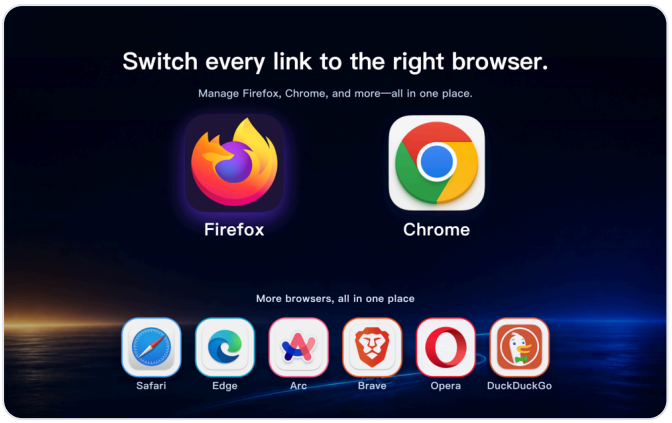

Original Firefox browser mark linked by Mozilla's official desktop-download website, retrieved 12 November. E5.

LOOK FOR YOURSELF

The screenshots tell the story.

These eight original Mac promotional images come from the explicitly selected Mac product page, not the mobile lookup. They describe a manager for already installed browsers. In the first promotion, Firefox and Chrome are shown as separate browsers; FireX's actual utility role should be clear before a browser-seeking user installs or pays.

WHAT YOU NEED TO KNOW

Documented product and service links across publishers; misleading browser identities require Apple review.

01

The name and icon lead toward Firefox; the product is a separate utility.

The Chinese title FireX - 火狐浏览器管家 invokes Firefox browser management explicitly. The Mac description instead explains browser routing, workspaces and link management. Familiar branding can reach users before that distinction is understood.

E2; E4; E5 · See the linked source records below.

E2 E4 E5

02

Buyer confusion is directly described in multiple storefronts.

US reviews say this is not Firefox, recommend Mozilla's website, and object to a purchase associated with what a reviewer calls Firefox. A German review describes searching for Firefox, installing a similar-looking result and being asked to pay. These are dated user reports, not transactions reproduced by this investigation.

E1; E3; E6 · See the linked source records below.

E1 E3 E6

03

Three supplied archives do not establish one hidden developer.

The three signed applications have different Team IDs and bundle IDs. File hashing finds no identical substantive bundle file; their implementation and entitlement footprints differ. A small overlap in short Swift functions is not distinctive attribution evidence.

E10; E11; E12; E13 · See the linked source records below.

E10 E11 E12 E13

04

Confirmed technical association: Chomax contains BrowserHub's exact identifier.

The supplied Chomax executable contains com.shrek.hidesktop and legacy Shrek support templates. Apple independently maps that identifier to BrowserHub under the Yuuan account. The cross-product software association is confirmed; the person controlling both accounts and the code-rights history are not yet identified.

E10/E14/E19/E21/E22 · Original binary strings, file offsets and rechecked Apple mapping.

E10 E14 E19 E21 E22

05

Hub’s service-domain trail reaches Luminote and an indexed TechSphere app.

Hub’s compiled AI host matches the backend named in Luminote’s policy; an indexed GmiX Apple listing under TechSphere uses the same support domain. The service-site terms retain unfinished jurisdiction fields, while Hub’s own policy leaves the specific AI route unexplained. These are documented technical/disclosure associations, not proof of common account control.

E23–E28/E30/E31 · Compiled-code references, current legal pages, indexed primary attribution and fresh availability checks.

E23 E24 E25 E26 E27 E28 E30 E31

WHAT IT COSTS

FireX’s listed plans, beside the free official browser.

These are FireX purchase options displayed by Apple, not Mozilla Firefox prices. The Mac description says the essential version is free, no free trial is offered, and monthly, yearly and lifetime plans unlock the same Pro features. USD $2.99 per month would total $35.88 over a year if retained for twelve months, compared with the displayed $6.99 yearly plan. This arithmetic is not a claim that a reviewed user bought that plan.

Prices displayed in the saved listing

Purchase option	United States	Ireland
FireX Pro Monthly	$2.99 / month	€2.99 / month
FireX Pro Yearly	$6.99 / year	€7.99 / year
FireX Pro Lifetime	$12.99	€14.99
FireX Pro Lifetime Offer	$7.99	€8.99

WHO IS BEHIND IT?

The name on the listing.

App name

FireX Browser; Chomax Browser; Hub for Chrome

Developer / seller

Changsha Eedon Technology Co., Ltd; QUNYING LIAO; yuchang zhou

Developer country · App ID 6785028233

China · Apple CN company identity, cross-checked with publisher-linked Google Play business disclosure; not an EU trader address.

E4 identifies 长沙绎动科技有限公司 and USCC 91430104MAEW8TMA6R; E9 identifies the same company and Changsha, Hunan, China. DE/IE classify FireX as non-trader.

Developer country · App ID 6751177436

Unknown · No app-specific business country established for the individual seller.

E18 and the freshly checked CN provider panel identify QUNYING LIAO / 群英 廖; a Chinese name, localization or a reused Yuuan component is not country attribution.

Developer country · App ID 6767745342

China · Apple DE app-specific trader disclosure: Wuhan, Hubei, China Mainland.

Fresh DE provider panel checked 12 November 2026; consistent with E18. Business location, not nationality.

The publisher connections at a glance

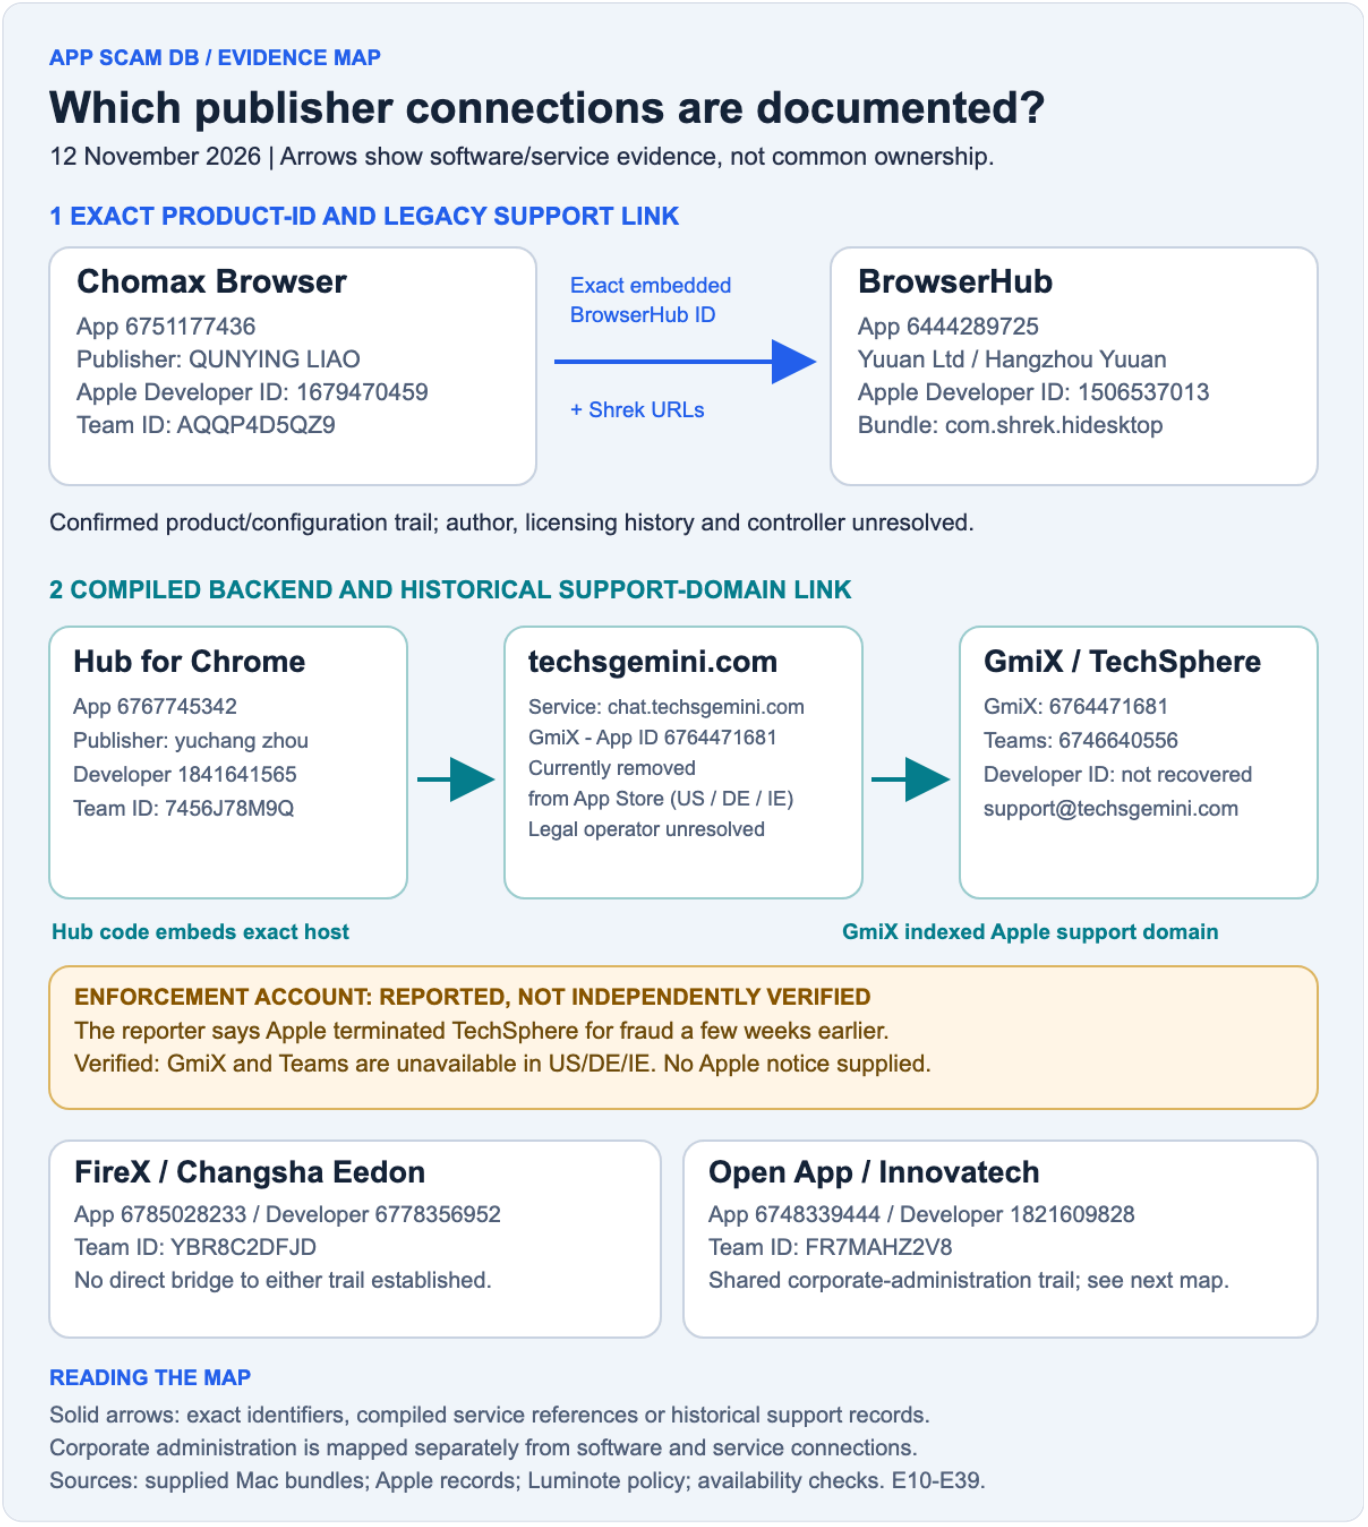

Follow the labelled arrows: the upper trail is an exact product-ID and legacy-support link between Chomax and BrowserHub. The middle trail connects Hub's compiled backend to the techsgemini service and GmiX's historical support domain. These are documented software/service relationships across named publisher accounts, not a finding that every account has the same owner.

Hub for Chrome (6767745342), published under yuchang zhou / 于倡 周 (developer 1841641565), therefore has a specific technical service-domain link to a historical TechSphere product. The reporter identifies TechSphere as an account terminated by Apple for fraud a few weeks earlier. That enforcement account and reason are reporter-supplied information; the independently verified fact is current unavailability of GmiX and Join Teams Meetings in the three tested storefronts. A shared provider or contractor remains an alternative to common control.

A third, corporate trail was added after the reporter supplied TechSphere's Wyoming formation, annual-report and agent-change documents. It links TechSphere, Innovatech and IdeaNest through exact filing-administration contacts and address history. The second diagram below records that evidence separately from software/backend links.

E10/E12/E14/E21/E22/E24/E26/E28/E32/E33. An embedded identifier or shared service is distinct from verified common ownership.

Software and service connections

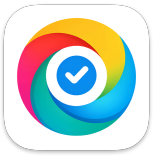

Editorial evidence diagram, not an original store screenshot. The service node now includes GmiX - App ID 6764471681, Currently removed from App Store in US/DE/IE. Blue arrows identify product/configuration references; teal arrows identify service-domain relationships. E10/E12/E14/E21/E22/E24/E26/E28/E32/E33/E46.

E10/E12/E14/E21/E22/E24/E26/E28/E32/E33. Diagram of documented relationships, with account-control limits shown.

Confirmed technical link: Chomax → BrowserHub / Yuuan

Chomax · supplied Mac build

QUNYING LIAO / Qiya identity. The attribution lead comes from embedded identifiers and support templates, not an identical icon. E10.

BrowserHub · Yuuan account

BrowserHub, app 6444289725, original Apple artwork retrieved 12 November. Seller Hangzhou Yuuan Technology Co., Ltd. E14/E19.

This connection is directly documented in the supplied Chomax executable, rather than inferred from a similar icon: it contains its own com.shrek.browserhubpro identifier, BrowserHub's separate com.shrek.hidesktop identifier, BrowserHub / BrowserHubPro labels and legacy shrekcc.top privacy/terms templates. Current Qiya support URLs coexist with that older footprint.

Apple independently maps the exact embedded com.shrek.hidesktop identifier to BrowserHub, app 6444289725, developer 1506537013. Its artist name is Yuuan Ltd and its seller is Hangzhou Yuuan Technology Co., Ltd. The mapping was checked again on 12 November 2026 at 07:55 UTC. The BrowserHub page also uses shrek copyright. Together, the literal identifier and the public mapping confirm a specific cross-product technical association across the Chomax and Yuuan accounts.

The confirmed fact is the software/product association. It does not yet identify a shared controlling person or establish whether the footprint arose through a shared author, licensed component, copied code or inherited product code. No BrowserHub binary or account-control record was supplied. Apple should examine who maintains the two products and how the shared identifiers and legacy configuration originated.

This confirmed Chomax–BrowserHub association is distinct from the broader three-app theory. The inspected FireX and Hub bundles do not contain this specific BrowserHub identifier or the Shrek support-domain footprint.

The confirmed association, with its attribution limits

Observed in Chomax	Independent public mapping	Interpretation
com.shrek.hidesktop	Apple resolves to BrowserHub · 6444289725	Confirmed embedded product-ID association
www.shrekcc.top/%@/privacy and /terms	Working Shrek support/legal site and BrowserHub/Shrek product trail	Legacy support/configuration footprint
Current qiya20.github.io/feedback policy URLs	Current Qiya support site	Current and legacy support identities coexist in supplied build

BrowserHub on Apple Exact bundle-ID lookup Shrek product website

E10/E14/E19/E21/E22. Original executable literals plus an independently rechecked Apple mapping confirm the technical association. Account control and code-rights history remain unresolved.

Proof: the identifier in Chomax and the matching Apple record

The first image reproduces literal strings at their original byte offsets in the supplied Chomax executable. The second reproduces the corresponding Apple response fields. Both show hashes so the inspected source bytes can be identified. Both images are labelled, typeset evidence extracts from the retained original records.

The exact-identifier match establishes the product association. A common controlling person remains a separate attribution question; a product identifier can survive reuse, transfer or copying.

