MISLEADING GOOGLE-BRAND PRESENTATION AND CONFLICTING PRIVACY DISCLOSURES · BROWSER AND GOOGLE-SERVICE UTILITIES

“App for” Google: familiar brands, a different seller.

The misleading hook is “App for” + a Google brand: App for Google Search, Mail App for Gmail and Workspace Apps for Google App put Google’s names ahead of the independent seller. Combined with familiar artwork and Google interfaces, this presentation can make paid third-party utilities seem official. All four apps belong to chao cheng / ClyApp; the linked developer’s Vue profile lists Chongqing, China.

Apple publisher account behind these four Google-facing apps: **超 程 / chao cheng · Apple developer 1304170321**

VISUAL EVIDENCE

Google-led names and familiar icons create the first impression.

The naming formula is the lead concern. Browser Default Opener adds a Chrome-like ring and Chrome-led wording; Yami adds Gmail in its title and screenshots. The original designs are shown beside Google’s official artwork.

Independent · Browser Default Opener

Original Browser Default Opener icon: glossy blue/red/green/yellow segments around white. E17.

Official · Google Chrome

Original current Google Chrome mobile-app artwork; official brand reference, not a Mac App Store download claim. E20.

Independent · Mail App for Gmail: Yami

Original Yami red outline envelope. Not identical to Google’s current multicolour M; name and Gmail presentation are also part of the assessment. E17.

Official · Gmail by Google

By Alex Kleber · Published 2026-11-17 · Updated 2026-11-17

“App for” + a Google brand is the impersonation hook.

App for Google Search: GSearch, Mail App for Gmail: Yami and Workspace Apps for Google App put a familiar Google service at the centre of the product name. This report assesses that repeated “App for” + brand presentation as misleading when it is reinforced by familiar colours, icons and Google interfaces: users can take an independent utility for an official Google app.

Browser Default Opener does not contain “App for” in its actual store title. Its description repeatedly calls it Chrome Browser Default Opener, and its disclaimer uses Opener for Chrome Browser. Its Chrome-like icon reinforces the same Google association. These exact wording differences matter; the report does not invent a common title.

Saying that an app works with Google is not automatically impersonation. The problem assessed here is the combined first impression and the unclear seller identity it can create. An independence disclaimer later in the description does not remove that earlier impression. Apple should review the whole presentation against its metadata, copycat and third-party-rights rules.

The brand leads; the actual publisher is chao cheng / ClyApp in every row.

Exact store title / ID	Brand-led presentation	What the listing describes
App for Google Search: GSearch · 6783818988	App for + Google Search	A local search and browser launcher; not a Google-issued search app.
Mail App for Gmail: Yami · 6758521204	Mail App for + Gmail	A paid-feature Gmail workspace from an independent seller.
Workspace Apps for Google App · 6742973381	Workspace + Apps for Google App	A menu-bar launcher/web workspace for Google services.
Browser Default Opener · 6790231494	Chrome Browser Default Opener in the description; Chrome-like ring icon	A link router choosing among installed browsers; not Google Chrome.

E5/E8/E13/E14/E17/E20/E37/E38.

Google-led names across two more products.

Workspace Apps for Google App combines Google’s four familiar colours with Workspace and Google in its name, and fills its promotions with Gmail, Calendar, Meet, Photos and Gemini symbols. The wording borrows recognition from Google’s product family. Its own description identifies an independent CLY App studio tool.

App for Google Search: GSearch uses a purple magnifying glass, not Google’s official G icon. Its branding concern is the Google-led title and prominent search/browser marks in its promotions. Calling this an identical Google icon would overstate the evidence. The description explains a local search launcher and explicitly disclaims endorsement.

These utilities can have real shortcut and multi-account features. The warning is their Google-led first impression and the contradictory disclosures buyers must navigate; not the mere existence of a paid compatible tool.

Independent · Workspace Apps for Google App	Official · Google LLC	Independent · GSearch	Official · Google LLC
			
Four equal dots in Google’s familiar colours; this is not Google’s official G. E17.	Official current Google app icon. Palette/name reference; no identical-file claim. E20.	Original GSearch purple magnifier. The concern is the Google-led title, not an identical G icon. E17.	Official current Google app reference, seller Google LLC. E20.

