BRAND IMITATION, BUYER CONFUSION AND SHARED-POLICY WARNING · NOTES AND PRODUCTIVITY

WinRAR-style imitation. Google Keep confusion. Three linked accounts.

Farhana Farooq's RAR Extractor imitates WinRAR's distinctive books-and-belt icon. The same account sells a Google Keep-style notes app whose users complain about missing Google syncing. Across this account and two others, all 13 apps link to the same unsuitable privacy and terms files, which identify a different product called "Wallpapers." The shared documents connect the accounts' published disclosures; common ownership remains unproven.

Apple publisher linked profiles: **Farhana Farooq · 1785497892** · **Muhammad Faizan Sadiq · 1820969829** · **Muhammad Muaz · 1866860971**

VISUAL EVIDENCE

WinRAR first. Google Keep next. Compare the identities.

Top row: Farhana Farooq's RAR Extractor beside the official WinRAR archive icon. Bottom row: the same developer's notes app beside Google's own folded-note Keep artwork. The familiar books, belt, yellow note and lightbulb promote independent products from a different publisher.

Next, the account connection: 13 apps use the exact same policies.

The trail reaches two other Apple developer accounts: Muhammad Faizan Sadiq and Muhammad Muaz. All 13 current app descriptions across the three accounts point to the exact same privacy-policy and terms URLs on GitHub, a website for hosting project files. The shared documents also give the same support contact.

This is a specific, checkable connection between the accounts' published disclosures. It does not identify a common legal owner or prove that the apps share code. The original icons and exact Apple account IDs below make each product easy to find.

Editorial connection diagram made from the original app icons and exact Apple publisher records. Lines mean reuse of the same policy documents; they do not mean proven common ownership. Checked 17 November 2026. E7–E14/E18/E19.

E7/E8/E9/E10/E11/E18/E19.

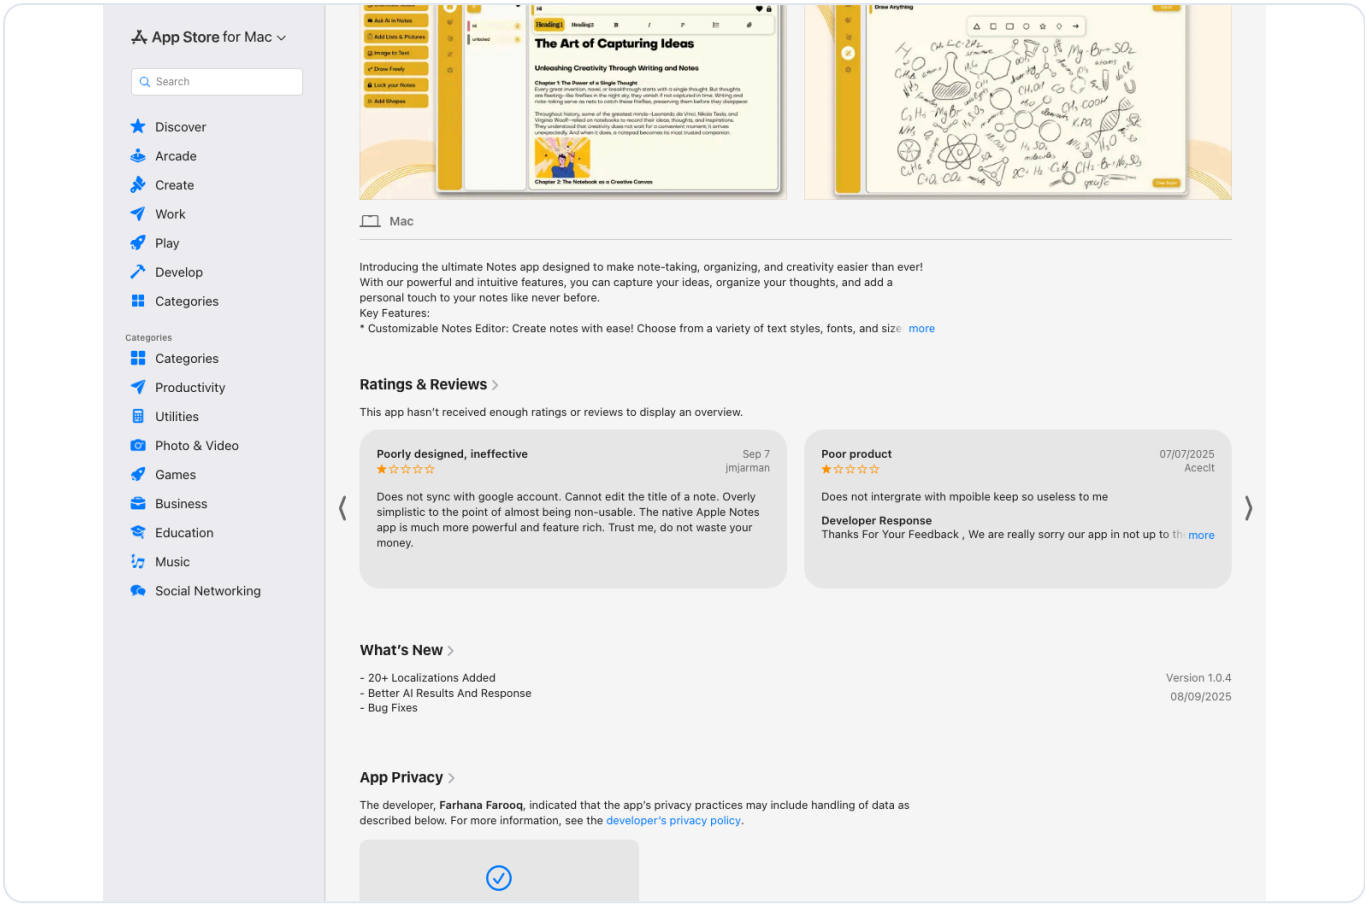

Buyers expected Google Keep. The reviews explain the problem.