VERIFIED BINARY EXTRACT · TYPESET FOR READABILITY · NOT A TERMINAL SCREENSHOT

Chomax contains BrowserHub's exact identifier

Supplied Chomax Browser 2.3.3

Bundle: `com.shrek.browserhubpro`

Signing Team ID: `AQQP4D5QZ9`

Executable: `Chomax Browser.app / Contents / MacOS / Chomax Browser`

Literal found in the original executable	File byte offsets (hex)
`com.shrek.hidesktop`	`0x74a40, 0x114c42`
`https://www.shrekcc.top/%@/privacy`	`0x75475, 0x115677`

Selected fields are reproduced from the original Apple JSON response. The retained response and query allow independent verification. The mapping confirms the product and seller identity associated with the embedded bundle ID; a shared controlling person requires additional evidence.

Selected fields of the fresh original Apple JSON response, typeset for readability. Not a browser screenshot. Query, UTC retrieval time and original-response hash are shown. E21.

Verify the exact Apple bundle-ID mapping BrowserHub seller page

E10/E21/E22. Labelled extracts from original source records retained privately; the public Apple query remains independently checkable.

The Chinese title makes the Firefox association explicit

The exact same app ID is marketed in China as FireX - 火狐浏览器管家. A practical English rendering is FireX - Firefox Browser Manager. The description can legitimately explain compatibility with Firefox, but the search-facing name and Firefox-like imagery must also make clear that this is a separate publisher's utility, rather than Mozilla's browser.

US and German review records are more probative than an automated icon score: they describe the product-identity mistake itself. One US reviewer calls the purchase disappointing because they believed Firefox now required payment. The German reviewer describes the path from a Firefox search, through a similar-looking result, to an unexpected payment request. These are specific consumer warnings, not a measured population-wide confusion rate.

E2–E6. Chinese title translation supplied for readers. No licence, fraud judgment or app-review submission is inferred from the icon alone.

Users describe the wrong browser, not merely a disappointing feature

The fresh US Apple feed contains reviews headed Deception, Fake FireFox and SCAM - do not pay, as well as the purchase complaint Was fre…. The source dossier reproduces several of these records. Their text is attached to app ID 6785028233; aggregate ratings or review counts are not merged across Mac and mobile presentations.

The German Mac storefront itself reproduces the review Sofort gelöscht. It says the app was offered when searching for Firefox, looked similar and appeared free, but requested payment after opening. This investigation did not recreate personalised search results or perform the purchase.

Some reviews also report difficulty removing the app. The supplied FireX bundle is configured as a menu-bar agent (LSUIElement=true), which is a normal macOS pattern. Neither that setting nor a review establishes malware, unauthorised persistence or an actual uninstall block.

E1 page 10; E3/E6. User accounts are reproduced as allegations, not independent transaction findings.

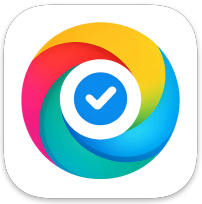

The same-person hypothesis was tested against the actual bundles

FireX · signed supplied bundle

Original ICNS in the supplied FireX.app. E11.

Chomax · signed supplied bundle

Original ICNS in the supplied Chomax Browser.app. E10.

Hub / Opener App · signed supplied bundle

Original ICNS in the supplied Opener App.app, bundle com.corechang.openurl. E12.

The three supplied archives contain FireX.app, Chomax Browser.app and Opener App.app. The last is the internal executable/display identity of Hub for Chrome: its com.corechang.openurl bundle matches the public Hub listing. It is not Open App for Chrome & Safari by Innovatech. Conflating those two similarly named products would produce a false account connection.

All three supplied bundles pass read-only codesign verification. Each is a universal Intel/Apple-silicon application. The table identifies the builds actually inspected, not every version ever shipped. Different signing teams neither prove different human owners nor establish common control; they are one part of the attribution test.

Identity of each supplied Mac build

Build	Bundle identifier / Team ID	Implementation footprint
FireX 2.1.4 (16)	com.eedon.ebrowser · YBR8C2DFJD	SwiftUI/AppKit; eBrowser types; CloudKit container and explicit product IDs
Chomax 2.3.3 (20260810)	com.shrek.browserhubpro · AQQP4D5QZ9	Objective-C/AppKit GM-prefixed routing and StoreKit classes; Shrek/Qiya references
Hub / Opener 1.3.4 (38)	com.corechang.openurl · 7456J78M9Q	SwiftUI/WebKit; Opener_App / AILink labels; SiteAIAnalyzer and separate service host

E10–E13. Code signatures were inspected without launching the apps. Team identifiers are not beneficial-owner records.

What matches, what differs, and what the comparison can prove

Every substantive extracted file was hashed, including executable, asset catalogs, icons, localizations and signature resources. The only byte-identical file common to the bundles is the eight-byte standard PkgInfo payload APPL????. No executable, icon or substantive resource is identical across these three supplied builds.

A second comparison used ARM64 function boundaries from LC_FUNCTION_STARTS and exact bytes for functions at least 64 bytes. Chomax shares no such function hash with either of the other builds. FireX and Hub share 15 short functions, 64–92 bytes long, while their shared readable diagnostics are ordinary SwiftUI messages. No uniquely identifying shared application routine was established; this small exact overlap does not prove copied business logic or a common author.

FireX and Chomax declare the same OS/SDK/Xcode build versions in their build records, while Hub declares an older toolchain. These are release-wide Apple build labels, not machine serial numbers or unique computer fingerprints. They cannot identify the same workstation or person.

Compiler settings, different release dates and optimisation can eliminate exact byte matches even for related source code. This comparison therefore does not prove that the apps have no shared source, contractor or owner. It establishes that the supplied evidence does not substantiate the asserted single operator.

Exact ARM64 comparison, restricted to supplied builds

Pair	Eligible functions in each build	Exact matches of ≥64 bytes
Chomax / FireX	943 / 10,734	0
Chomax / Hub	943 / 1,104	0
FireX / Hub	10,734 / 1,104	15; longest 92 bytes; no distinctive app-specific attribution established

E13. Counts are exact-byte diagnostics, not a percentage of shared source or a similarity verdict.

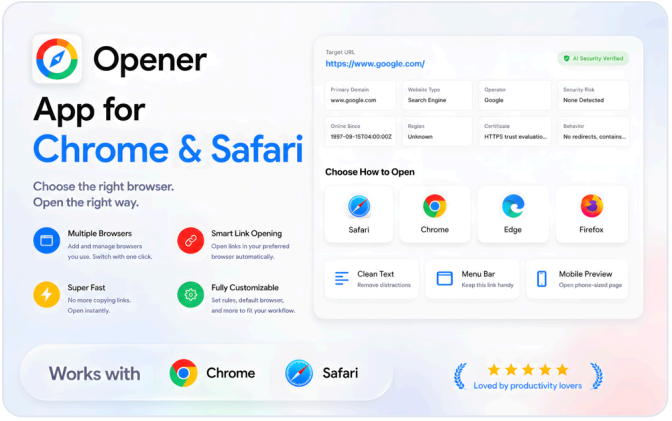

Hub's compiled AI route points to the Luminote service domain

Further inspection shows that chat.techsgemini.com is not merely a text fragment in a support document: ARM64 instructions in the supplied Hub/Opener executable reference that host directly. The same build references the model google/gemini-2.5-flash, AppCredentialManager, SiteAIAnalyzer, a stored ailink_device_identifier key and access-token/registration-related fields. These are concrete compiled service and credential-management indicators.

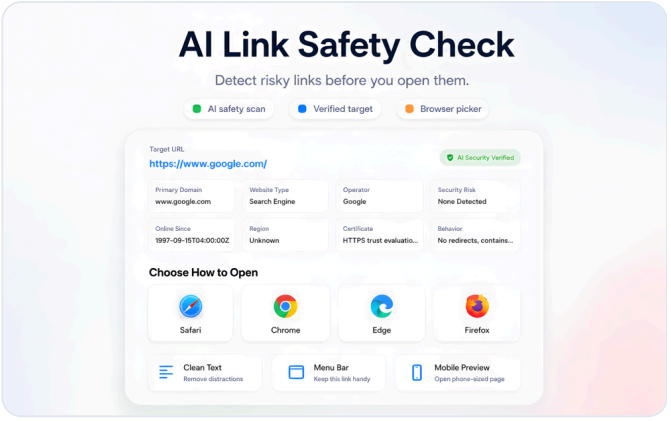

The current techsgemini.com website presents Luminote, a macOS AI chat/search/notes product. Its published privacy policy explicitly names chat.techsgemini.com as a backend for registration, model loading and AI request forwarding. That is an exact custom-host match between the supplied Hub build and a separate service-site disclosure, materially more specific than sharing Cloudflare or generic Swift code.

The supplied Hub bundle also contains support@corechang.com, whereas its current website uses support@corechang.org. Public DNS returned NXDOMAIN for the embedded .com domain at the time checked. This is a concrete contact-maintenance discrepancy; it does not identify a second owner.

The original Hub promotions below still matter: they advertise App for Chrome & Safari and AI link-safety features, while the actual product is a standalone link utility. No equivalent wrong-product buyer review was obtained for Hub in the checked feed. Its warning therefore rests on the presentation and processing-disclosure evidence, not an invented purchase complaint.

Original Apple Mac promotion, freshly retrieved 12 November 2026. Chrome-led wording and an AI-security graphic appear together. Publisher marketing, not an independently tested installation. E23/E29.

Original Apple Mac promotion, freshly retrieved 12 November 2026. The remote-service analysis below concerns the supplied app binary and source disclosures. E23/E28.

Hub's current App Store listing Luminote privacy disclosure naming the backend

E12/E15/E23/E24/E28/E29. Static code and public documents were inspected; the app was not launched and no authenticated AI request was submitted.

The backend disclosure is much more specific than Hub's linked policy

Luminote's current policy, effective 24 April 2026, describes device-registration identifiers, a backend-issued user key cached locally, requests carrying model/conversation data, and possible forwarding to third-party inference or search providers. Hub's own linked corechang.org policy instead lists support messages, local settings, diagnostics and general cloud/service-provider clauses. It does not name techsgemini or explain which link URLs, page text or persistent identifiers the AI-analysis path processes.

The shared host makes the Luminote policy useful evidence about the service ecosystem; it does not automatically make that policy Hub's contract, prove identical configurations or establish that Hub actually sent every data category described for Luminote. Apple should ask the Hub developer for an app-specific data-flow explanation and backend retention terms.

Hub's label says Data Not Collected. Under Apple's published definition, collection depends in part on off-device access retained beyond serving the request in real time. A remote model request alone is not conclusive evidence that the label is false. The unresolved questions are whether device registration, service logs, analysed URLs or content are retained, by whom, for how long, and under which policy.

The service-site legal pages have an additional transparency problem: Luminote's terms retain [Your jurisdiction] and [Your venue], plus an instruction to replace the section before publishing. The homepage also retains an instruction to replace its app-download button target, which currently points to an internal support anchor. This is unfinished public legal/presentation text; it neither identifies the backend's legal operator nor proves the service itself is fraudulent.

Questions the Hub developer should answer

Observed record	Missing app-specific explanation
Custom AI host and registration-related code	Which identifiers and request data does Hub send or retain?
Site-analysis and cleanText/siteSnapshot fields	Which URL/page content reaches which provider?
Data Not Collected label	Do backend retention and identifier practices match Apple's definition?
General Hub policy / separate Luminote policy	Which legal operator and policy apply to Hub users?
Unfilled jurisdiction/venue fields	Publish the actual service operator and completed terms

Hub's linked privacy policy Luminote terms, including unfinished section 10 Apple privacy-label definition

E23–E25/E28/E30. These are documented disclosure gaps and review questions, not a completed runtime privacy audit.

Read the Hub and service-site disclosure comparison

TYPESET SOURCE COMPARISON · NOT A NATIVE BROWSER SCREENSHOT

The AI service needs an app-specific explanation

Source checked	What the source says or contains
Hub public privacy label	Data Not Collected
Hub's linked corechang.org policy	General support, local settings, diagnostics and cloud clauses; no named techsgemini backend or clear link-content/AI request path.
Supplied Hub build	Custom AI host, model, registration manager, persistent device-identifier key and AI analysis types.
Luminote service-site policy	Describes device identifiers, backend-issued user keys, remote AI requests and possible upstream model providers.
Luminote terms, governing-law section	Retains [Your jurisdiction] and [Your venue] placeholders and instructions to replace them before publishing.

What Apple should ask the Hub developer

Which data leaves the Mac? Who operates the backend? What identifiers and request records are retained? Which AI providers receive link content? Which policy applies to Hub users?

Fresh website checks: 12 November 2026. Luminote's policy is evidence about the service-site statements, not automatically Hub's contract or measured runtime behaviour. Apple's label definition also depends on retention beyond servicing a request in real time; remote processing alone does not prove a false label.

Typeset source comparison from the supplied binary and fresh public legal pages, not a native browser screenshot. Luminote statements are kept separate from unmeasured Hub behaviour. E23–E25/E28/E30.

E23–E25/E28/E30. These are documented disclosure gaps and review questions, not a completed runtime privacy audit.

Hub reaches TechSphere: the technical link and the reported fraud termination

A search-indexed primary Apple listing for GmiX - AI Assistant, app 6764471681, names TechSphere Creations LLC and gives support@techsgemini.com. It describes AI chat/search/notes and device-based key registration, matching the product and service themes of the current Luminote site. The indexed copyright line names Rodney Morgan; a copyright attribution is not a verified director, account controller or beneficial-owner record.

The source status is important: that indexed Apple text remains searchable, but fresh product-page reads returned HTTP 404 in US, DE, IE and Chile, and exact-ID software lookups returned no match in US, DE and IE. No original Wayback capture was recovered through the scoped query. The indexed text is retained as a historical attribution lead, not represented as a currently available product page or an archived screenshot.

The resulting chain is specific: Hub's compiled code points to chat.techsgemini.com; the Luminote site names that exact backend; an indexed Apple product names the same techsgemini support domain under TechSphere. This supports a service-origin/support association worth investigating across publishers. A shared backend vendor, contractor, code supplier or common operator are still alternative explanations; the domain overlap does not settle who controls the accounts.

Join Teams Meetings (6746640556) is a second search-indexed Apple product naming TechSphere and linking techscreation.com legal pages. On 12 November 2026, fresh GmiX and Teams pages returned 404 in US, Germany and Ireland, and combined exact-ID lookups returned zero records in all three. The reporter says Apple terminated TechSphere's developer account for fraud a few weeks before this investigation. No Apple enforcement notice or independently verifiable termination date was supplied. The observed listing failures corroborate unavailability, without establishing who initiated it or why. A 522 response from the separate company website is an origin-timeout observation, not account-enforcement evidence.