E13/E14/E17/E20/E37

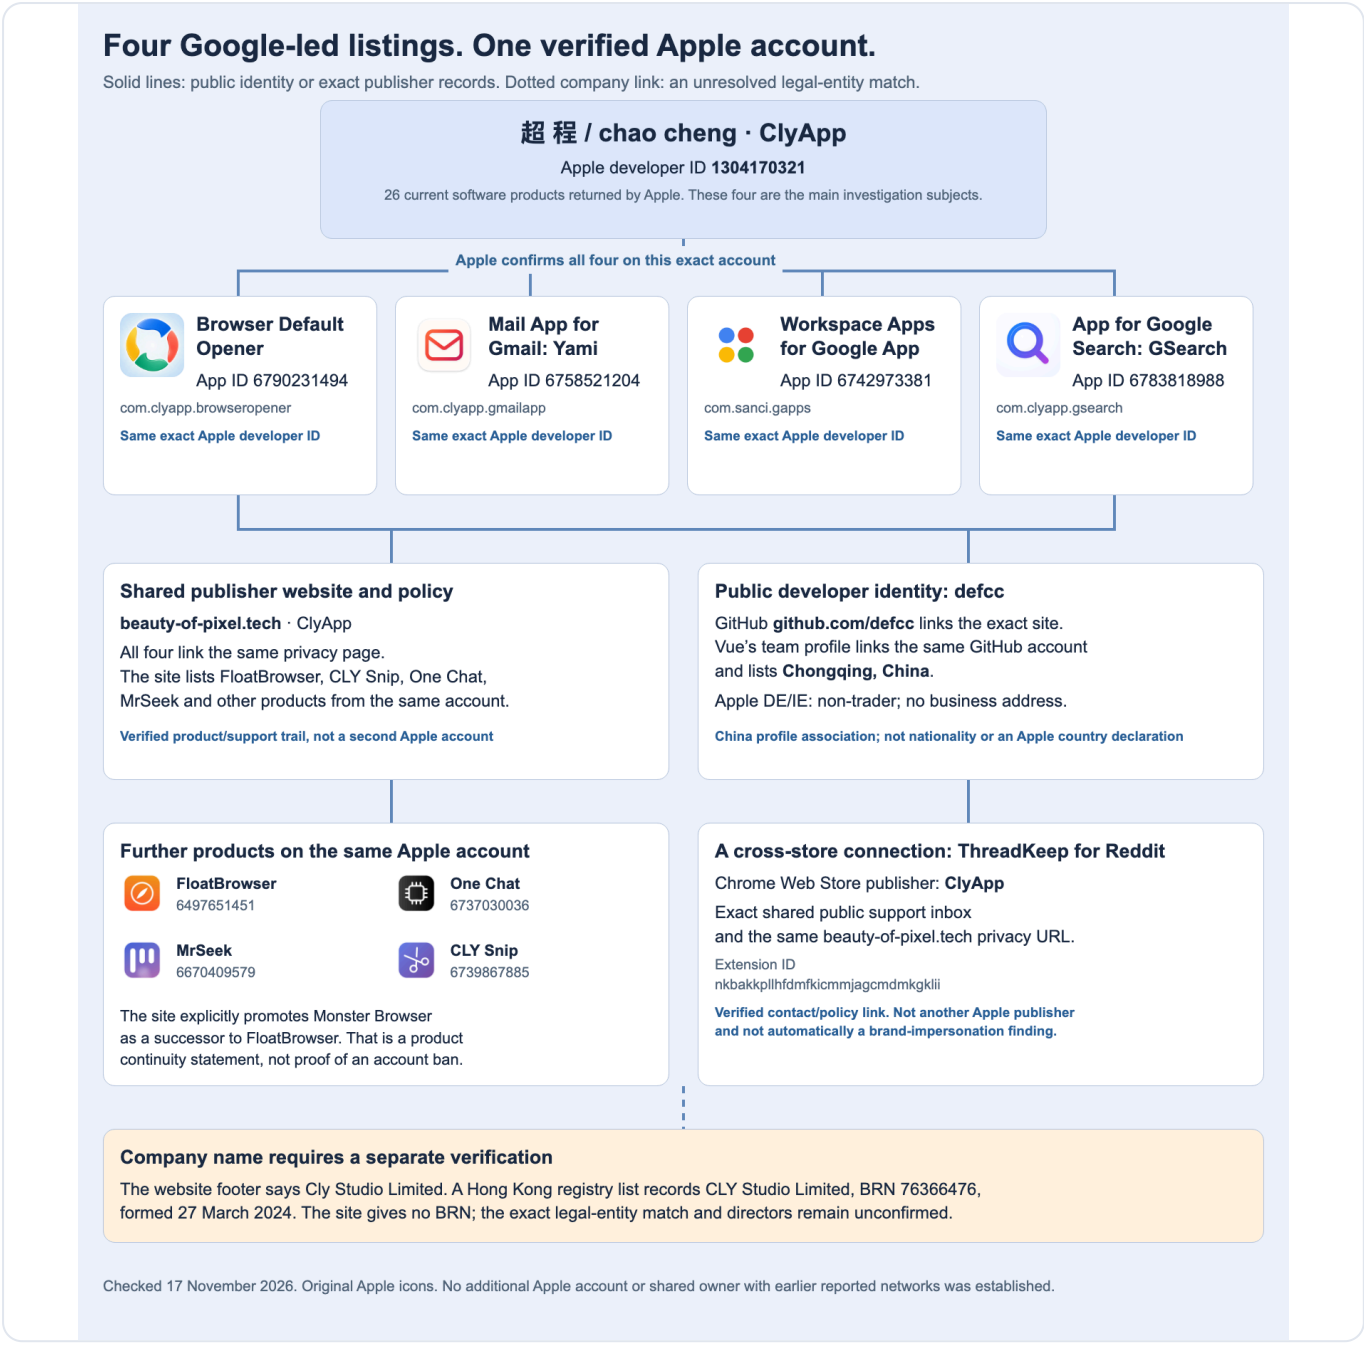

All four lead to the same Apple account.

Apple assigns all four apps to developer ID 1304170321, displayed as 超 程 and as chao cheng in the EU provider panels. This is a direct account match. The current account lookup returns 26 software products, not 26 accused scams.

The shared ClyApp website links several of those products and explicitly calls Monster Browser the successor of FloatBrowser. GitHub user defcc links the exact website. Vue's profile for that same GitHub user lists Chongqing, China. ThreadKeep for Reddit on the Chrome Web Store publishes the same support contact and privacy URL.

No second Apple developer account, account suspension or shared owner with earlier reported networks was established. The older Zonerly site's FloatWidget link is retained as an unresolved lead; it is not turned into a common-owner claim.

Further checks confirm KidoX through reciprocal GitHub/site links and a ClyApp copyright line, and MakePaperFast through the exact defcc repository and homepage. The directly linked my9albums.app and ClyApp scheduling profile extend the public trail to PaperMan; PaperMan explicitly lists StorybookAI and CubiZoo under More by us. These links are graded in the expanded project map below.

E18/E19/E22/E23/E25/E27

“Data Not Collected” meets an advertising-data policy.

All four store listings declare Data Not Collected. Their shared linked policy says the app uses Google AdMob and describes advertising identifiers, IP address/approximate location, device and usage information. The public explanations conflict.

This is especially jarring where GSearch says it has no ads or analytics, and Browser Default Opener says links and rules stay on the Mac. The policy instead gives iOS/Android advertising examples and an old mobile settings instruction, without explaining which Mac products it covers.

The evidence does not establish that these Mac apps actually run AdMob or transmit mail or searches. A wrong copied generic policy could explain the mismatch. Either way, buyers are being given contradictory information where they need a clear product-specific answer.

Privacy Policy

Last Updated: January 20, 2026

We respect your privacy and are committed to protecting your personal information. This Privacy Policy explains how we handle data in our application.

Personal Information

We do NOT directly collect, store, or sell any of your personal information to third parties.

Advertising

Our app uses Google AdMob to display advertisements. AdMob may collect and process certain data to provide personalized advertising experiences.