The familiar Google Keep name, yellow colour, folded note and lightbulb can lead buyers towards the wrong product. Apple identifies Farhana Farooq as the seller, rather than Google LLC. This is a separate notes app that advertises its own editor, drawing tools and AI features.

The current US page includes complaints about Google-account and mobile-Keep syncing. One September review says “Does not sync with google account.” A July 2025 review describes the missing mobile integration. These are users’ reports; this investigation did not sign in or reproduce their tests. A positive review also exists.

The description does include a not-official/not-affiliated disclaimer. That matters, but it does not make the Google-led title and familiar visual identity easy to distinguish at first glance. Apple should review this combined presentation and the documented mismatch in buyer expectations.

The linked accounts also market a WinRAR-like extractor and a green writing app that can evoke Grammarly. The report compares both with the genuine products below: the books-and-belt imitation is strong, while the Grammarly resemblance is limited to broader presentation and is labelled accordingly.

Current US Apple review cards, captured 17 November 2026. Reviewers describe Google-account/mobile Keep integration problems; the developer response is also visible. Apple displays individual reviews despite having no aggregate ratings overview. E2.

E2/E3/E6/E15/E16.

WHAT YOU NEED TO KNOW

The strongest findings: familiar brands, confused buyers and shared policies.

01

A related extractor adopts a WinRAR-like visual identity.

The same Apple account's RAR Extractor uses three coloured books held by a belt, closely echoing RARLAB's official WinRAR icon. This is a strong visual-imitation concern; the drawings are not identical.

Original current app and official RARLAB artwork; supplied app-icon crop.

E7 E23 E24

02

The privacy policy describes the wrong product.

Apple says Data Not Collected, while the linked Wallpapers policy describes automatic usage-data collection and sharing. Actual data flows were not measured.

Apple panel, linked privacy and terms.

E5 E10 E11

03

Users report missing Google/mobile Keep integration.

Current US reviews describe Google-account and mobile Keep sync problems. These are specific user complaints, not independently reproduced tests. Individual reviews exist even without an aggregate ratings overview.

Current Apple review cards and native capture.

E2

04

The same policy URLs span three Apple accounts.

All 13 returned app descriptions link the exact same privacy and terms files. This establishes shared documents and a published support channel, not a verified common owner.

Three exact publisher lookups and live product pages.

E7 E8 E9 E10 E11 E18 E19

05

Google Keep is not mobile-only.

The independent description omits Google’s documented computer access at keep.google.com. Browser access is different from a native Mac app.

Listing versus official Google computer help.

E3 E17 E20

06

The title and icon borrow a familiar Google identity.

The exact Apple seller is Farhana Farooq. Google Keep wording and a yellow note/lightbulb combine to suggest Google’s product, despite an independent-app disclaimer. The original icon designs differ.

Current title, original artwork and Google reference.

E2 E3 E6 E15 E16

07

A linked green writing app can evoke Grammarly.

The independent Grammar Checker and official Grammarly share a teal/green writing-tool identity, but their icons are different. No Grammarly word or official G was found in the checked independent description or promotions. The report records a qualified visual-confusion concern.

Original independent icon, all seven promotions, official Grammarly listing/artwork and fresh exact listing.

E8 E35 E36 E38

WHAT IT COSTS

A $4.99 weekly plan beside a $19.99 yearly plan.

Displayed US and Irish offers, checked 17 November 2026. Free download; the description says unlimited features require a purchase. Prices alone do not establish a fraudulent charge. Trial conditions, feature entitlements and the purchase screen were not tested. E2/E3/E5.

Estimated yearly cost on weekly renewal: $259.48.

Continuous renewal at the listed weekly price gives an estimated yearly cost of $259.48, about 13 times the $19.99 yearly offer. In Ireland the estimate is €311.48, about 13.5 times the €22.99 yearly offer.

Estimates assume continuous renewal without discounts, cancellation or price changes; calendar-year billing can vary. Compare the actual features before choosing a plan. The linked terms reserve the ability to discontinue service without notice, leaving the scope of Lifetime access unclear. E2/E5/E11.

Prices displayed in the saved listing

Purchase option	United States	Ireland
Weekly	$4.99	€5.99
Monthly	$9.99	€9.99
Yearly	$19.99	€22.99
Lifetime	$29.99	€34.99

WHO IS BEHIND IT?

The name on the listing.

App name

Note App For Google Keep

Developer / seller

Farhana Farooq

Developer country · App ID 6744288942

Unknown · Apple DE/IE provides no registered country. The linked policy declares Pakistan but incorrectly identifies the app and company as Wallpapers; this is a qualified policy association, not verified registered-country evidence.

The WinRAR-style identity in more detail.

Farhana Farooq's RAR Extractor : Win Unarchiver uses three coloured books held by a yellow belt. WinRAR's official archive icon also uses three coloured books held by a belt. This is a strong visual imitation of a familiar product identity, even though the artwork is not identical.

The familiar symbol can make an independent Mac extractor appear connected to WinRAR. Apple identifies Farhana Farooq as this app's seller; RARLAB supplies the official WinRAR reference below. The report flags this as a WinRAR-style impersonation concern. Supporting RAR files is a normal function, but it does not establish a WinRAR partnership or permission to reproduce its identity.

Independent RAR Extractor on Apple Official RARLAB icon gallery

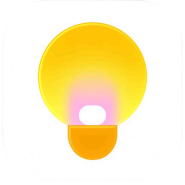

E7/E23/E24.