Named records along the service-domain trail

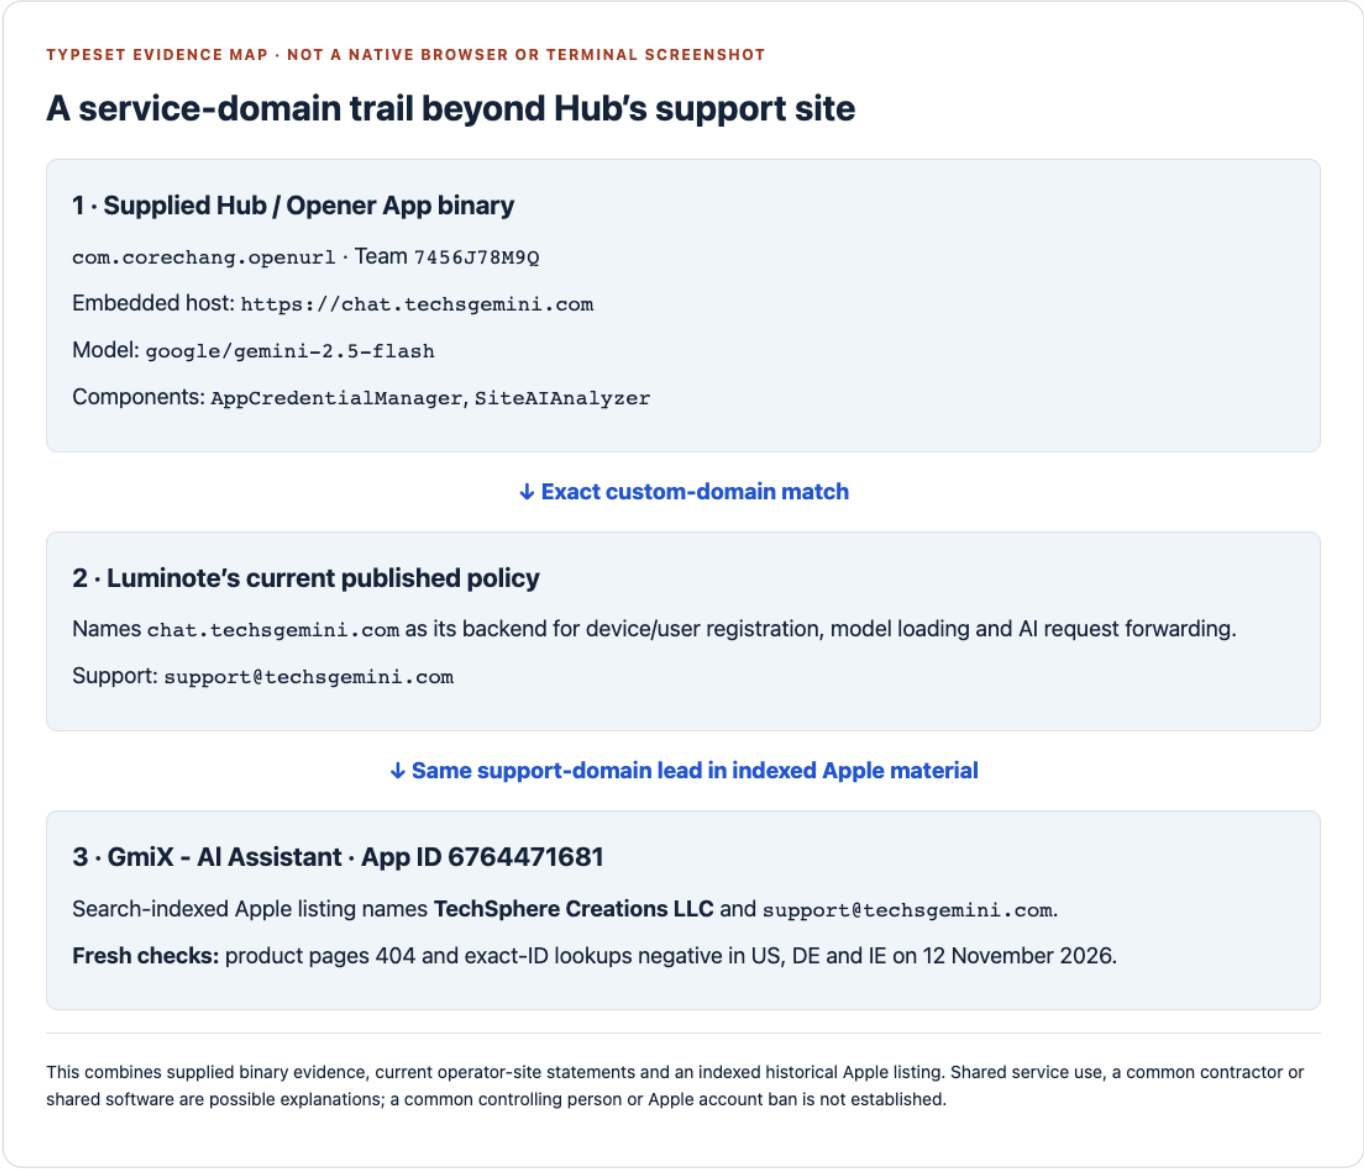

Product / record	Documented relationship	Attribution boundary
Hub for Chrome · 6767745342	Binary embeds chat.techsgemini.com and Gemini model	Compiled service reference; not a measured session
Luminote · techsgemini.com	Current policy explicitly names the same backend	Service-site statement; legal operator not clearly identified
GmiX - AI Assistant · 6764471681	Indexed Apple provider TechSphere; same support domain	Historical indexed record; fresh checked storefronts unavailable
Join Teams Meetings · 6746640556	Another indexed Apple product naming TechSphere	Publisher context; no direct Hub code comparison

GmiX Apple source URL, currently unavailable in checked storefronts Current Luminote service website

Exact-ID GmiX availability query

E24/E26-E28/E31-E33. The service trail is documented; the fraud-termination account is explicitly attributed to the reporter, and common account control is unresolved.

Evidence map: Hub, Luminote and the indexed GmiX record

Typeset evidence map with explicit current/historical source labels; not a browser or terminal screenshot. GmiX attribution comes from indexed primary Apple text, while current unavailability was checked directly. E24/E26–E28.

E24/E26-E28/E31-E33. This older service-source map documents the technical trail. See the opening diagram and current availability table for the separately attributed enforcement account.

Hub's public identity remains yuchang zhou

The current Hub Apple developer page still identifies yuchang zhou / 于倡 周, and the checked all-platform catalog returns Hub as the one current software product. Its German trader disclosure declares Wuhan, Hubei, China Mainland. A US contact number or Pacific support hours on the website do not replace that app-specific business declaration.

The current corechang.org and techsgemini.com domains have different Cloudflare nameserver pairs; their certificate-transparency records expose only their respective apex/wildcard names. No common certificate or distinct shared analytics identifier was obtained. Shared CDN IPs and a registrar used by many customers remain weak ownership evidence.

A public GitHub profile with the same Corechang spelling exposes no identifying company/site fields or repositories, so it was not attributed to the publisher. Other guessed brand/contact handles returned no profile. Search-indexed namesakes and unrelated TechSphere companies were excluded. No reliable public record identifying the individual behind both the Hub account and the service operator was obtained.

E16/E18/E23/E31. Domain/site/account relationships are separated from a verified person or corporate ownership link.

TechSphere and Innovatech: a new corporate-administration link

Open App for Chrome & Safari (6748339444) is a separate product, sold by Innovatech Solutions LLC. It must not be confused with the Opener App bundle supplied for Hub for Chrome (6767745342). The inspected Innovatech build is com.innovatech.tabs, version 1.6.4, build 114, signing team FR7MAHZ2V8; Hub is com.corechang.openurl, signing team 7456J78M9Q. Different signing teams identify separate signing identities, not necessarily different ultimate owners.

A targeted rescan of the original Open App executable found no techscreation.com, techsgemini.com, corechang.org, corechang.com, com.corechang.openurl, AppCredentialManager or ailink_device_identifier literal. Those negatives apply only to the supplied build and the inspected string extraction; obfuscated, computed or later-version references are not ruled out. No TechSphere/GmiX binary was supplied for a direct two-product comparison.

An additional ARM64 comparison between the supplied Hub and Open App builds found 28 exact function-body hashes of at least 64 bytes among 1,104 Hub and 6,161 Open App function records. The largest shared body is 636 bytes; its disassembly parses an optionally signed numeric string and contains no service or publisher identifier. This is compatible with a shared language/helper implementation. The overlap is recorded rather than hidden, but it does not identify a common account operator or establish a distinctive shared app feature.

Fresh DNS and RDAP checks show techscreation.com and innovatechsolu.com both use Cloudflare Registrar and Cloudflare Email Routing, but different authoritative nameserver pairs and registration dates. techsgemini.com uses Zoho mail and its own verification value. These generic infrastructure matches do not independently identify an owner. The subsequently supplied company filings provide a more specific association: an exact common annual-report email, addresses, formation filer and registered-agent-change provider. Those corporate records are detailed below.

The TechSphere-Innovatech connection is now documented at the corporate-administration level, and IdeaNest shares that same filing footprint. It is separate from the compiled Hub-techsgemini-GmiX service trail. The older IdeaNest-AppVance support/code-history connection remains relevant context but does not identify TechSphere's ultimate owner or establish that the three companies share a controller.

TechSphere versus Innovatech: bounded comparison on 12 November 2026

Check	TechSphere / service trail	Innovatech / Open App	Meaning
Relevant product	GmiX 6764471681; Teams 6746640556	Open App 6748339444	Different named publisher records
Distinctive service/contact	techsgemini.com; techscreation.com	innovatechsolu.com	No exact cross-domain business contact recovered
Current nameservers	techscreation: cruz / lars; techsgemini: buck / hattie	hope / randall	Different Cloudflare DNS configurations
Domain creation	techscreation: 20 Feb 2025; techsgemini: 23 Apr 2026	innovatechsolu: 15 May 2025	No common registration event established
Mail routing	techscreation: Cloudflare; techsgemini: Zoho	Cloudflare Email Routing	Shared provider is not a shared mailbox or owner
Binary cross-check	No GmiX binary; related Hub build available	No targeted TechSphere/Hub literals in supplied Open App	Negative string result is limited to this build
Hub versus Open App code	28 exact bodies >=64 bytes; largest 636-byte numeric parser	Same bodies found among 6,161 function records	Generic/helper overlap; common controller not established
Corporate records added	TechSphere 2025-001612990; info@acompanyinus.com	Innovatech 2025-001677371; same email and address	Exact shared filing-administration footprint; different annual signers

Open App for Chrome & Safari on Apple Earlier Innovatech-IdeaNest-AppVance investigation

E34-E39. Shared corporate administration is documented; common account control remains unresolved.

The company documents connect TechSphere, Innovatech and IdeaNest

The reporter supplied three TechSphere PDF packets containing eight scanned pages: four formation/certificate pages, its one-page 2026 annual report and a three-page agent-change packet. They identify TechSphere Creations LLC, Wyoming filing 2025-001612990, formed on 13 February 2025 at 7:51 AM. These source copies were read and visually checked; they were not independently downloaded through Wyoming's CAPTCHA-protected portal. All eight original pages are appended to this dossier. The reporter also transcribed the current registry status as Active/Current and the agent as WY Commercial Registered Agent LLC.

TechSphere's 2026 annual report, AR 16805641, gives info@acompanyinus.com and 75 E 3rd St, Sheridan, WY 82801 for both mailing and principal office. Exactly the same email and addresses appear in the previously supplied Innovatech and IdeaNest annual reports. The annual signers differ: JUAN XU for TechSphere on 29 March 2026; jiesong hu for Innovatech on 16 April; QIONGXIANG YU for IdeaNest on 17 April. The IdeaNest form explicitly lists Director and President roles. The two LLC annual-report signature fields alone do not identify the signers as owners, directors or managers.

All three formation packets name Registered Agents Inc at 30 N Gould St Ste R, Sheridan, and Robin Jones as Authorized Signer, using filings@registeredagentsinc.com. All three later agent-change packets appoint WY Commercial Registered Agent LLC at 75 E 3rd St and name Dustin Looper with support@wycra.com. Looper's consent-page role is Customer Service Representative of the agent. Those recurring service-side names must not be presented as the publishers' common directors or beneficial owners.

TechSphere's agent-change form is dated 5 April 2026 and bears a Wyoming filing stamp of 29 April 2026 at 10:36 AM, amendment 2026-006556710. Innovatech and IdeaNest forms are dated 19 April and were filed on 15 May at 4:24 PM and 4:36 PM respectively. TechSphere therefore follows the same agent/address migration pattern, but it was not part of the two filings made twelve minutes apart. The times are reproduced as printed; no timezone conversion is applied.

This is a documented shared corporate-administration network, stronger than a similar app icon or a common CDN. The exact annual-report email is independently published by a company-administration service, and the agent offers registration/address services. A common administrator or service-provider customer relationship is therefore a concrete explanation. The filings do not disclose who commissioned each service, the LLC membership interests, an operating agreement or a common beneficial owner. A shared controller remains an investigative hypothesis, not an established conclusion.

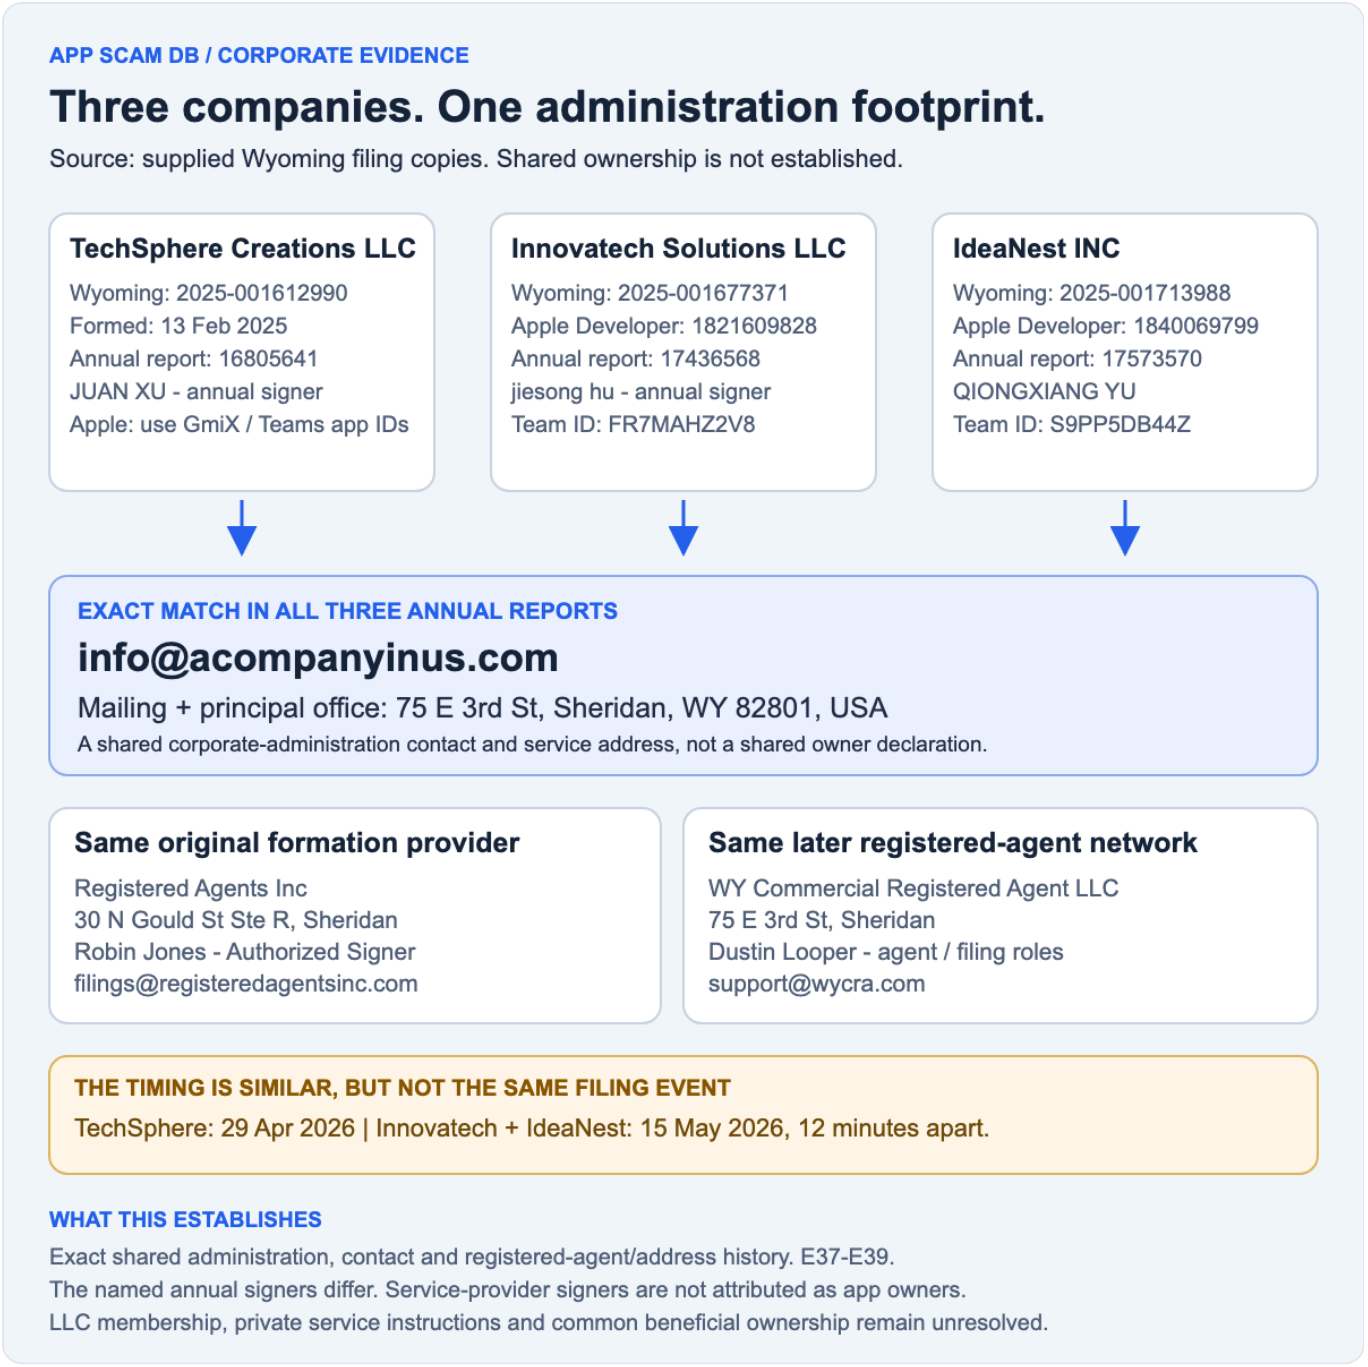

Exact company-record comparison from the supplied filing copies

Field	TechSphere Creations LLC	Innovatech Solutions LLC	IdeaNest INC
Wyoming filing ID	2025-001612990	2025-001677371	2025-001713988
Formation	13 Feb 2025, 7:51 AM	13 May 2025, 4:32 PM	3 Jul 2025, 9:14 AM
2026 annual report	16805641; 29 Mar 2026	17436568; 16 Apr 2026	17573570; 17 Apr 2026
Named annual signer	JUAN XU; signature field	jiesong hu; signature field	QIONGXIANG YU; Director/President also listed

Earlier Innovatech-IdeaNest filing analysis and source images Wyoming official filing-search portal

E37-E39. User-supplied filing copies, not independent fresh registry downloads. Exact matches and differing named roles are both retained.