Information collected by AdMob may include:

- Device information (device model, operating system version)
- Advertising identifiers (IDFA on iOS, AAID on Android)
- IP address and approximate location
- App usage data and ad interaction information

For more information about how Google uses data, please review:

- Google Privacy Policy
- Google AdMob Privacy Information

Your Choices

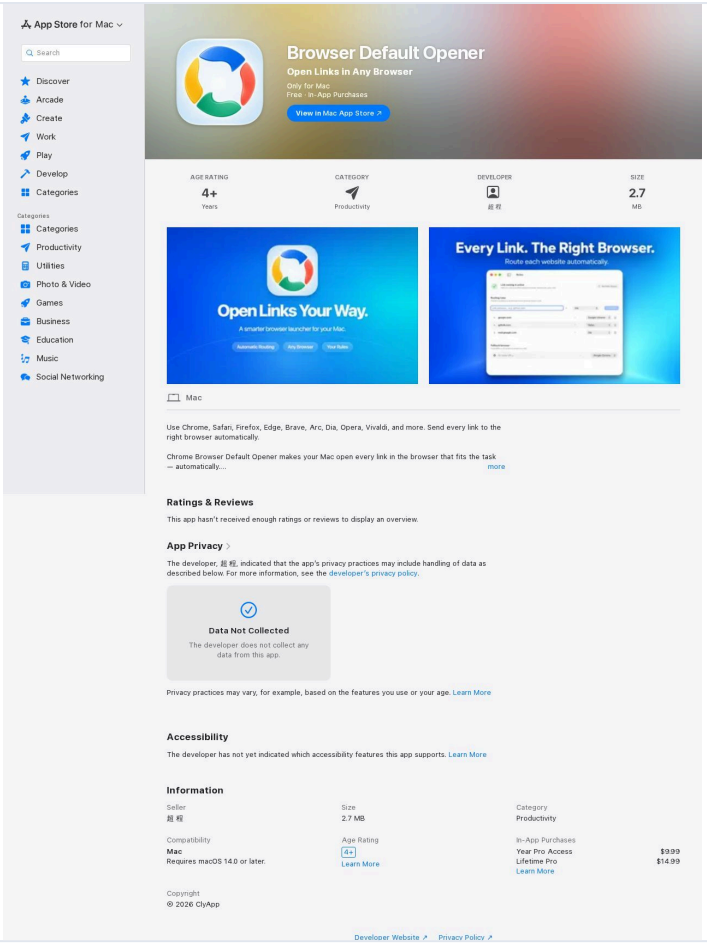

You can opt out of personalized advertising by:

- **iOS:** Go to Settings > Privacy > Advertising > Enable "Limit Ad Tracking"

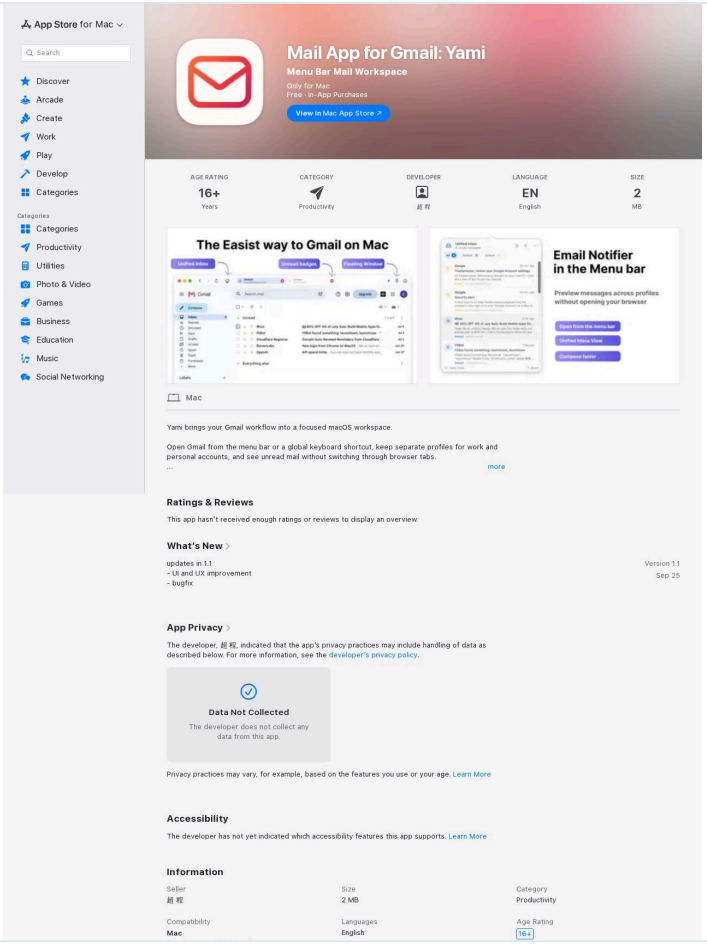

Changes to This Policy

We reserve the right to update this Privacy Policy at any time. We will notify you of any changes by posting the new Privacy Policy on this page and updating the "Last Updated" date. Your continued

WHAT YOU NEED TO KNOW

“App for” plus a familiar Google brand can mislead buyers about who made the app.