Google has more than one official Keep design.

The main comparison uses the folded yellow note and outlined white bulb artwork referenced by Google's own Workspace page. The independent app adds a white sheet and a yellow outlined bulb, keeping the familiar note-and-lightbulb idea. The files are visibly different; the warning concerns the combined name and appearance.

Google's current iPhone/iPad app uses the newer bulb artwork below. It is shown separately so readers can see the current official store design as well. Neither reference establishes what the independent app looked like when it first launched.

Official Google Keep · current Apple icon

Current official Google Keep iPhone/iPad app artwork, Apple app 1029207872, seller Google LLC. A brand reference, not a native Mac app.
E6.

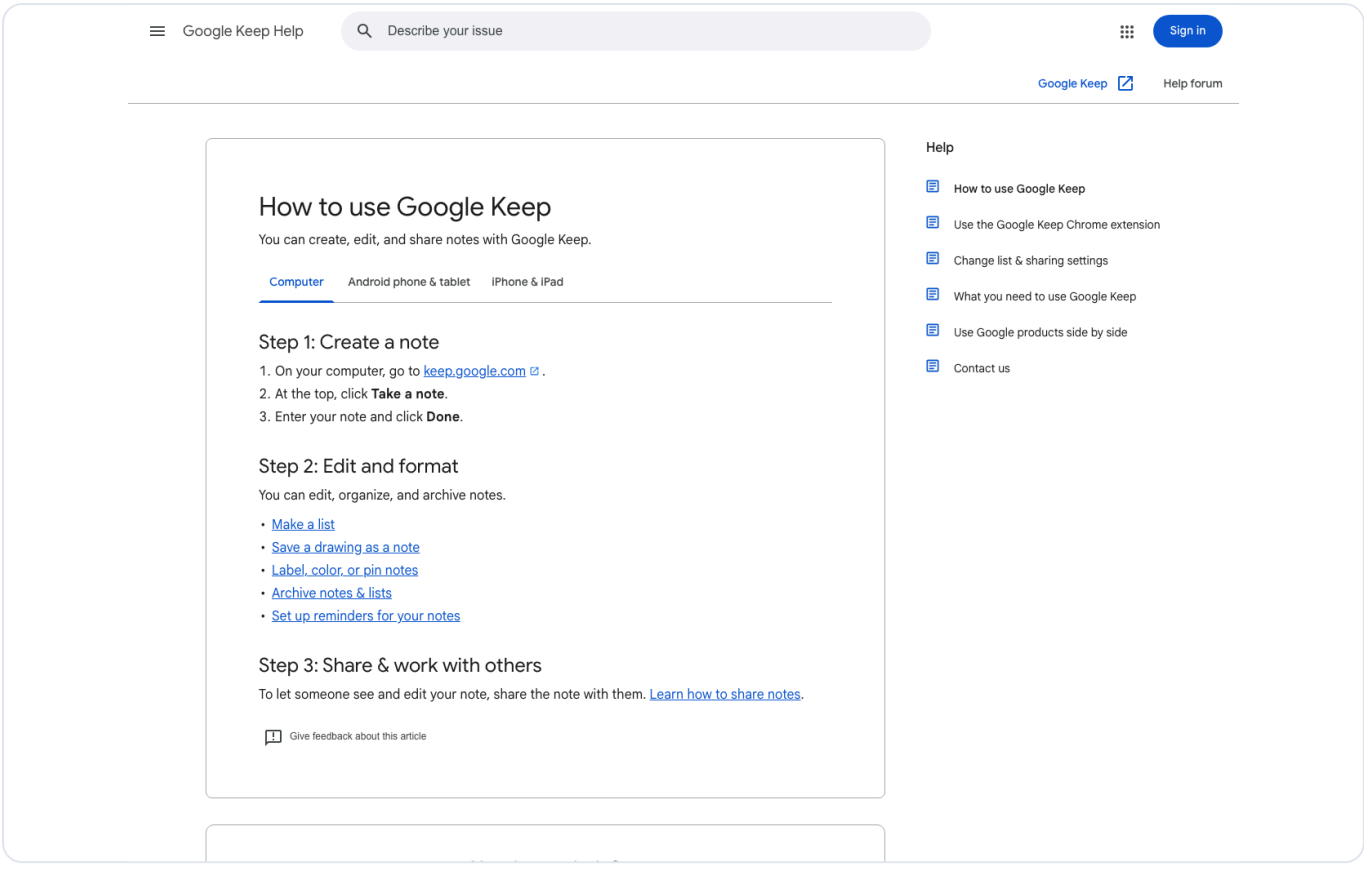

Official Google Keep on Apple Google's Keep product page

E6/E15/E16.

The mobile-only claim is wrong: Google Keep works on a computer.

The independent listing says Google Keep is only available on mobile devices. Google's own help page tells computer users to open keep.google.com, then create, edit and share notes. Buyers do not need this independent app simply to reach Google Keep on a Mac.

Using Google Keep in a browser is different from installing a native Mac app. The finding is that the listing leaves out Google's official computer access, while promoting a paid independent alternative with Google's name.

Google's own Computer instructions point directly to keep.google.com. Native help-page capture, 17 November 2026. E17.