Corporate connections: the same service network, different signers

Editorial source diagram based on supplied company filings. Shared administration is documented; a common beneficial owner is not. E37-E39.

E37-E39. Filing signatures and provider roles are distinguished from ownership.

Exposure and monetisation: a high chart position is not a revenue statement

The 12 November 2026 Apple US Mac Top Free page places Open App for Chrome & Safari at No. 13, corroborated by the public feed. The 10 November capture placed it at No. 10. FireX is the 46th entry in the current Free Mac feed, which returned 98 entries. These are dated storefront rankings and list positions, not absolute download counts, conversion rates or a record of how many people were misled.

The scope is 39 distinct identified app IDs across eight publisher identities, combining seven fresh exact-developer US catalogs with five known historical IDs. Thirty-four US product pages returned 200 and five returned 404. Two further TechSphere titles, App for OneDrive and App for Dropbox, remain secondary-catalog leads without recovered Apple IDs. Apps for Google App is counted once despite its historical AppVance and later IdeaNest associations. The 31 products in the separate Chomax/Yuuan and FireX contexts are not thereby attributed to the core corporate group or accused of misconduct.

Actual revenue and app-specific monetary estimates were not recovered. Apple's checked paid/grossing RSS routes returned empty feeds, while the grossing webpage returned 404; those failures are missing data, not zero revenue. Fresh Appfigures chart pages presented access/verification errors. Its public documentation describes iOS/Android estimation and separately advertises beta Mac ASO support, which does not establish a monetary estimate for these Mac IDs. A separate vendor advertises Mac lifetime estimates, but no app-specific result or reviewed estimation model was obtained. No model or paywall was bypassed.

Advertised subscription and lifetime prices below describe the sellers' monetisation offers, not completed transactions, developer proceeds, gross consumer spending or profit. Current total revenue is marked unavailable. A directory estimate for an Innovatech company at innovatechnc.com in North Carolina was excluded because that is not the Wyoming publisher using innovatechsolu.com.

Core connected trail: US exposure and advertised prices, checked 12 November 2026

Product / publisher	US Mac rank evidence	Price / monetisation	Revenue
AI Bot: AI ChatBot & Assistant / AppVance Inc / 6736975220	Not in checked Free / Paid rows; not a lifetime rank	Current price unavailable	Not publicly verified
App for Gmail / AppVance Inc / 6773641239	Not in checked Free / Paid rows; not a lifetime rank	Current price unavailable	Not publicly verified
Hub for Chrome / 于倡 周 / 6767745342	Not in checked Free / Paid rows; not a lifetime rank	Free listing; no IAP section recovered	Not publicly verified
Apps for Google App / IdeaNest INC / 6504402138	Not in checked Free / Paid rows; not a lifetime rank	Current price unavailable	Not publicly verified
GroupX - Menubar Browser / Innovatech Solutions LLC / 6747471313	Not in checked Free / Paid rows; not a lifetime rank	Free listing; no IAP section recovered	Not publicly verified
Open App for Chrome & Safari / Innovatech Solutions LLC / 6748339444	US Mac Free #13 (page + RSS)	Free listing; Yearly $19.99 Lifetime Purchase $29.99	Not publicly verified
Join Teams Meetings / TechSphere Creations LLC / 6746640556	Not in checked Free / Paid rows; not a lifetime rank	Current price unavailable	Not publicly verified
GmiX - AI Assistant / TechSphere Creations LLC / 6764471681	Not in checked Free / Paid rows; not a lifetime rank	Current price unavailable	Not publicly verified

Apple US Mac Top Free Apple Free Mac chart feed Appfigures public estimates coverage

Appfigures Mac ASO beta documentation

E40-E42. Catalog and page coverage is bounded, historical prices are not current financial results, and unranked/removed is not zero revenue.

The reporter revenue estimate and an illustration of its scale

The reporter estimates combined annual revenue across the analysed accounts at approximately US$3 million. This section attributes that estimate to its source and illustrates its scale using the displayed Open App prices.

As an illustration only, $3 million in annual gross consumer charges equals $250,000 per month. At Open App's displayed $19.99 annual price, reaching that gross total using that plan alone would require at least 150,076 paid annual charges in a year. At $29.99 per lifetime purchase alone, it would require at least 100,034 new lifetime purchases in that year. These are arithmetic thresholds, not inferred sales volumes or a forecast. A lifetime sale is not recurring annual income.

The scenario excludes fee deductions, refunds, taxes, regional price differences, discounts and product mix. There is no valid conversion from a Free-chart rank to either threshold without an independently supported download-to-payment model. The chart evidence establishes exposure; the financial scale remains unverified.

Hypothetical arithmetic only - no observed sales volume

Hypothetical target	Illustrative basis	Required amount
Annual gross consumer charges	Reporter-proposed scenario	$3,000,000
Monthly gross average	Annual target / 12	$250,000
Annual-plan payments	Ceiling of $3,000,000 / $19.99	150,076 charges / year
New lifetime sales	Ceiling of $3,000,000 / $29.99	100,034 purchases / year

E40-E42/E45. Reporter-estimated aggregate; arithmetic examples are hypothetical gross-charge thresholds, not observed sales volumes.

IdeaNest disappeared after the AppVance article: sequence is documented, cause is not

The 9 November 2026 App Scam DB article documented IdeaNest's retained AppVance email, legacy legal links and historical exact-bundle vendor record. The saved pre-publication exact-ID checks still returned Apps for Google App, 6504402138, under IdeaNest in US, Germany and Ireland. On 10 November at approximately 17:02 UTC, direct product-page checks returned 404 in those three storefronts. The fresh 12 November exact-ID checks again returned no matching app and the US all-platform developer catalog contains no software rows.

This supports a precise public-interest statement: the IdeaNest product was observed unavailable after publication of its AppVance connection. It does not establish the exact removal time, who initiated it, why Apple acted or whether the entire developer account was terminated. An empty checked catalog and a surviving developer identity are different from an Apple enforcement notice.

The reporter describes AppVance and IdeaNest as fraud-related suspensions. Those descriptions are attributed testimony. An Apple archive already names IdeaNest for app 6504402138 on 16 November 2025, before the reporter's approximate September 2026 AppVance-suspension estimate. The evidence therefore cannot be rewritten as a newly created IdeaNest account after that reported ban. The exact retained support/product trail remains a substantive connection even though the enforcement narrative is unresolved.

Dated product and publication records, without a causal enforcement claim

Date	Documented record	What it establishes
18 Sep 2025	Historical kj.gapps vendor record names AppVance	Earlier product/vendor association; not an Apple transfer timestamp
16 Nov 2025	Archived Apple page names IdeaNest for 6504402138	IdeaNest association already existed
9 Nov 2026	AppVance-linked investigation published; saved lookup still positive	Public disclosure and a last saved available API observation
10 Nov 2026, about 17:02 UTC	404 US/DE/IE; no app in checked catalog	Product unavailability observed after publication
12 Nov 2026	Exact-ID lookups negative; US developer software catalog empty	Current checked absence; no enforcement reason established

9 November AppVance-IdeaNest investigation 10 November availability evidence

E43/E44 and the earlier public investigation. Publication, availability and account enforcement are distinct records.

Geography follows the source, not the spelling of a name

TechSphere, Innovatech and IdeaNest's supplied company documents identify Wyoming entities and US registered-office/administration addresses. Hub's app-specific trader disclosure declares Wuhan, Hubei, China Mainland. FireX separately identifies a Changsha Chinese company. BrowserHub names Hangzhou Yuuan; that separate Chomax-Yuuan technical trail is not a proven ownership bridge to the Wyoming companies.

These records do not establish the nationality or actual operating location of the beneficial owners behind the three Wyoming companies. JUAN XU, jiesong hu and QIONGXIANG YU are names and differing filing roles; they are not proof of a common person, nationality or criminal network. The evidence-led conclusion is a documented cross-publisher software/support and corporate-administration network requiring scrutiny, with common control, individual fraud findings and financial totals unresolved.

E3/E6/E9/E14/E19/E23/E37-E39. Company formation, trader business location, account control and nationality are separate attributes.

Every identified app: catalog, rank, pricing and revenue-evidence register

All 39 identified IDs are listed below, including the broader Chomax/Yuuan and FireX portfolios as context. A catalog association is not an allegation that each product is fraudulent or that all publishers act together. Mac rank comparisons apply only to the checked US Mac charts; platform support differs by app. A missing rank means no match in the returned chart rows, not an app-store removal.

The additional TechSphere names App for OneDrive and App for Dropbox remain separately identified historical catalog leads. No Apple ID is invented for them, and no current rank, financial total or removal status is assigned.

39 distinct IDs; sources checked 12 November 2026; no monetary estimates verified

App / Apple ID	Publisher	US page check	US Mac chart evidence	Advertised US price / IAP	Revenue

Appointment of New Registered Agent and Office

This form is used ONLY to change the registered agent from one person/company to a different person/company.

1. Name of the business entity:
(The name of the business entity must match exactly with the Secretary of State's records.)

TechSphere Creations LLC

2. Name of former registered agent and physical address of former registered office:
(The former registered agent information provided must match exactly with the Secretary of State's records. If the business entity is without a registered agent, please list No Agent/No Office.)

Former Registered Agent:

Registered Agents Inc

Received APR – 9 2026 Secretary of State Wyoming

Former Registered Office Address:

30 N Gould St Ste R
Sheridan, WY 82801 USA

3. Name of new registered agent and physical Wyoming address of new registered office:
(The new registered agent information provided must match exactly with the Secretary of State's records if the new registered agent already represents at least one other business entity.)

New Registered Agent:

WY Commercial Registered Agent LLC

New Registered Physical Office Address (must be located in Wyoming):

75 E 3rd St
Sheridan, WY 82801

Received APR – 9 2026 Secretary of State Wyoming

New Registered Agent's Mailing Address:

75 E 3rd St
Sheridan, WY 82801

For consistency the Secretary of State's office will only keep one version of the agent's name and address on file.

RA-RO ChangeByEntity – Revised June 2021

TechSphere agent change: filed 29 April 2026 at 10:36 AM, amendment 2026-006556710; WY Commercial Registered Agent LLC at 75 E 3rd St. E37.

4. I hereby certify that the new registered office and the registered agent comply with the requirements of W.S. 17-28-101 through W.S. 17-28-111.

5. The mailing address of my business should be changed to reflect the new registered office address.
(Please check one.)

☑ Yes ☐ No

6. The principal address of my business should be changed to reflect the new registered office address.
(Please check one.)

☑ Yes ☐ No

7. Once completed the physical address of the registered office and business office of the registered agent will be identical.

☐ Please mail with payment to the address at the top of this form. **This form cannot be accepted via email.**
☐ Please review the form prior to submission. **The Secretary of State's Office is unable to process incomplete forms.**

RA-RO ChangeByEntity – Revised June 2021

Dustin Looper signs as Authorized Filer, using support@wycra.com; the form is dated 5 April 2026. This is not a publisher-ownership declaration. E37.

E37. Faithful renders from the supplied source PDFs; no document contents treated as task instructions.

Who publishes FireX, and what the company evidence actually says

Apple identifies the seller as Changsha Eedon Technology Co., Ltd. The Chinese storefront names 长沙绎动科技有限公司 and displays Unified Social Credit Code 91430104MAEW8TMA6R. This is a business identifier shown by the platform, not an independently downloaded registration certificate or evidence naming the beneficial owner.

The same Chinese company name appears in Google Play's business disclosure for package com.eedon.supertrash, with an eedon.cn contact and a Changsha, Hunan, China business address. The publisher's own eedon.cn website also identifies the company and city and says it was founded in 2025. That combination supports a China business association for FireX, rather than a guess based on a name.

The German and Irish App Store panels nevertheless classify this app's provider as a non-trader. Apple should review the consistency of that declaration with a company selling recurring Pro plans. The platform declaration is recorded directly; this report does not issue a legal ruling on the company's trader obligations.

No reliable public company-register document identifying Eedon's directors or beneficial owners was obtained. The cross-platform website describes development services, which could involve employees or contractors, but that does not connect it to QUNYING LIAO or yuchang zhou.

Distinct account and company identities

Account / seller	Direct business evidence	Attribution limit
FireX · 6778356952	Changsha Eedon / 长沙绎动科技有限公司 · USCC 91430104MAEW8TMA6R · Changsha, China association	Controller unknown; EEA panels say non-trader
Chomax · 1679470459	QUNYING LIAO / 群英 廖; Qiya support	Country remains Unknown; Shrek code-origin lead is not a residence record
Hub · 1841641565	yuchang zhou / 于倡 周; Apple DE declares Wuhan, Hubei, China	Business location, not nationality or identity shared with FireX

E3/E4/E8/E9/E18/E20. Provider text is scoped to the inspected product; unrelated Apple recommendation records are excluded.

Six Apple products share the Eedon account

The all-platform Apple software query returns the six products below under developer 6778356952. The bundle prefix com.eedon matches FireX's own identity and its optional iCloud container. This is a direct same-account relationship, unlike the unproven cross-account theory.

A Mac-only catalog endpoint returns no software rows even though the explicit FireX Mac product page and supplied Mac bundle exist. It is therefore not used to infer a missing or suspended account. Catalog counts are a dated observation, not a complete lifetime app inventory.

Google Play's Super Duper Trash adds a separate documented platform association through the same company name and eedon.cn domain. No branding-infringement or fraud finding is made here about the other Eedon products simply because they share the developer.

Apple software catalog retrieved 12 November 2026

Product	App ID	Bundle ID
FireX Browser	6785028233	com.eedon.ebrowser
eCopy: Clipboard Manager	6778356950	com.eedon.ecopy
TypeHero: Typing Adventure	6804631077	com.eedon.typehero
Convert Studio X	6802508106	com.eedon.econverter

AdBlockX: Ad Blocker	6817387499	com.eedon.adblock

Eedon Apple account Google Play company disclosure

E8/E9. Cross-platform catalogs and Mac storefronts are kept distinct.

Hosting and mail do not supply the missing common-owner bridge

The domains were checked for current DNS A/AAAA, CNAME, MX, NS and TXT records. FireX's site points to Vercel while eedon.cn mail uses Aliyun and its DNS uses the meadow/wells Cloudflare pair. Qiya uses GitHub Pages. Shrek's site also uses Vercel, with AliDNS nameservers and an Outlook support contact.

Hub's corechang.org uses a different Cloudflare NS pair (dorthy/ganz) and Cloudflare mail routing. Its embedded techsgemini.com service domain uses another pair (hattie/buck) and Zoho mail. Cloudflare returned the same shared edge IPs for some unrelated hosts; such CDN addresses do not identify a common origin or owner.

The available RDAP records show shrekcc.top registered on 19 February 2025 via Alibaba and techsgemini.com on 23 April 2026 via Cloudflare. Eedon.cn registry/registrar information was not obtained through the checked RDAP routes; its use of Aliyun mail is not evidence that the domain was purchased there.

No distinctive shared analytics identifier, support mailbox, private-service hostname or owner record was found across the three publishers in the inspected material. These observations are current snapshots, not a historical DNS reconstruction or proof that no undisclosed relationship exists.