01

“App for” + a Google brand is the leading misleading-presentation finding.

The repeated Google-led naming formula in GSearch, Yami and Workspace can suggest an official product when combined with familiar service imagery. Browser Default Opener uses Chrome-led description wording and a Chrome-like ring. All are published by chao cheng / ClyApp. This is an editorial impersonation assessment of the combined presentation, not a rule that every compatibility reference is forbidden.

Original current icons, all 18 promotions, exact listing descriptions and official Google reference.

E17 E20 E5 E8 E13 E14

02

All four point to a contradictory shared privacy policy.

Apple labels say Data Not Collected. Linked policy says AdMob and describes identifiers, IP/location, device and usage data. Actual tracking or mail access was not established; an incorrect generic policy is a possible explanation that still needs correction.

Exact linked privacy page and Apple labels, retained in supplied captures and fetched HTML.

E21 E5 E8 E13 E14

03

One exact Apple account holds the four apps and 22 more.

Developer ID 1304170321 returns 26 products. Catalog, exact bundles, original icons and a labelled diagram separate primary findings from ordinary related utilities. No second Apple account proven.

Fresh Apple account/product lookups and visible profile.

E18 E19 E17

04

A documented public identity connection reaches China.

GitHub defcc links the exact ClyApp domain; official Vue defcc card links the same GitHub account and lists Chongqing, China. This is profile-location context, not nationality or an Apple trader-country disclosure.

Fresh GitHub record and rendered official Vue team card.

E23 E24 E25

05

The wider trail includes a Chrome extension and a browser successor.

ThreadKeep shares exact contact/policy identifiers; ClyApp explicitly promotes Monster as FloatBrowser's successor. These are published product/support links, not a confirmed legal owner, account ban or an accusation against every linked product.

Current Chrome Web Store record and exact publisher website.

Version

Browser Default Opener 1.0; Mail App for Gmail: Yami 1.1; Workspace Apps for Google App 1.6; App for Google Search: GSearch 1.2

First released

Workspace 8 April 2025; GSearch 19 July 2026; Yami 5 August 2026; Opener 7 August 2026

A Chrome-like ring on an app that routes links.

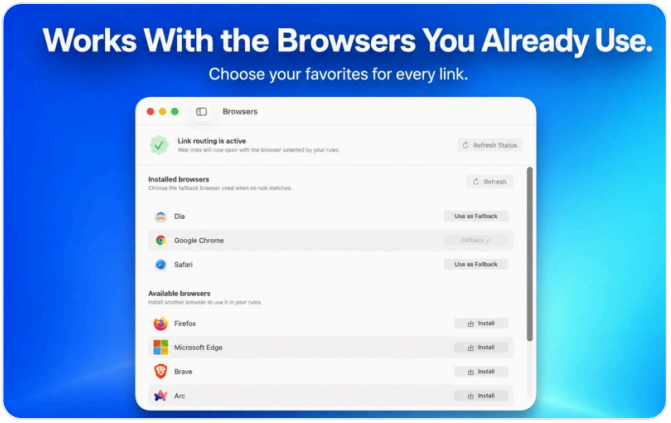

The actual App Store title is Browser Default Opener. Its description repeatedly calls it Chrome Browser Default Opener and its disclaimer uses Opener for Chrome Browser. Those are description labels, not separate verified product names.

The icon uses glossy blue, red, green and yellow segments around a white centre. Google Chrome’s current official icon has its own coloured circular design and a blue centre. The files differ, but the deliberate-looking combination of a Chrome-style ring and Chrome-led wording creates a misleading Google association in this report’s assessment.