Google Keep for a computer Open Google Keep on the web

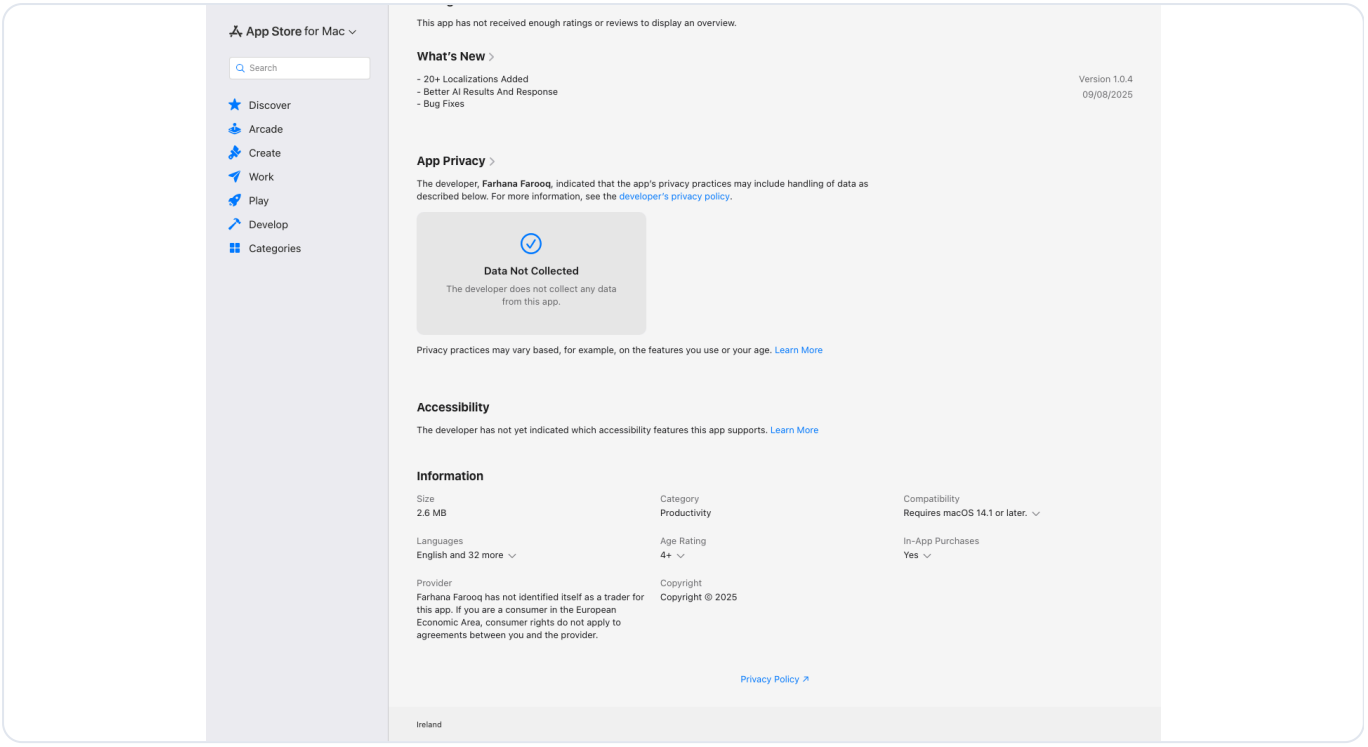

E3/E17/E20.

Apple says no data collected. The linked policy says something else.

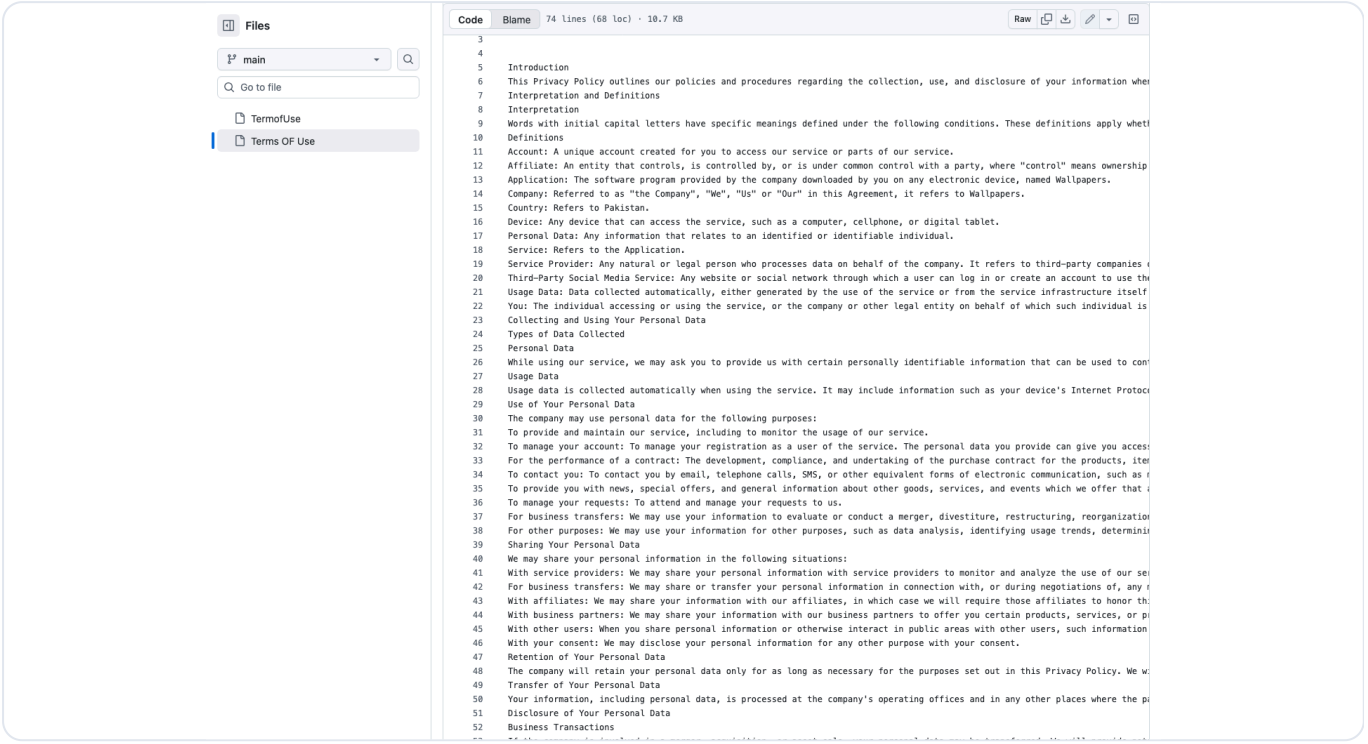

Apple's privacy panel says Data Not Collected. The linked document instead describes automatic collection of usage data, including IP addresses and device information, plus several possible kinds of sharing. It also calls both the application and the company "Wallpapers", which is not the notes app's name.