Current domain-service footprint; shared commercial infrastructure is weak attribution

Publisher / domain	Web/DNS footprint	Mail footprint
FireX · ebrowser.eedon.cn / eedon.cn	Vercel front end; Cloudflare DNS meadow/wells	Aliyun enterprise mail
Chomax · qiya20.github.io	GitHub Pages	Public Qiya support channel; no shared cross-publisher mailbox established
Chomax legacy · shrekcc.top	Vercel; AliDNS dns13/dns14	No domain MX; published Outlook contact
Hub · corechang.org	Cloudflare dorthy/ganz	Cloudflare routing
Hub embedded service · techsgemini.com	Cloudflare hattie/buck	Zoho mail

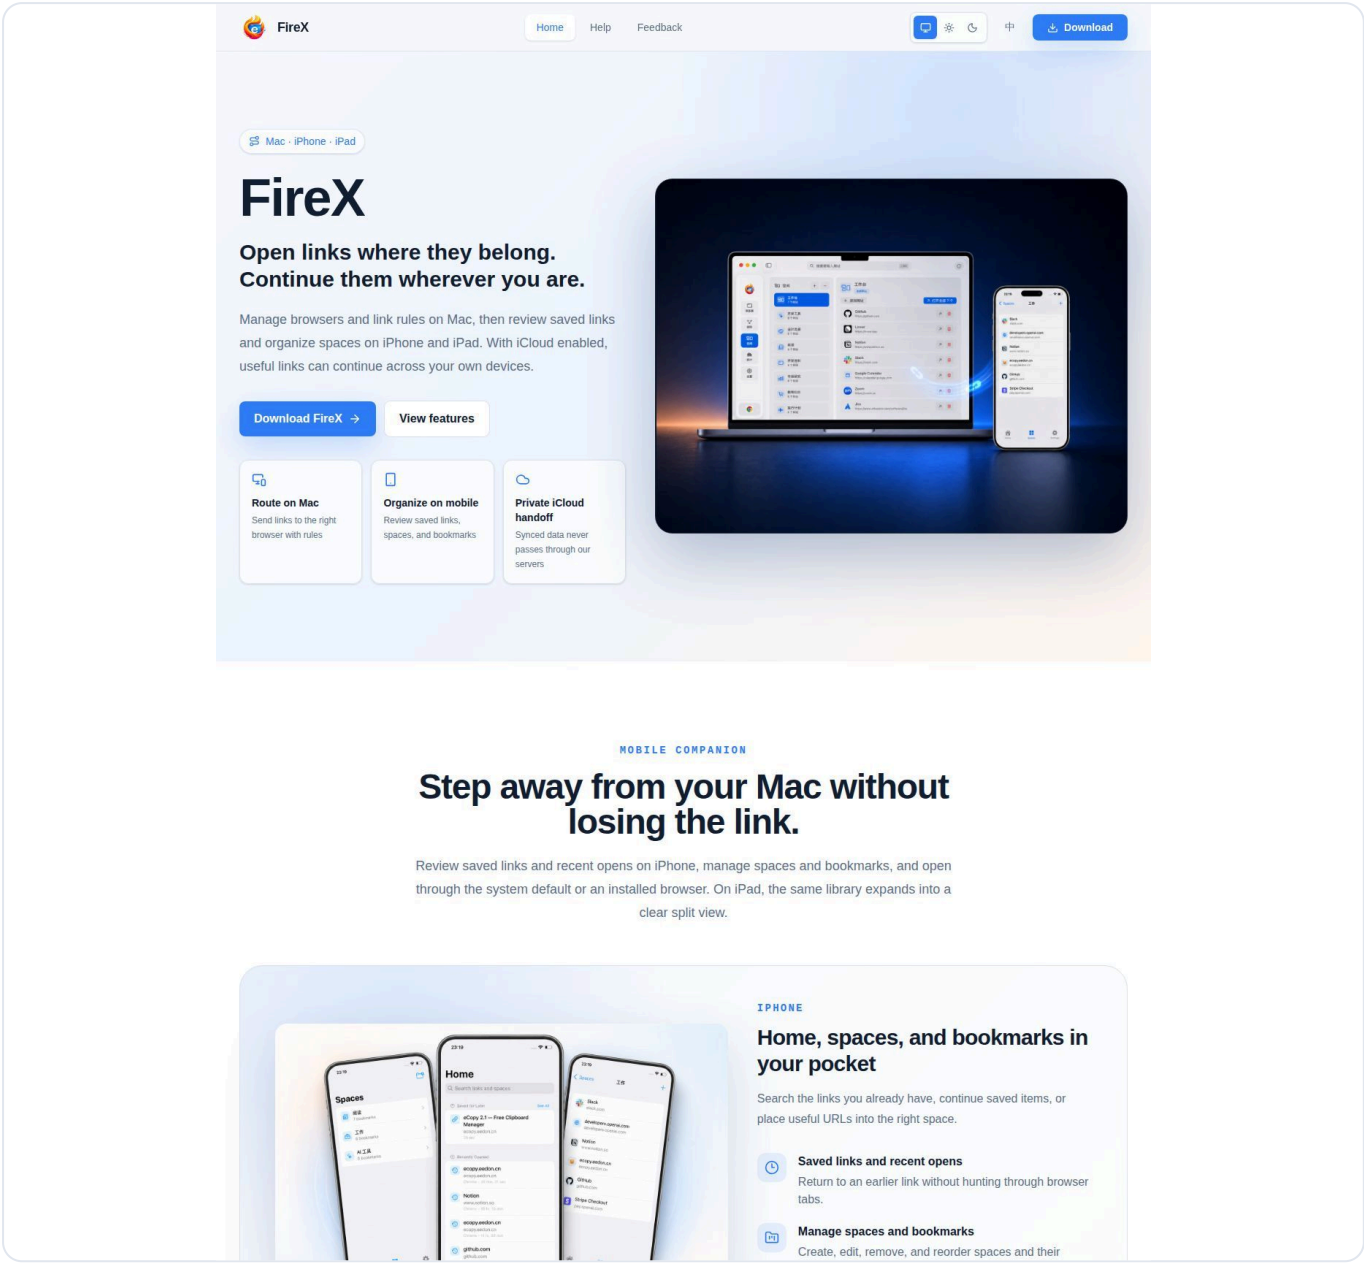

E7/E13–E16/E19/E20. No probing behind the CDN, login, purchase or authenticated API access was performed.

A real utility and a working policy do not resolve the branding complaint

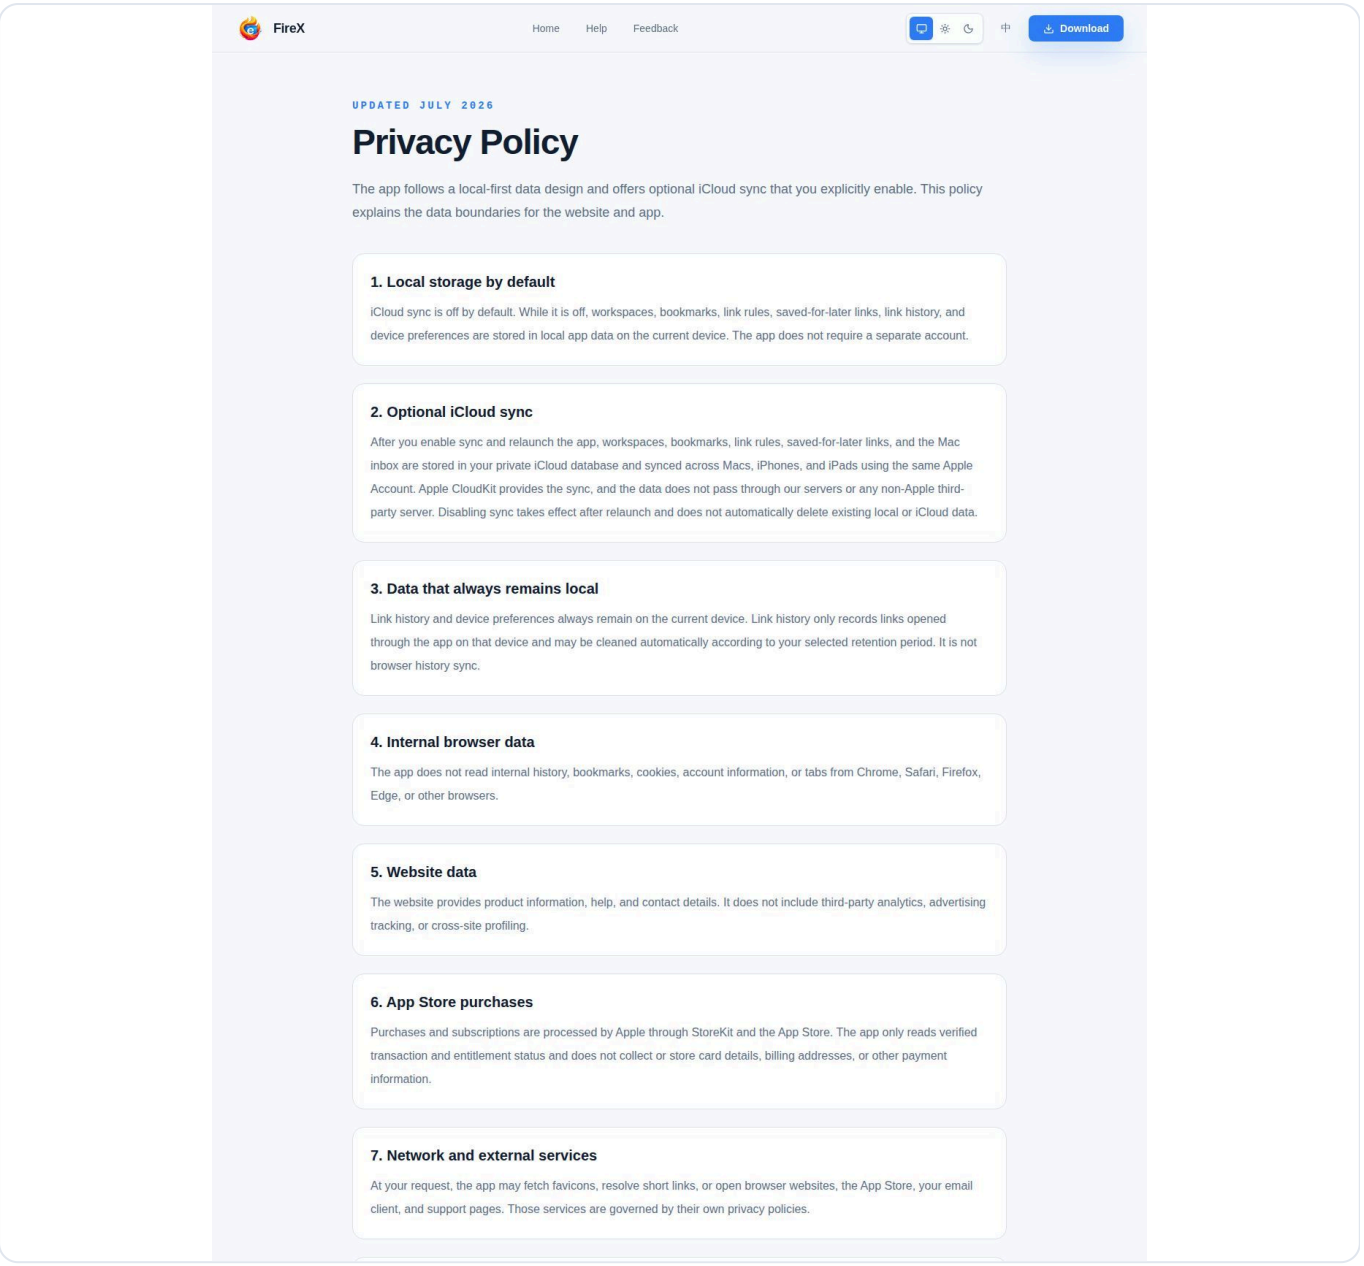

The FireX description and compiled eBrowser service types are consistent with a link-routing/workspace utility. Its CloudKit entitlement names iCloud.com.eedon.ebrowser, and its policy describes optional private iCloud synchronisation with local link history. These are internally coherent design indicators, not proof that the runtime obeys every privacy promise.

The support website is a client-rendered application. Homepage and privacy URLs return the same small HTML shell, but the linked public JavaScript contains the privacy route and substantive English policy text. It would be inaccurate to label the privacy link empty or fake merely because an HTML-only extractor sees the same response.

The source-native website and privacy captures supplied with the dossier are reproduced below. The website presents FireX as a link manager, which should help an informed visitor distinguish it. The consumer concern is that browser-seeking buyers encounter a Firefox-facing name/icon before they reach or understand that explanation.

Original website capture embedded in supplied dossier page 16, captured 12 November 2026 at 06:00 UTC. This is source evidence, not a freshly generated browser screenshot. E1.

Original privacy capture embedded in supplied dossier page 19, captured 12 November 2026 at 06:00 UTC. E1/E7.

E1 pages 16–20; E2/E7/E11/E20. No runtime privacy or security audit was performed.

Apple should examine the product identity before another mistaken purchase

Apple has an actionable set of evidence: the current Mac artwork, the Firefox-oriented Chinese title, the actual link-manager description, public wrong-product review accounts and paid Pro offers. It should assess the whole search-to-purchase presentation and require clear differentiation from Mozilla Firefox wherever users encounter this app.

Mozilla's trademark guidance addresses confusing affiliation and unauthorized brand presentation; Apple's accurate-metadata, copycat and intellectual-property rules are relevant review standards. No Mozilla licence or enforcement notice was established, and this report does not claim a judicial infringement verdict.

The same-person allegation remains unproved after a substantive static test. Apple can investigate the misleading presentation without relying on an unsupported secret-owner claim. Separately, the precise Chomax–BrowserHub code-origin lead and Hub's service/support discrepancy merit developer explanations and further evidence.

Review requests grounded in the observed record

Issue	Evidence	Requested examination
Firefox-facing identity versus separate utility	Mac artwork, Chinese title, review accounts	Review name, icon, search preview and first-run explanation together
Unexpected payment complaints	Public review records and Pro plans	Check product identity and purchase disclosure before payment
Non-trader declaration under a company identity	DE/IE provider panels; CN company identifier	Review the accuracy of provider/trader status
Chomax software-origin lead	Exact BrowserHub bundle-ID residue and old Shrek URLs	Clarify code ownership/licensing/transfer history
Hub service and support footprint	AI host/model symbols and non-resolving embedded support domain	Explain processing/provider path and update support contact
Hub's linked service and policy gap	Exact AI host, registration fields, Luminote disclosures and incomplete terms	Identify backend operator, app-specific retention/subprocessors, and the source/account relationship

Mozilla trademark guidance Apple App Review Guidelines Get official Firefox for desktop

E1–E31. Editorial misleading-presentation assessment; shared service use is distinguished from a proven controlling person, app transfer or account ban.

▼ View the dates and timeline

2022-11-10

BrowserHub’s Apple first-release field

The separate BrowserHub product uses bundle com.shrek.hidesktop. This predates Chomax, but does not by itself establish a transfer or common owner.

2026-07-10

FireX’s version history begins

Apple’s Mac history lists version 1.0. No initial harmless icon or later deliberate review-evasion event was established.

2026-08-20

FireX Mac 2.1.4

Mac storefront version agrees with the supplied FireX bundle; the mobile lookup returns a different version.

2026-09-23

A reviewer associates the purchase with Firefox

UTC conversion of the US review labelled Was fre…; the original feed timestamp is 23 September at 10:44 in UTC−07:00.

2026-10-29

German review describes search-to-payment confusion

The reviewer says the similar-looking app appeared when searching for Firefox and asked for payment after opening. Search placement was not independently recreated.

2026-11-12

Three-archive static comparison and fresh public-source checks

Original ZIP hashes, signature verification, identifiers, ARM64 functions, resources, policies, company disclosures and DNS/mail observations retained privately.

CHECK THE SOURCES

The records behind this report.

The complete 20-page supplied FireX dossier and the complete six-page supplied Hub dossier follow this authored investigation in the PDF. Fresh Apple pages, review feeds, the exact Mac bundles, publisher/service sites and DNS/CT observations support the added analysis. Indexed historical Apple text is labelled separately from fresh live checks. Native source captures and newly typeset extracts remain distinguishable. The apps were not launched, no AI credentials or API operations were used, no purchase was made and no developer contacted.

▼ Open source files, archive links and checksums

E1 / Complete supplied FireX dossier: 20 pages

Captured 12 November 2026, 06:00:11 UTC. The full dossier is appended to the downloadable investigation. Source-native captures and platform-specific descriptions remain distinguishable from newly authored evidence extracts.