These written disclosures do not give buyers a reliable explanation of how this particular app handles notes, images or AI requests. A generic policy could be wrong; a store label could be incomplete. The evidence establishes inconsistent disclosures, rather than proving that the app actually tracks users or uploads their notes.

The listing also promises completely offline use while advertising AI chat and image-to-text. A June version note mentions fixing API downtime, meaning a connection to another service. Local note editing could work offline, but the listing should explain which AI functions require a connection and who receives any submitted content.

Apple's Data Not Collected label and Irish non-trader disclosure for the exact notes app. Captured 17 November 2026. E5.

The linked GitHub privacy file names Wallpapers, declares Pakistan and describes automatic usage-data collection. This is policy text, not an observed network test. E10.

Read the exact privacy file Read the exact terms file

E3/E5/E10/E11.

What the developer’s public records actually tell us.

Apple’s Germany and Ireland pages say Farhana Farooq has not identified as a trader. They do not give a registered business country or address. The developer’s public GitHub profile has one policy repository and leaves its company, location and website fields blank. No verified registered company or director was identified.

The linked policy explicitly names Pakistan, so there is a documented Pakistan association in the seller’s own linked material. However, that same document identifies the wrong product and company as Wallpapers. This is not enough to verify Farhana Farooq’s registered business country or to assign a nationality to three people. The structured country record remains Unknown and retains that policy declaration.

The policy repository has three public commits on 15 December 2024, before this app’s Apple release record. The history identifies the GitHub account that added the files; it does not establish a family relationship or who controls the separate Apple accounts. No suspension or account-return sequence was verified here.

E4/E5/E10/E12/E13/E14/E33/E34.

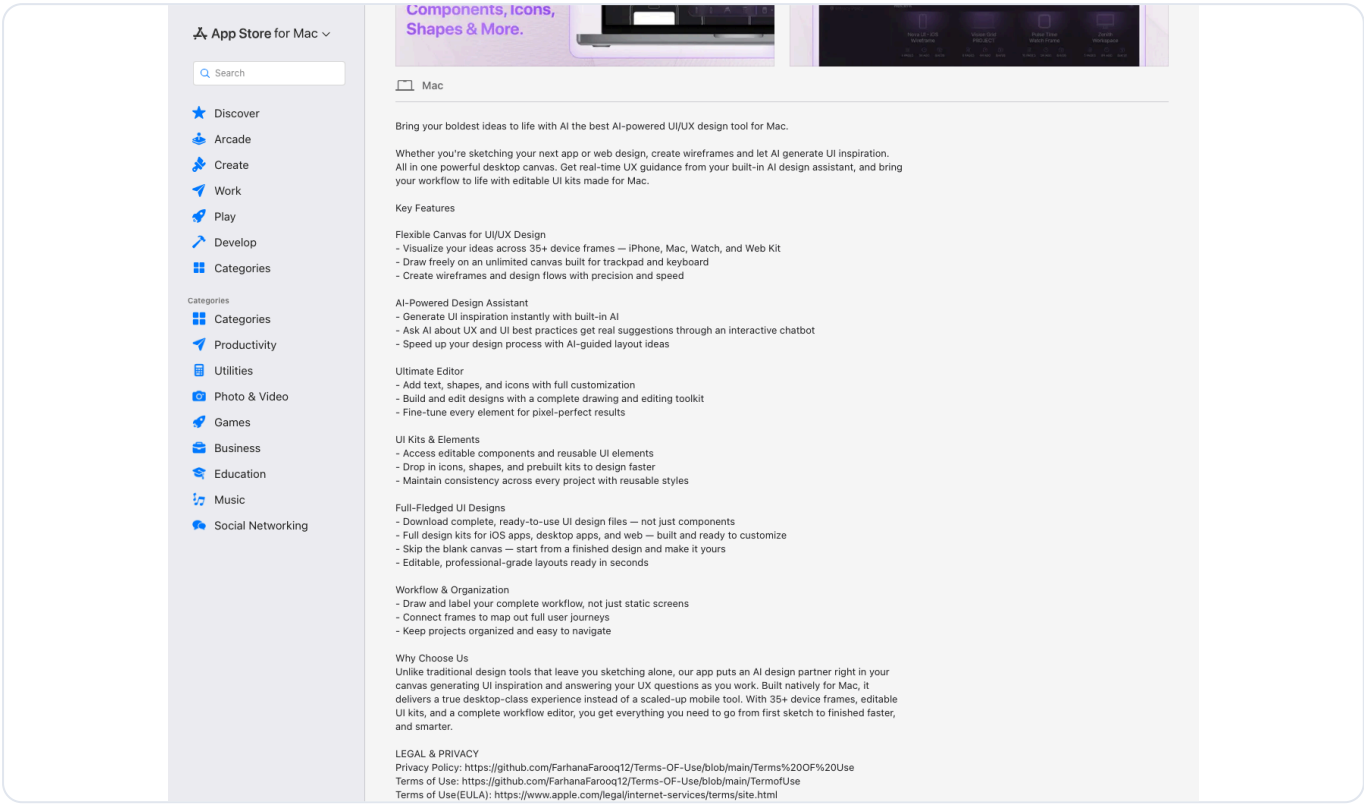

The same links are visible on the other accounts.

Grammar Checker on Muhammad Faizan Sadiq’s account prints the same two GitHub URLs as the Keep-named app. Mockup AI on Muhammad Muaz’s account does too. Exact Apple product records were checked for every app in the diagram, rather than relying only on similar names or design styles.

Both checked linked-account products also give non-trader disclosures in Germany and Ireland, without a registered country. Several apps use an EULA-labelled link to Apple’s website terms. A website’s terms are not the same document as the licence for an app.

Expanded Grammar Checker description visibly repeats the exact FarhanaFarooq12 privacy and terms links. Native Apple capture, 17 November 2026. E18.

Expanded Mockup AI description repeats those same links and labels Apple's website terms as an EULA. Native Apple capture, 17 November 2026. E19.

E7/E8/E9/E18/E19/E33/E34.

The green writing app can also evoke Grammarly.

Grammar Checker - AI Writing belongs to Muhammad Faizan Sadiq, one of the accounts linked by the shared policy files. Its teal/green icon, white checking symbol and green writing-assistant screens can remind buyers of Grammarly. The comparison below makes that possible brand confusion visible.

The distinction matters: the independent icon shows a document, checkmark and sparkle. Official Grammarly uses a white G on a teal/green shape, and Apple identifies its seller as Superhuman Platform Inc. The checked independent description and seven promotions did not name Grammarly or show its official G. This is a qualified Grammarly-like presentation concern; it is not the same strong copied-icon finding as the WinRAR books and belt.

Buyers looking for Grammarly should check the seller and exact app link before paying. Similar colours and grammar-checking features do not establish an official connection.

Independent Grammar Checker

Independent Grammar Checker - AI Writing, app 6755183481, Muhammad Faizan Sadiq. Teal/green document, checkmark and sparkle. E38.

On Faizan’s account: WA Sticker Maker calls itself Stickerly.

WA Sticker Maker & Memes Gen repeatedly calls itself Stickerly in its description, although that is not its Apple listing name. The official Sticker.ly product is published by NAVER Z Corporation. The publisher and artwork are different.

WhatsApp sticker-export support can be a normal compatibility feature. The unexplained reuse of Stickerly as the app’s own name is the specific marketing issue here; this report does not claim the two icons are identical.

On Muaz’s account: Docusign-led wording for a different product.

Document Sign & esign Docs repeatedly uses DocuSign wording, including its how-it-works heading. It also describes itself as a DocuSign alternative, which is important context. Its feather-and-document icon differs from the official Docusign app’s geometric design.

The shared policy repository has an open issue titled Cancel Docusign subscription, with requests in March and October 2026. The thread gives no Apple app ID or receipt, so it cannot prove which product the writers bought. It is retained as a support-context lead, not attributed as a verified billing complaint against Document Sign.

What Apple should review.

The Google-led title and familiar Keep-style artwork should be reviewed together with the reviews about missing Google syncing, the mobile-only claim and the privacy-policy mismatch. The weekly renewal cost should be clear before purchase.

The same unsuitable policy documents are used across three Apple account IDs, so Apple can check whether the disclosures are accurate for each product and whether the apparent brand borrowing is authorized. The relevant rules cover accurate metadata, copied presentation, intellectual property, privacy and subscriptions.

No original launch artwork was recovered. The supplied same-day archive links returned rate-limit errors during fresh checks, and an older terms-file index hit does not show an app rebrand. The report therefore does not claim an App Review bypass, confirmed fraud, a terminated account or a proven one-person network.

SHA-256: 5b3d079e297076c43aaf9deb0d77539674643b8d6b306804ce409dec363b0d26

E10 / The linked privacy document describes Wallpapers

The privacy file defines both the application and the company as Wallpapers and states Country: Refers to Pakistan. It describes automatic usage-data collection including IP/device/diagnostic information and possible sharing with service providers, affiliates and business partners. It gives one support contact reused through the same document. This is a published policy, not observed network activity. Its wrong product name makes its applicability and country attribution uncertain. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: b56bed84429d5524033fe8f34e212da5249849368194ff205ec315353b05940c

E11 / The linked terms do not fit a notes product

Terms discuss premium services, subscriptions and discontinuing service without notice. They also contain no-traffic-log and no-IP/port-blocking promises characteristic of a network-service template. The same support contact appears. These terms do not clearly explain the notes app, AI handling, cloud sync or the duration of its Lifetime purchase. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 02113f5e12e308dbef4aa81287f08e90854966a60040926d2c497d81bd2ee2da

E12 / The public GitHub profile does not identify a business

FarhanaFarooq12, user ID 191782512, created 15 December 2024. No real-name, company, location, public email, biography or website field is populated. Name-search matches to unrelated people were excluded. A GitHub handle is not a legal identity or proof of who owns three Apple accounts. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 8ce886fdf75f4d80f2514dd99bcebd3e2301244ef9ec5a0b76b71207f49030ca

E13 / One public policy repository

Terms-OF-Use is the profile's one returned public repository. The two root files are the privacy document Terms OF Use and the terms document TermofUse. No product presentation homepage or registered-company number was recovered. GitHub is a repository-hosting service; use of free hosting alone does not establish fraud. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 418fcf42f8a776ddbd96179753fbf1fadbd96f4d3fcd668d2d00512137162ac0