SHA-256: 14117a60fce36c77510615f6094502ddee61aa6569cf6bf794c14de7f563e2a3

E2 / FireX US Mac product page

Primary Mac presentation, description, current artwork, eight Mac promotions and in-app purchases. The Mac page is selected explicitly; the general software lookup returns the mobile version. Checked 2026-11-12T07:31:46.483158+00:00; HTTP 200.

Open source ↗

SHA-256: 27d8b4809d9c54247510a03e55e379635608f9f82bced6e01f4998f5d95d735e

E3 / FireX German and Irish provider panels

Both DE and IE pages returned 200; both say the provider has not identified itself as a trader. IE check also retained. This is a platform disclosure, not an adjudication of trader-law compliance. Checked 2026-11-12T07:31:46.559883+00:00; HTTP 200.

Open source ↗

SHA-256: e45c54aa51a609e78e69c510a4d7d86b2c4909542f3de24a155d087579b90604

E4 / FireX Chinese name and company identifier

Exact numeric app ID 6785028233. Title: FireX - 火狐浏览器管家. Provider: 长沙绎动科技有限公司. Unified Social Credit Code: 91430104MAEW8TMA6R. These fields are from the primary product panel, excluding recommendation metadata. Checked 2026-11-12T07:33:52.333181+00:00; HTTP 200.

Open source ↗

E11 / Supplied signed Mac bundle: FireX.app

Input archive FireX.zip. Bundle com.eedon.ebrowser; version 2.1.4; Team ID YBR8C2DFJD. Read-only codesign verification passed; the application was not launched. SHA-256 identifies the original ZIP.

SHA-256: 082f24ab47d4cf64da97bef8abc3545d6d42cb558c028542b246a105d3d9703d

E12 / Supplied signed Mac bundle: Opener App.app

Input archive Opener App.zip. Bundle com.corechang.openurl; version 1.3.4; Team ID 7456J78M9Q. Read-only codesign verification passed; the application was not launched. SHA-256 identifies the original ZIP.

SHA-256: 5ae6f6e2d081302988f447bdd6ba5f2c802020339e980c678cf6ba7b09e7a053

E13 / Pairwise static comparison of the three supplied binaries

All non-AppleDouble bundle files hashed. Mach-O ARM64 function boundaries decoded from LC_FUNCTION_STARTS; exact function hashes compared for functions at least 64 bytes. Universal CPU slices, bundle identities, entitlements, resource catalogs, linked libraries and embedded text inspected. Full private results retained; proprietary code, receipts and raw credentials are not distributed.

SHA-256: 469317e2ba51dffffadbdc77ae108af669f9dee503637abb8acf1d9777c089b9

E14 / Chomax embedded identifier resolves to BrowserHub

Chomax contains com.shrek.hidesktop and shrekcc.top policy URL templates. Exact bundle-ID Apple lookup returns BrowserHub, app 6444289725, developer 1506537013, artist Yuuan Ltd, seller Hangzhou Yuuan Technology Co., Ltd. The BrowserHub US page agrees on the seller and uses shrek copyright. This is an origin/reuse lead, not a proven common owner. Checked 2026-11-12T07:36:16.586453+00:00; HTTP 200.

Open source ↗

SHA-256: 7c60ac9eab7c9a11437607f9d306ed28cb892c7cf04c29de1bbaeee76ad50b90

E15 / Hub AI-service footprint and public endpoint

Supplied Opener App bundle matches com.corechang.openurl, the Hub for Chrome identifier. Embedded host chat.techsgemini.com, model google/gemini-2.5-flash and SiteAIAnalyzer/SiteAnalyzer fields recorded. A public unauthenticated root GET returned 401; no credentials were supplied and no API operation was invoked. corechang.com returned DNS NXDOMAIN; current published support uses corechang.org. Checked 2026-11-12T07:31:47.658710+00:00; HTTP 401.

Open source ↗

SHA-256: 6b4f44c29c8f75ec3df668e3c33085a3bc76d99c5c83b64b308d1d2c60fd4f0c

E16 / Current DNS, mail and registry observations

Google Public DNS queries for A/AAAA/CNAME/MX/NS/TXT retained with check times. eedon.cn uses Aliyun mail and Cloudflare DNS; its web front end points to Vercel. corechang.org uses a different Cloudflare NS pair and Cloudflare mail routing. techsgemini.com uses another NS pair and Zoho mail. shrekcc.top uses AliDNS and Vercel. Shared service providers do not identify a common customer. CN RDAP failed; no registrar or beneficial owner is invented for eedon.cn.

SHA-256: 4417c1c358af148a5cc0724e73829efdb61f9649f1c2049b3ec0d396a5fbd705

E17 / Mozilla trademark guidance

Guidance addresses confusing affiliation and unauthorized branding. Referenced as a compliance standard for review, not as a finding that Mozilla has adjudicated this product. Checked 2026-11-12T07:33:52.579118+00:00; HTTP 200.

Open source ↗

SHA-256: 3ca1953a9fdc191306a52e8af00b308aa2549f435e803781d2017480c1418a97

E18 / Earlier Chrome look-alike investigation

Previously published branding and buyer-confusion evidence for Chomax and Hub. The present case adds the supplied binaries; Open App by Innovatech is a different product and is not one of these three input archives.

Open source ↗

E19 / BrowserHub and the Yuuan account

BrowserHub app 6444289725; seller Hangzhou Yuuan Technology Co., Ltd; current lookup version 2.3.1. The all-platform catalog returns 20 products. No infringement or fraud finding is made about that whole portfolio. Checked 2026-11-12T07:37:57.806930+00:00; HTTP 200.

Open source ↗

SHA-256: 35a55ff08c433e06f31d605ce3e5f247bab4ca9aaab9c63a1b2a6b7c452aee5a

E20 / Eedon corporate website application bundle

Public client bundle describes Changsha Eedon Technology Co., Ltd / 长沙绎动科技有限公司 as a cross-platform developer in Changsha, founded in 2025; support@eedon.cn. Website statement, not an official company-register extract. Checked 2026-11-12T07:33:50.980685+00:00; HTTP 200.

Open source ↗

SHA-256: 793f2bfc283e1bdac1dac8a5b66f0e64c8cd12088241c6d00dac82057c77d584

E21 / Fresh exact-ID Apple mapping: BrowserHub and Yuuan seller

HTTP 200, checked 2026-11-12T07:55:27.616639+00:00. Original JSON maps com.shrek.hidesktop to BrowserHub 6444289725, artist Yuuan Ltd (1506537013), seller Hangzhou Yuuan Technology Co., Ltd. Selected original fields are reproduced in the labelled evidence image. The checksum identifies the original response.

SHA-256: a3fc76ff1bf76238fd598700a1dc38efcbc5ce8d2287bca76b51d99ed371f8bd

E22 / Exact byte offsets for BrowserHub and Shrek literals in Chomax

Original supplied Chomax executable SHA-256 below. com.shrek.hidesktop occurs at file offsets 0x74a40 and 0x114c42. The legacy privacy template occurs at 0x75475 and 0x115677; terms at 0x754c7 and 0x1156c9. The current Qiya privacy URL also occurs in the same file. Read-only extraction; no application execution. See the labelled evidence image.

SHA-256: b4e69ee5bb897740ce93e3407afee6c032ca05dae0def356884dee596d6876e8

E23 / Fresh Hub listing, label, promotions and linked policy

Current product is Hub for Chrome, while the description and supplied executable use Opener App / AILink identities. Three Mac promotions and the Data Not Collected label checked; two original promotions reproduced. Fresh corechang.org home/privacy/terms retained. Policy names Yuchang Zhou and general data categories but not techsgemini or a concrete AI link-content processing path. No review entries were obtained in the checked US feed. Checked 2026-11-12T08:06:59.808337+00:00; HTTP 200.

Open source ↗

SHA-256: a893fab71e1a0c26bcd7b929c2ab6333371c62658c35557eec8e06467e6734b0

E24 / Luminote service-site privacy disclosure

Policy effective 24 April 2026 describes persistent device identifiers, backend-issued user keys, AI requests and forwarding via chat.techsgemini.com. Its operator contact is support@techsgemini.com; no named legal entity identifies the backend operator. These are Luminote-site statements, not automatically the terms or measured behaviour of Hub. Checked 2026-11-12T08:06:59.411802+00:00; HTTP 200.

Open source ↗

SHA-256: fdd38f6a2a464ce4f37c927bfa23502c683406817a3bd74cea2fd753ec9d1910

E25 / Luminote terms retain unfinished operator/jurisdiction fields

The page identifies Luminote and describes registration/model loading/AI request forwarding. Section 10 keeps [Your jurisdiction] and [Your venue] with instructions to replace the section before publishing. No legal jurisdiction is inferred from these unfilled fields. A separate home-page call to replace the app download-button target is also retained. Checked 2026-11-12T08:06:59.092897+00:00; HTTP 200.

Open source ↗

SHA-256: 2c5c9b48cd42d1cd8fc3d2ff9e2116e20d570774a547a36ccc2f2dc9a346c602

E26 / Indexed Apple GmiX record associates the same support domain with another publisher

Search-indexed primary Apple listing retrieved 12 November 2026 names GmiX - AI Assistant, app 6764471681, provider TechSphere Creations LLC, support@techsgemini.com and copyright Rodney Morgan. This is indexed historical material, not a fresh live listing or recovered Wayback capture. Exact transcription retained privately with scope labels; an AppAgg result separately corroborates the support-domain trail. Fresh live checks are recorded separately in E27.

Open source ↗

E27 / GmiX current unavailability in checked storefronts

Fresh GmiX product requests returned HTTP 404 in US, DE, IE and CL. Exact-ID lookups returned resultCount 0 in US, DE and IE. A separate indexed Join Teams Meetings record (6746640556) also names TechSphere; its checked DE page returned 404 and US lookup no result. These observations do not prove Apple banned either account or identify the removal reason. Checked 2026-11-12T08:06:58.933287+00:00; HTTP 404.

Open source ↗

SHA-256: 120a307f868f3276b56dabfbd5f107d1b1426b6436a15fbc8d4311160881e416

E28 / Hub ARM64 service references and registration-related fields

Read-only disassembly of the supplied Opener App executable: ARM64 instructions at 0x100005484 and 0x1000056c0 reference https://chat.techsgemini.com; 0x100009d5c references google/gemini-2.5-flash. Embedded types/fields include AppCredentialManager, SiteAIAnalyzer, ailink_device_identifier and accessToken. This is compiled-code evidence, not a runtime packet capture. No credentials or authenticated requests were used.

SHA-256: 5354b5a310bede477739a80b66c8b6691e14e5e67dbceabac16ad2f9124c3214

E29 / Complete original six-page Hub dossier

Supplied by the reporter earlier in the same investigation. All six source pages are now appended after the complete 20-page FireX source; original source preserved privately. Provider, public listing identity, original promotions and AI-analysis claims. Checksum identifies the original supplied Hub PDF.

SHA-256: b7f2316deb2486b5297ee21c8512860ee64804a04ef7c1cf7f500d1f9f98bb0c

E30 / Apple definition of data collection for privacy labels

Apple requires disclosures for integrated third-party practices and defines label collection in relation to off-device access retained beyond servicing a request in real time. Remote request processing alone is therefore not treated as conclusive proof of a false Data Not Collected label. Checked 2026-11-12T08:12:10.574125+00:00; HTTP 200.

Open source ↗

SHA-256: b39771cf9c5f719adb45d36f549052f86edd1cb39d72209ee1208c3d2a1edf4a

E31 / Certificate transparency and negative identity leads

CT results for techsgemini.com and corechang.org expose only their own wildcard/apex names, not a common certificate connecting their owners. Nameserver pairs differ. A same-spelling GitHub corechang profile has no public identifying fields or repositories and was not attributed to the publisher. AppAgg live pages presented verification screens; they were not bypassed. Techscreation.com home/legal reads returned 522 origin-timeout errors, which are not an account-ban finding. Checked 2026-11-12T08:07:00.299833+00:00; HTTP 200.

Open source ↗

SHA-256: 736353b4e62547e554312353977ae63da85edfca477be9b666ec90c3a10c8aac

E32 / Fresh availability checks for two TechSphere products

12 November 2026, 08:33 UTC. Join Teams Meetings 6746640556 and GmiX 6764471681 returned 404 in US/DE/IE. Combined exact-ID lookups returned resultCount 0 in each storefront. This establishes checked listing unavailability, not an enforcement initiator, reason or date. Original response hashes retained privately.

Open source ↗

SHA-256: 7f5ce663b726607eae2fde2a6dc438052ac0d1681e636de7cc3377c0bb77e047

E33 / Reporter account of TechSphere fraud-related termination

In this investigation the reporter says Apple terminated TechSphere Creations LLC for fraud a few weeks earlier. No Apple notice or independently verifiable termination date was supplied. This is attributed testimony, separate from fresh listing/API availability evidence.

E34 / Fresh Open App seller, identifier and Innovatech business disclosure

Fresh page and exact-ID lookup identify Open App for Chrome & Safari, seller Innovatech Solutions LLC and com.innovatech.tabs. DE trader record lists DUNS 119518315 and admin@innovatechsolu.com. Distinct from Hub / Opener App. Retrieved 12 November 2026; full status and hashes retained privately.

Open source ↗

SHA-256: 8b1a7d56652400fad55fe780b5da43480e438e8d9c5091caf41e29baccfe417b

E35 / TechSphere-Innovatech DNS, mail and registrar comparison

Fresh RDAP/DNS for techscreation.com, techsgemini.com, innovatechsolu.com, ideanestinc.com and appvance.org. All use Cloudflare Registrar, with different authoritative nameserver pairs. TechSphere company domain and Innovatech share generic Cloudflare mail routing; techsgemini and other domains use separate Zoho verification values. No distinct common operator identifier recovered. techscreation home/privacy/terms returned 522, limiting fresh page-code inspection.

Open source ↗

SHA-256: 18d3f577f91344c4877b3a0f5a1d1a39241ddfd0d66cf5b837b080ef08c5df0c

E36 / Targeted Innovatech executable rescan and Hub/Open App code comparison

Original supplied Open App 1.6.4 build 114, com.innovatech.tabs, Team FR7MAHZ2V8. Targeted strings found no TechSphere/techsgemini/corechang domains or Hub-specific identifiers. ARM64 LC_FUNCTION_STARTS comparison of Hub and Open App found 28 exact bodies >=64 bytes; the largest 636-byte shared routine parses an optionally signed numeric string. Generic/helper overlap is not attributed to common account control. Proprietary binaries, raw strings and receipts remain private. No GmiX binary was available. Checksum identifies the Open App executable.

SHA-256: 4d886addb2b67dd90239fc50220c3a5a4a66368c20f8b8002d72a14b3e123094

E37 / Supplied TechSphere formation, annual report and agent-change filings

Three supplied PDF packets; eight pages. Filing 2025-001612990. Formation 13 Feb 2025; annual report 16805641 signed JUAN XU on 29 Mar 2026, email info@acompanyinus.com, address 75 E 3rd St. Agent-change amendment 2026-006556710 filed 29 Apr 2026, 10:36 AM; Dustin Looper/support@wycra.com. All original pages appended. Supplied copies visually checked, not independently retrieved from the protected registry. Checksum below identifies the one-page annual-report PDF; all three original hashes retained privately.

SHA-256: 360b7fbf339c1572b9294a05bb2a30a340159ab9cfc77542d0871556b25a694d

E38 / Previously supplied Innovatech and IdeaNest Wyoming documents

Six original packets, sixteen pages, examined in the earlier investigation. Innovatech 2025-001677371 and IdeaNest 2025-001713988 share info@acompanyinus.com, 75 E 3rd St, original provider Registered Agents Inc/Robin Jones and later WY Commercial Registered Agent LLC/Dustin Looper. Annual signer jiesong hu differs from IdeaNest Director/President QIONGXIANG YU. Two original annual-report pages reproduced for direct comparison.

Open source ↗

E39 / Reporter registry transcription and limits of fresh official access

The reporter transcribed TechSphere 2025-001612990 as Active/Current in Wyoming, formed 13 Feb 2025, with principal/mailing address 75 E 3rd St and current agent WY Commercial Registered Agent LLC. AR 16805641/2026 and $60 licence tax were also transcribed and match the supplied annual report. Fresh official portal and existing Filing Details links presented human-verification forms; no challenge was bypassed. Source documents, exact match and public provider-role context support an administration association, not a common-owner finding.

Open source ↗

E40 / Dated US Mac chart records: page and public feeds

Retrieved 12 November 2026. Open App 6748339444 is explicit rank 13 on the Apple Free page and position 13 in RSS. FireX 6785028233 is the 46th of 98 returned RSS entries. Page parser recovered 24 Free rank rows and 25 Paid rank rows. Paid/grossing RSS feeds returned no entries; grossing page 404. No download count or monetary revenue is inferred. Earlier 10 Nov record placed Open App at No. 10.

Open source ↗

SHA-256: 384ef807f6a559415b7e81c8a0c52dd0488f60c51b01a76a9a4abbb00c93de91

E41 / Exact-publisher US catalogs and 39 app-specific page checks

Fresh all-platform software catalogs for Innovatech 1821609828, IdeaNest 1840069799, AppVance 1775331516, Qunying Liao 1679470459, yuchang zhou 1841641565, Yuuan 1506537013 and Eedon 6778356952. Combined with five exact-ID historical products: 39 distinct IDs, 34 US pages 200 and five 404. TechSphere OneDrive/Dropbox secondary names remain unresolved IDs, not invented products in the count. Full per-source times and hashes retained privately. No catalog-wide fraud allegation.

Open source ↗

SHA-256: 6b0205d2f4ca0831ec636cf2f85873ae435c4c9ffcf7aad8d7fafe832e64d321

E42 / Revenue evidence limits and exclusion of unrelated company estimates

Appfigures describes iOS/Android competitor estimates and separately documents beta Mac Keyword Inspector. Fresh chart pages returned access/verification errors, not numeric app estimates. Sensor Tower public material examined did not supply values for these Mac IDs. Komori advertises Mac estimates, but no app-specific result or reviewed estimation model was obtained and its checked page was inaccessible. An Innovatech North Carolina directory revenue estimate belongs to innovatechnc.com and is excluded. No verified dollar aggregate found; $3M/year is a reporter-proposed hypothetical scenario only.

Open source ↗

E43 / IdeaNest availability after publication of the AppVance link

Earlier dated sources: 9 Nov AppVance-IdeaNest report and positive pre-publication lookup; 10 Nov about 17:02 UTC, three-storefront product 404 and empty checked catalog. Fresh 12 Nov exact-ID queries in US/DE/IE return no match and the US all-platform catalog has no software. Sequence is observed; cause, global account termination and reason are not independently established.

Open source ↗

SHA-256: 7f5ce663b726607eae2fde2a6dc438052ac0d1681e636de7cc3377c0bb77e047

E44 / Exact IdeaNest-AppVance support and historical product trail

Previously supplied kj.gapps executable contains customercare@appvance.org and exact legacy Blogspot legal URLs shared with AppVance pages. Historical exact-bundle vendor record names AppVance; 16 Nov 2025 Apple archive already names IdeaNest. Full prior source analysis remains linked. A change after the reported 2026 ban is not established. Original IdeaNest build executable checksum below.

Open source ↗

SHA-256: e976059ff829eb24cee65f2a172d07eb332fc54108922ebfc12e31d8b8caf5b1

E45 / Reporter descriptions of suspensions and proposed financial scale

The reporter describes TechSphere, AppVance and IdeaNest as fraud-related account suspensions and estimates approximately US$3M/year across the analysed accounts, invoking Top Grossing and app-count considerations. This is attributed to the reporter. The inspected independent Apple records establish dated Free-chart positions, prices and checked availability. Individual app revenue is unquantified; the scale examples use hypothetical arithmetic.

E46 / Apple account lookup key and rechecked TechSphere app status

12 November 2026, 09:18 UTC: exact combined lookups for Teams 6746640556 and GmiX 6764471681 return resultCount 0 in US, DE and IE, corroborating the earlier product-page 404 checks. Diagram labels these products Currently removed in the tested storefronts, not a proven reason for account termination. Seven numeric Apple Developer IDs are drawn from retained exact-catalog/identity records; TechSphere numeric Developer ID remains unrecovered and is not invented. Signed Team IDs are limited to the original supplied builds.

Open source ↗

What's New (Mac)

Performance optimization and known issue fixes

Description (Mac)

A browser manager and link router designed for macOS.

Set this app as your system link handler, then let it open each link in the right browser. Use Chrome for work, Safari for private browsing, Firefox for testing, or any browser you prefer.

=== Features ===

Smart Link Rules
Route links by website, path, keyword, regular expression, or source app.

Default Browser Control
Choose the browser used when no rule matches. You can also ask every time, ask only when Option is pressed, or save the link for later.

Workspaces
Group frequently used websites by context, such as Work, Reading, Design, or Developer Resources. Open one link or the whole workspace at once.

Global Search
Search or open a URL from a global shortcut. Pick the browser and search engine before opening.

History and Statistics
View links opened through the app, recent activity, frequently visited sites, browser usage, and 7-day or 30-day summaries.

Browser Management
Scan installed browsers, check running and default status, open browsers, hide unwanted items, and discover more browsers from the built-in catalog.

Cleaner Links
Optionally remove tracking parameters and resolve short links before routing.

Data Control
Export, import, or clear app data when needed, and choose how long link history is retained.

iCloud Sync
Optionally enable sync in Settings. After relaunching the app, workspaces, bookmarks, link rules, and saved-for-later links sync through your private iCloud database to other Macs using the same Apple Account. Link history and device preferences remain local.

Menu Bar Access
Open the main window, switch browsers, launch workspace links, and handle saved-for-later links from the menu bar.

=== Privacy ===

The app only records links opened through it. It does not read browser history, bookmarks, cookies, or tabs from other browsers.

By default, your data stays on your Mac. If you enable iCloud sync, only workspaces, bookmarks, link rules, and saved-for-later links are stored in your private iCloud database and synced to other Macs using the same Apple Account. Link history and device preferences remain local. Synced data does not pass through our servers or any third-party server.

The app has no ads, no third-party analytics, and no separate app account requirement.

Network access is only used for features you choose, such as favicons, short-link resolution, browser websites, or support pages.

=== Pro and In-App Purchases ===

The free version includes essential features. Pro unlocks the complete feature set and is available as a monthly subscription, yearly subscription, or one-time lifetime purchase. Every plan unlocks the same Pro features.

Monthly and yearly subscriptions renew automatically. Payment is charged to your Apple Account after purchase confirmation. You can manage or cancel subscriptions at any time in your App Store account settings. The lifetime plan is a one-time purchase and does not renew. No free trial is offered. Eligible purchases can be restored with Restore Purchases.

Mac (8)

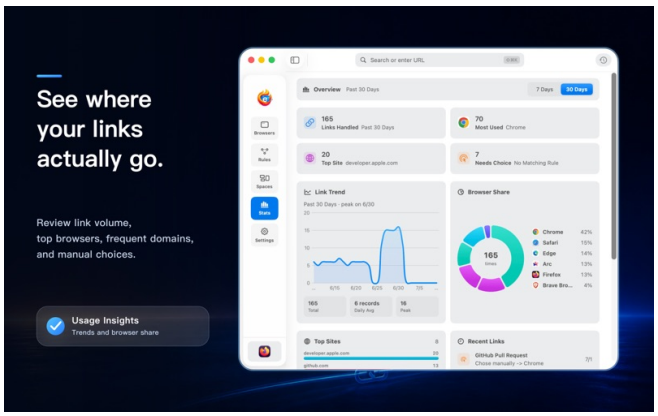

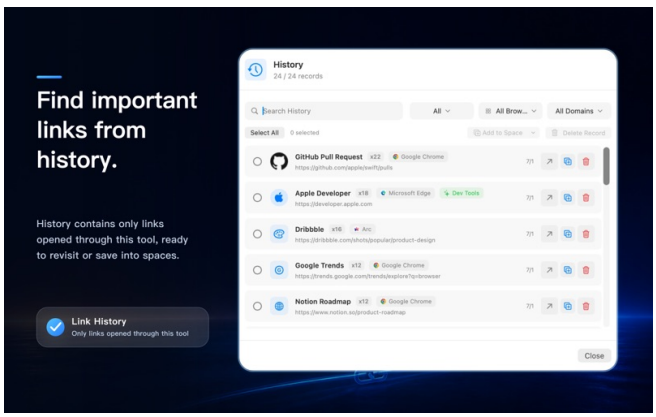

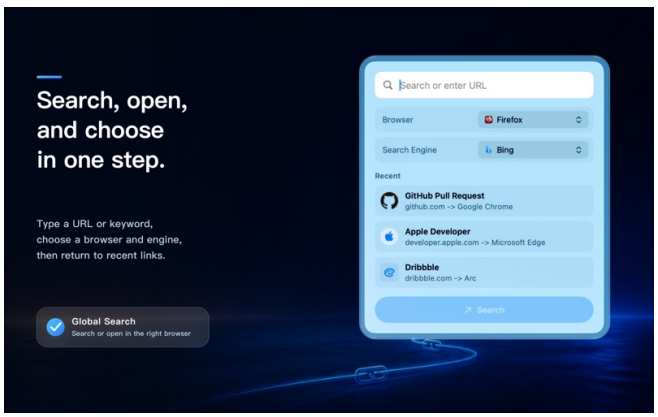

Description

A link manager that connects your Mac, iPhone, and iPad. View and organize spaces, bookmarks, and saved links on mobile, choose the right browser for each webpage, and send important links to your Mac for continued work.

=== Home and Search ===

See saved-for-later links, recently opened pages, and recent bookmarks together on Home.

Search spaces, bookmarks, saved links, and history from the current device. Basic search is free. Pro adds filters for type, space, and time range.

=== Spaces and Bookmarks ===

Create separate spaces for work, reading, learning, or frequently used tools.

Add, edit, remove, and reorder spaces and bookmarks. Website icons help you recognize useful pages at a glance.

=== Choose a Browser ===

Open a link with the system default browser, or choose a supported browser installed on the device, including Chrome, Firefox, Edge, Brave, and Arc Search.

You can remember a browser preference for the current device. Mobile browser selection does not run the link rules configured on your Mac.

=== Save from Another Browser ===

Choose this app from the system share sheet in Safari, Chrome, or another browser to save the current webpage for later.

You can then open it, organize it into a space, send it to your Mac, or delete it when it is no longer needed.

=== Mac Inbox ===

Send saved links, bookmarks, recent opens, or search results to the Mac inbox.

Your Mac opens the webpage using its existing link rules. After the item is opened, bookmarked, or deleted successfully, iCloud removes it from the inbox on your other devices.

=== iCloud Sync ===

iCloud sync is off by default. You can enable it in Settings, and the change applies after relaunching the app.

Spaces, bookmarks, saved-for-later links, and the Mac inbox sync through your private iCloud database to devices using the same Apple Account. Synced data does not pass through our servers or any third-party server.

Link history, browser preferences, language, theme, and other device settings always remain on the current device.

=== Pro Features ===

The free version includes basic search, space and bookmark management, and single-item opening, organizing, sending to Mac, and deletion.

Pro adds advanced search filters, batch organization into a space, batch sending to Mac, and batch deletion. Monthly, yearly, and lifetime plans unlock the same Pro features.

=== Privacy ===

The app does not read history, bookmarks, cookies, or tabs from other browsers. It contains no ads and uses no third-party analytics.

Network access only occurs for features you choose, such as syncing data, fetching website icons, opening webpages, or restoring purchases.

User reviews mentioning possible fraud or deception (7)

Deception
1/5 stars · 2026-10-29 · Aggie Hiker · US App Store
This is not Firefox or a version of it. If you are looking for Firefox, go to the Mozilla website. Not this. It’s deceptive. The logo proves it.
Matched terms: deceptive

Fake FireFox
1/5 stars · 2026-10-25 · Dell Lat · US App Store
Don’t install, it’s not the real Firefox. Now sure why apple allows a scam SW and not the real Firefox in the store
Matched terms: scam, fake

Scam
1/5 stars · 2026-10-24 · mero1987 · US App Store
Don’t download this scam app
Matched terms: scam

SCAM - do not pay
1/5 stars · 2026-10-15 · xedr · US App Store
Search for Mozilla Firefox in Safari - it’s a free download. These scammers are taking advantage of Apple’s App Store. Do NOT pay them!
Matched terms: scam

Fake App
1/5 stars · 2026-10-12 · Alihp55 · US App Store
Do not install, takes lots of effort to uninstall it
Matched terms: fake

Fake
1/5 stars · 2026-10-08 · U*m*a · US App Store
It's a scam. Get the official version directly from the Firefox website!
Matched terms: scam, fake

Refund?
1/5 stars · 2026-09-06 · Tiny.Pikachu2 · US App Store
I need a refund asap
Matched terms: refund

Appendix — the developer website linked from the listing as displayed

Full-page browser capture of https://ebrowser.eedon.cn, taken 2026-11-12 06:00:11 UTC. Cookie-consent overlays (the host's, not the page's content) were hidden before the capture, and Google pages were opened in English. Only the first 3 pages are shown; the whole capture is in the evidence archive.

bookmarks.

Choose a mobile browser

Use the system default or a supported browser already installed.

SYSTEM SHARING

Save a page from Safari for later.

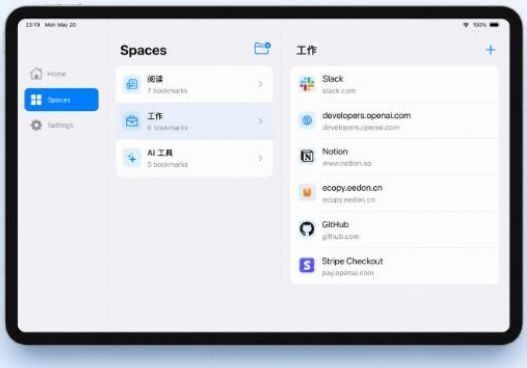

Send a webpage to FireX from the system share sheet. The main app imports it safely, ready to open, organize into a space, or send to the Mac inbox.

IPAD SPLIT VIEW

More spaces deserve more room.

Keep primary navigation, spaces, and bookmark details visible together and move through a larger library with fewer jumps.

MY BROWSERS

See your Mac browsers in one place.

The app scans apps that can handle web links and brings default targets, running state, and common actions into one focused tool.

Detect installed browsers

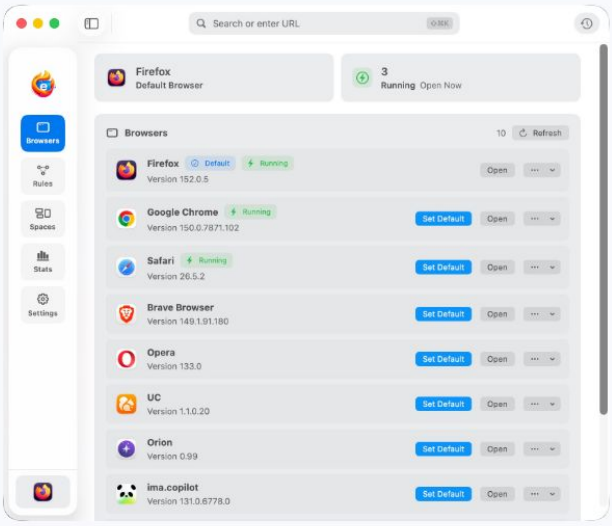

List Safari, Chrome, Edge, Firefox, Arc, and other browsers that can open web links.

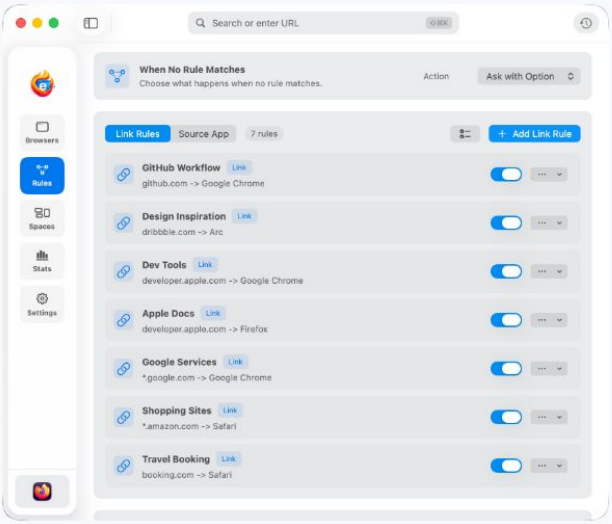

Separate handler and target

After the app receives links, unmatched links can still go to the browser target you choose.