E14 / Policy history: three commits on 15 December 2024

All three returned commits are attributed to FarhanaFarooq12 on that date. The first creates the privacy file. Public history establishes when these files were added, not the identity of the author, ownership of Apple accounts or the notes app's original appearance. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 83aba8be94249cd54d32d3a95475a1962a0a35e80a58aa1832e863b13d8e7f11

E15 / Google's own Keep product page

Google Workspace identifies Keep as its notes product and references keep_512dp.png, the folded yellow note and white outlined lightbulb artwork used for the main brand comparison. The same page also references newer Keep artwork; distinct official designs are not collapsed into a claim that only one icon exists. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: a712acb3b9decbe917c2b5d61aeceb8e59fa7c0d34ade1b31f41f08334c0c540

E16 / Original folded-note Keep artwork from Google

Exact gstatic PNG explicitly referenced by Google's product page. Retrieved 17 November 2026. Original artwork is reproduced without redrawing. This is an official web-brand reference, not proof of the third-party app's appearance on a past launch date. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 3c93e2a2d2e27e4afb876452bc7ff7cbbde2bcb94d5c2b1dac708319b36ed06a

E17 / Google Keep is available on a computer

Official Google Keep Help explicitly directs computer users to keep.google.com and explains creating, editing and sharing notes. This contradicts the independent app's broad claim that Google Keep is only available on mobile devices. A web app and a native Mac app are different things. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 9bbb4e45130cfab8e51ce604629971a07b91081141fe17a9e9d599eeb0c1b27b

E18 / Second-account policy-link cross-check

Grammar Checker - AI Writing, app 6755183481, visibly prints both exact GitHub policy links in its live description. Native expanded-description capture retained. Together with all five API descriptions, this verifies document reuse under publisher 1820969829. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: c797c99d267dcf6972cfe44c917aa8a8a67f5fdb40d21accbde4025076aea392

E19 / Third-account policy-link cross-check

Mockup AI - Wireframe Design, app 6782537956, visibly prints the same policy and terms links. Its EULA-labelled link points to Apple's website terms, not the standard App Store application licence. Native expanded-description capture retained. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 653e65f0c9ca54827cfedcad117104244000a79f410d76092d4176ed1d23fef4

E20 / Google's former Chrome app and current web route

Google explains its old Keep Chrome app was replaced by the web route and that computer offline access is not available through that replacement. This is context for Google's own products; it does not disprove local offline editing in an independent notes app. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 803b466468d9ebfb57da0b6f25a78a6710bce7331c45b761c5a471dba3c134e1

E21 / Google brand guidance

Google's guidance rejects misleading affiliation, imitation of distinctive visual identity and incorporating its trademarks into another product's name. Relevant to the observed Google Keep wording and yellow note/bulb presentation. No private permission or court decision was recovered. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 12e51f5351329319c12cf774ad8db58cf572f5faea4bbb2035a39a8cfa3f6688

E22 / Relevant Apple App Review provisions

Relevant current provisions include 2.3 Accurate Metadata, 2.3.7 names/keywords, 4.1 Copycats, 5.2.1 intellectual property, 5.1.1 privacy disclosures and 3.1.2 subscriptions. This report identifies review issues; it does not invent an Apple infringement ruling or enforcement action. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 5de1181e69ecc31132dbc4668a3834319e5795d7c515d324598cb9c12299edd1

E23 / WinRAR's own brand reference

RARLAB's official logo gallery supplies the three-coloured-books and belt archive icon. Compared with the same design elements in Farhana Farooq's RAR Extractor icon. Supporting the RAR format is not itself impersonation; permission for the similar artwork was not established. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: ab2d4dc8e89bd885283700e8938cf2b3bdbfab77a0d2844aa1e6c2fe0395b65f

E24 / Original RARLAB icon

Original rar_1.png from RARLAB's gallery. Used as a brand-reference image, not an Apple app ID. File-format support and publisher identity remain separate. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: cd80f6dbe425d95aad5b15db3e4f48de310652bf85cc7b57e86646caf85412eb

E25 / Official Sticker.ly reference

Sticker.ly - WASticker, app 1458740001, seller NAVER Z Corporation. Original official blue smile-sticker icon retrieved. The related independent WA Sticker Maker app uses a different green laughing-face design, but repeatedly calls itself Stickerly in its description. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 736ed5a353aedd640cc0adaddface893f282b7d9197b05e7771d52a15305f9ff

E26 / Official Docusign reference

Docusign - Upload & Sign Docs, app 474990205, seller Docusign. Original purple/red/black geometric icon retrieved. The independent Document Sign app has a different feather/document icon. Shared colours alone are not an identical-artwork finding. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 2a1605c7c3499b1bc9197c0d9530d0ba95dbd36551fc33ace61693b99a9048c6

E27 / Independent Document Sign description

Document Sign & esign Docs under Muhammad Muaz repeatedly uses DocuSign, including a DocuSign alternative description, DocuSign-style workflows and a DocuSign-labelled how-it-works heading. These are specific brand-marketing observations, not proof of a Docusign integration or identical icons. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 7c57eaf8556caa7bc8b1f1ac96a175bd1fac4aa859c5052da6cdbe1efc17be5e

E28 / Independent WA Sticker Maker description

WA Sticker Maker & Memes Gen under Muhammad Faizan Sadiq repeatedly names itself Stickerly despite its different Apple title. WhatsApp export compatibility can be legitimate; the unexplained alternative product name is the specific issue recorded here. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 90388fa6960a39b6cfcf88cada383ee08345669e17fce13fb430348aaa628a59

E29 / Supplied archive URL could not be replayed

Fresh replay returned 429. The dated URL printed in the source PDF is preserved as a source-provided archive reference, not a newly verified historic page. Initial store 429 responses were resolved with canonical retries and do not indicate removal. Fresh check: HTTP 429, 17 November 2026.