Fast actions, fewer interruptions

Open a browser, inspect status, and locate the app through clear action levels.

LINK RULES

Keep work, development, and personal accounts apart.

Pin GitHub, Jira, YouTube, or any domain to the right browser and stop copying links by hand.

Domain and path rules
Use patterns like github.com, youtube.com/watch, or localhost to control link flow.

Built for multi-account workflows
Assign different services to different browsers so cookies and signed-in accounts stay clean.

Clear unmatched behavior
Use the default target, ask every time, ask with Option, or park the link for later.

BROWSER PICKER

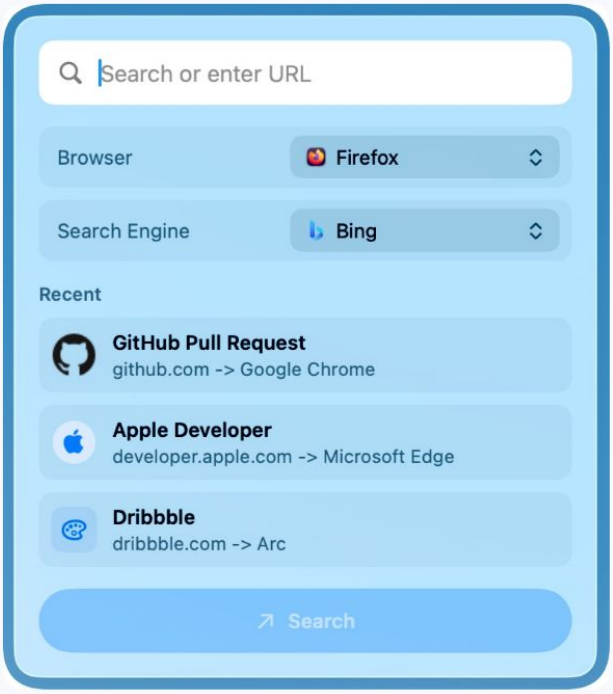

When there is no rule, keep your current work intact.

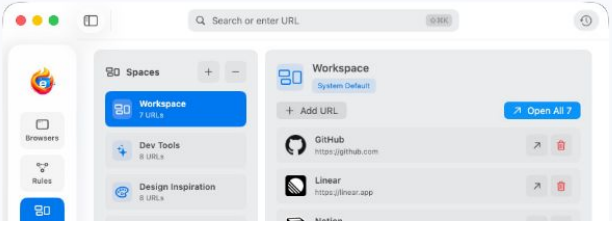

When a link enters the app, choose a browser immediately or park it for later instead of opening another tab at the wrong moment.

Choose once or remember
Open temporarily, remember the choice, or cancel from one lightweight window.

Park links for later
Store links you do not want to open right now and keep browser tab growth under control.

Only links routed through the app
History is created from the app's open actions, not from browser history databases.

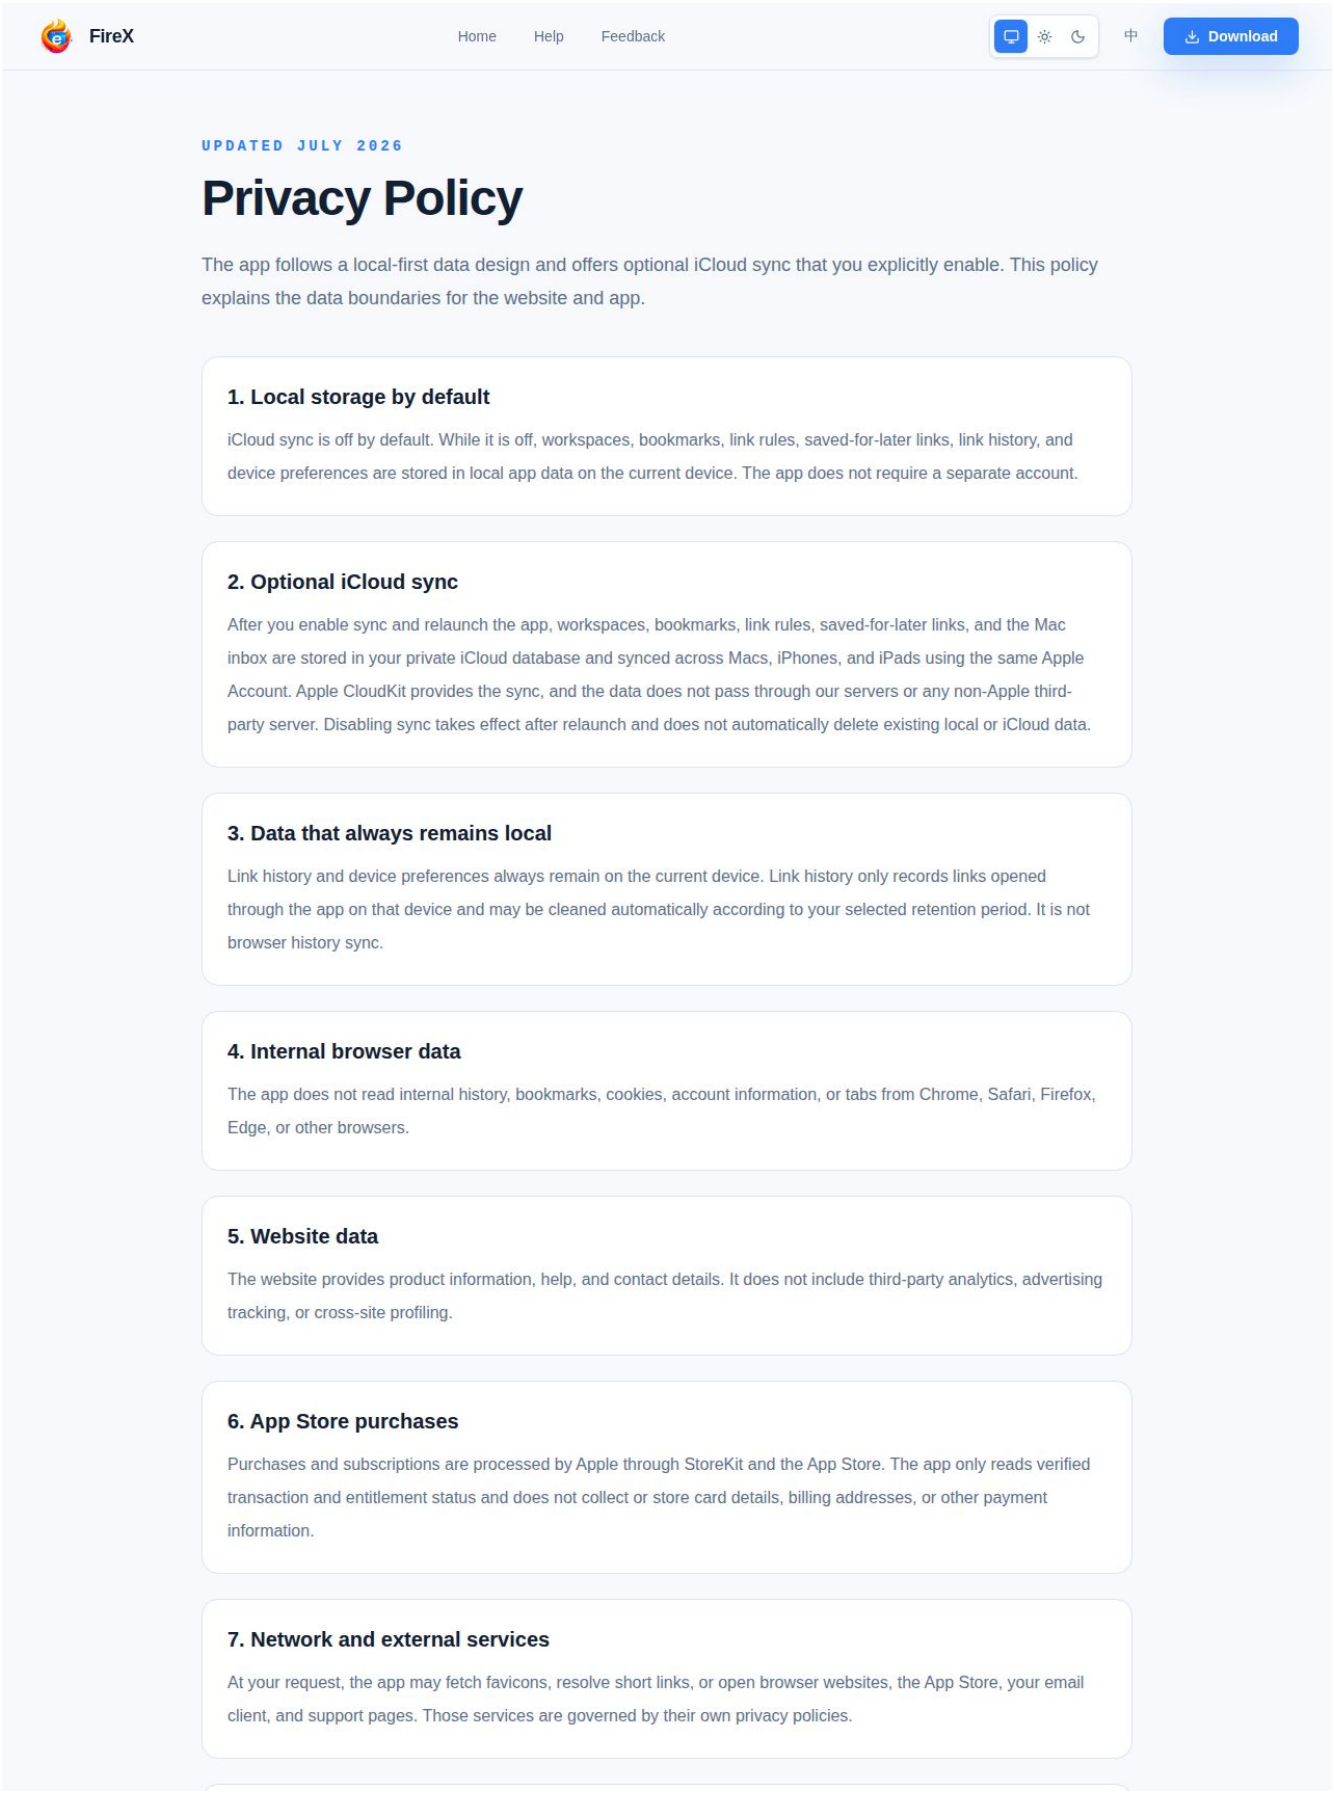

SPACES AND HISTORY

Turn link history into reusable places.

History is not browser history. It only records links opened through the app and lets you save useful URLs into spaces.

Appendix — the privacy policy linked from the listing as displayed

Description

Opener App is a smart link-opening utility for macOS. It helps you review a link before opening it, understand basic website signals, and choose the best way to open the page.

When you open a link, Opener App can collect basic website signals such as domain details, certificate status, page type, redirects, and public registration data, then use AI to provide a risk assessment. You can open links in Safari, Chrome, Edge, and other browsers, or use Clean Text Mode, a menu bar window, or a phone-sized mobile preview.

Key features:

- AI-assisted link risk assessment before opening
- Website details such as domain, site type, operator, certificate, and online history
- Open the same link with different browsers
- Clean Text Mode for distraction-reduced reading
- Menu bar window for keeping a link handy
- Mobile Preview for viewing pages in a phone-sized window
- Local history for reopening previously handled links

Opener App's analysis is informational and does not guarantee that a website is safe. For links marked as high risk, the app asks for confirmation before opening.

Opener App is useful for:

- Users who often handle unfamiliar links
- Users who switch between multiple browsers
- Readers who prefer a cleaner page view
- Developers and creators who need quick mobile webpage previews

DISCLAIMER

Opener App is an independent smart link-opening utility for macOS. It helps users review links, understand basic website signals, and choose how to open webpages using browsers or apps already available on their Mac.

Opener App is not created by, affiliated with, endorsed by, sponsored by, or connected to Apple, Google, Microsoft, Mozilla, Brave, Opera, or any other browser, platform, website, or service provider.

All trademarks, logos, product names, browser names, website names, and brand assets belong to their respective owners, including Safari by Apple Inc., Chrome by Google LLC, Firefox by Mozilla Foundation, Edge by Microsoft Corporation, Brave by Brave Software, Inc., and Opera by Opera Norway AS. Any references to third-party browsers, websites, or services are used only to identify compatibility and supported user choices, and do not imply endorsement or partnership.

Ph. 307-777-7311

☑ I am the person whose signature appears on the filing; that I am authorized to file these documents on behalf of the business entity to which they pertain; and that the information I am submitting is true and correct to the best of my knowledge.

☑ I am filing in accordance with the provisions of the Wyoming Limited Liability Company Act, (W.S. 17-29-101 through 17-29-1105) and Registered Offices and Agents Act (W.S. 17-28-101 through 17-28-111).

☑ I understand that the information submitted electronically by me will be used to generate Articles of Organization that will be filed with the Wyoming Secretary of State.

☑ I intend and agree that the electronic submission of the information set forth herein constitutes my signature for this filing.

☑ I have conducted the appropriate name searches to ensure compliance with W.S. 17-16-401.

☑ I consent on behalf of the business entity to accept electronic service of process at the email address provided with Article IV, Principal Office Address, under the circumstances specified in W.S. 17-28-104(e).

Notice Regarding False Filings: Filing a false document could result in criminal penalty and prosecution pursuant to W.S. 6-5-308.

W.S. 6-5-308. Penalty for filing false document.

(a) A person commits a felony punishable by imprisonment for not more than two (2) years, a fine of not more than two thousand dollars ($2,000.00), or both, if he files with the secretary of state and willfully or knowingly:

(i) Falsifies, conceals or covers up by any trick, scheme or device a material fact;

(ii) Makes any materially false, fictitious or fraudulent statement or representation; or

(iii) Makes or uses any false writing or document knowing the same to contain any materially false, fictitious or fraudulent statement or entry.

☑ I acknowledge having read W.S. 6-5-308.

Filer is: ☑ An Individual ☐ An Organization

Filer Information:

By submitting this form I agree and accept this electronic filing as legal submission of my Articles of Organization.

Appointment of New Registered Agent and Office

This form is used ONLY to change the registered agent from one person/company to a different person/company.

1. Name of the business entity:

(The name of the business entity must match exactly with the Secretary of State's records.)

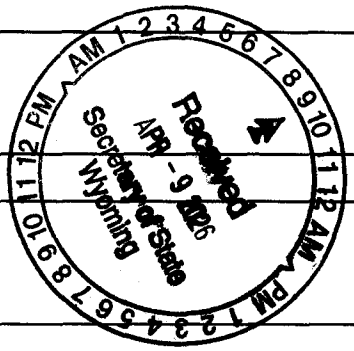

TechSphere Creations LLC

2. Name of former registered agent and physical address of former registered office:

(The former registered agent information provided must match exactly with the Secretary of State's records. If the business entity is without a registered agent, please list No Agent/No Office.)

Former Registered Agent:

Registered Agents Inc

Former Registered Office Address:

30 N Gould St Ste R
Sheridan, WY 82801 USA

3. Name of new registered agent and physical Wyoming address of new registered office:

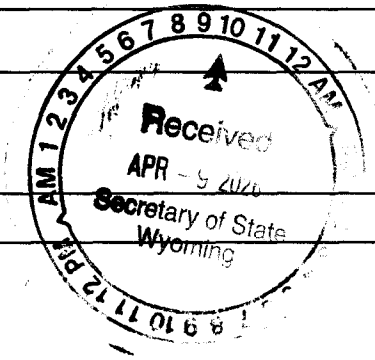

(The new registered agent information provided must match exactly with the Secretary of State's records if the new registered agent already represents at least one other business entity.)

New Registered Agent:

WY Commercial Registered Agent LLC

New Registered Physical Office Address (must be located in Wyoming):

75 E 3rd St
Sheridan, WY 82801

New Registered Agent's Mailing Address:

75 E 3rd St
Sheridan, WY 82801

For consistency the Secretary of State's office will only keep one version of the agent's name and address on file.

4. I hereby certify that the new registered office and the registered agent comply with the requirements of W.S. 17-28-101 through W.S. 17-28-111.

5. The mailing address of my business should be changed to reflect the new registered office address.
(Please check one.)

☑ Yes ☐ No

6. The principal address of my business should be changed to reflect the new registered office address.
(Please check one.)

☑ Yes ☐ No

7. Once completed the physical address of the registered office and business office of the registered agent will be identical.

Signature: DL **Date:** 04/05/2026