Open source ↗

SHA-256: e859c18f0c0cc71ffed35c4e7ebc87cbb4f136116156f2de1588aeb71449533e

E30 / Older policy URL in archive index

The index returned a 15 September 2025 07:53:24 UTC capture of the terms file. An index hit is not a verified past app icon or product name. No launch-to-Google rebranding sequence was established. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: c64942c840c74e887b2785956a2563fc92fd8e2a9a0ba649c6481dc82a1cb32e

E31 / A cancellation request in the shared policy repository

Issue 1, Cancel Docusign subscription, opened 22 March 2026. A user asks for a Docusign subscription to be cancelled; another comment says cancel on 16 October 2026. The issue is open. It does not identify an Apple app ID, receipt or purchase, so it cannot be attributed to Document Sign as a proven billing complaint. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: df33d56e8e9f5789497c3245d412c741d8772db89d2a4c74d62d964ac0cfb234

E32 / Public issue comment cross-check

One returned comment, dated 16 October 2026, says cancel. No developer reply is visible in the checked thread. Absence of a public reply does not show whether any private support or cancellation occurred. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 2844f372619ff3b2e589c7b67f42c5a4574020f887415a136a9d46259977faa5

E33 / Linked accounts: Germany provider check

Grammar Checker under Muhammad Faizan Sadiq states that the provider has not identified as a trader; no registered country or address displayed. Same result on the checked Irish page. No nationality is inferred from the name. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 46af634eb70f4e511637ad676408724b7365b2ca7891bfd9ca90bec12b2eefa0

E34 / Linked accounts: Germany provider check

Mockup AI under Muhammad Muaz gives the same non-trader statement; no business-country/address displayed. Irish page corroborates it. This does not transfer a country to every app on the profile. Fresh check: HTTP 200, 17 November 2026.

Open source ↗

SHA-256: 55253dc6db3652b9b30abcdb91774a435d4810aac7c83655c027dd18e22806c6

E35 / Official Grammarly app identity and artwork

Apple app 1462114288, Grammarly: AI Writing App, seller and developer Superhuman Platform Inc, publisher ID 1134927945, bundle com.grammarly.safari.extension. Original current teal/green G artwork retrieved from the exact Apple record. This is a brand reference, not part of the three linked accounts. Checked 17 November 2026, HTTP 200.

Open source ↗

SHA-256: ae7cf10cebcd6b4aeb7fcdcec0227c01113aa303035228c865b1e0d05cd64917

E36 / Official Grammarly listing cross-check

The official Mac listing names Superhuman Platform Inc and presents Grammarly's own G identity. Compared with the independent Grammar Checker title, document/checkmark icon and publisher Muhammad Faizan Sadiq. Both pages loaded; differing publisher records are preserved.

Open source ↗

SHA-256: e87442c908005e33b05398c4f8b22ef0703691084419e30f242753f59eb5a13a

E37 / Grammarly's own desktop product page

Official Grammarly desktop page identifies the genuine writing assistant. Used to compare the product identity, not to claim that generic grammar checking, green colours or checkmarks belong exclusively to Grammarly.

Open source ↗

SHA-256: 5ca46ae1f26d589c51dd940818233388f70d753bb839da330f016306b2bc8c04

E38 / Independent Grammar Checker: fresh branding screen

App 6755183481, Grammar Checker - AI Writing, Muhammad Faizan Sadiq, publisher 1820969829. Teal/green document-and-checkmark icon and green-led promotions for grammar correction, paraphrasing and writing assistance. All seven original promotional images were inspected. No Grammarly word or official G mark was identified in the checked title, description or promotions. This supports a qualified visual-confusion concern, not a pixel-identical copied-logo finding.

Open source ↗

Description

Introducing the ultimate Notes app designed to make note-taking, organizing, and creativity easier than ever! With our powerful and intuitive features, you can capture your ideas, organize your thoughts, and add a personal touch to your notes like never before.
Key Features:
* Customizable Notes Editor: Create notes with ease! Choose from a variety of text styles, fonts, and sizes to personalize your notes. Add headings, subheadings, and customize your text formatting.
* Bullet Points & Lists: Organize your thoughts with bullet points and numbered lists. Keep your notes neat, structured, and easy to follow.
* Add Images & Visuals: Take your notes to the next level by adding images directly to your notes. Perfect for visual learners and those who need to reference images alongside text.
* Drawing & Shapes: Get creative! Draw freehand sketches or add shapes to your notes for diagrams, flowcharts, or just fun doodles.
* AI-Powered Help: Stuck on what to write or need some inspiration? Use the built-in AI chat feature to get assistance. The AI can even generate text for images, helping you describe visuals with ease.
Whether you're brainstorming, journaling, or simply organizing your thoughts, this app is your go-to tool for all your note-taking needs. Download now and make your note-taking experience smarter, more creative, and more organized!

Note:
Add Unlimited notes,chats with ai, for drawing things User need to buy the additional subscription given in the app

Payment will be charged to your iTunes account at confirmation of purchase. Your subscription will automatically renew unless auto-renew is turned off at least 24-hours before the end of the current subscription period. Your account will be charged for renewal within 24-hours prior to the end of the current subscription period. Automatic renewals will cost the same price you were originally charged for the subscription.You can manage your subscriptions and turn off auto-renewal by going to your Account Settings on the App Store after purchase. Read our terms of service and Privacy Policy for more information.

This App offers Google Keeps capabilities right here on your Mac.
Google Keep is one of the most popular to save the notes and secure them. Unfortunately, Google keep is only available on mobile devices such as your iPhone and iPad. This App offers the same capabilities right here on your Mac. And just like the original app,This App works completely offline so you can use it anywhere anytime.