The listing describes a link router: it becomes the default handler for web links and sends them to installed browsers according to rules. That can be useful, but it is a different product from Chrome itself. It is not described as a Chrome extension. Its free tier allows 10 routed links per day and five rules; paid features remove those limits.

Original current promotion puts the multicolour ring above “Open Links Your Way”. E17.

Original promotion describes routing to installed browsers. Showing compatible browser choices alone is not proof of impersonation. E17.

Browser Default Opener · exact Apple listing

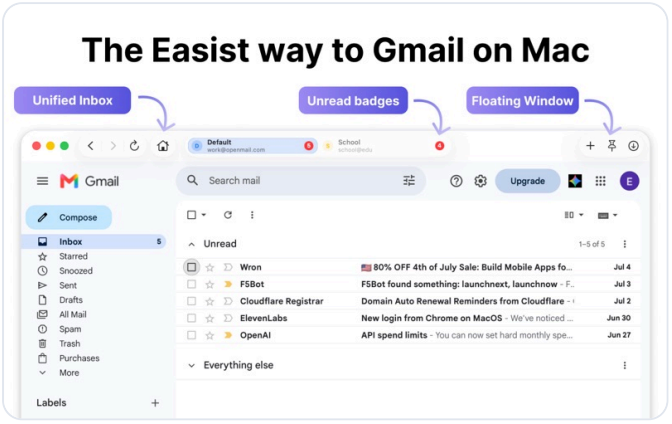

E5/E17/E20/E37

Yami sells access to a Gmail-style workspace.

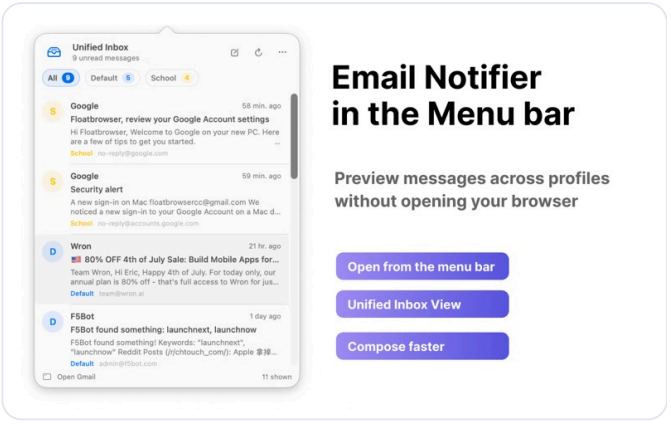

Mail App for Gmail: Yami uses a red outline-envelope icon and Gmail in the title. Its promotions display Gmail’s own interface and current Google marks inside the mail window. It is published by chao cheng, not Google LLC.

The red envelope is not identical to Google’s current multicolour M. The strongest identity issue is the combined Gmail-led name, familiar mail presentation and paid third-party wrapper. A generic envelope or a compatibility reference alone would not establish copying.

The description promises separate profiles, unread previews and notifications, and includes an independence disclaimer. Those are the developer’s claims; no Google login, email access or notification traffic was tested. The shared AdMob policy does not clearly explain this Gmail-facing Mac product.

Original Yami promotion displays the Gmail interface and Google’s current Gmail mark. E17.

Original Yami promotion advertises previews across profiles. The pictured messages are developer marketing content, not this investigation’s mailbox. E17.

Mail App for Gmail: Yami · exact Apple listing

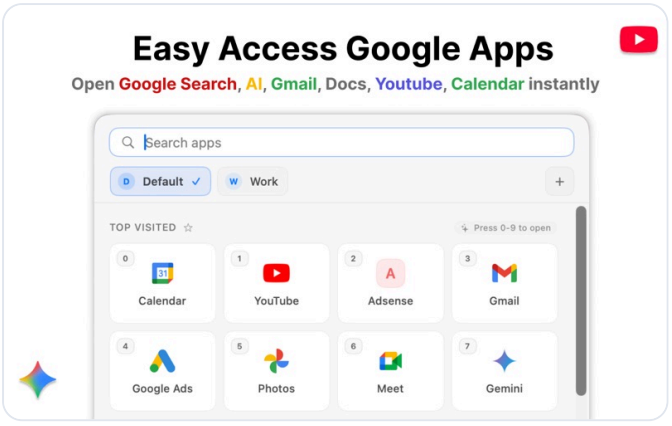

E8/E17/E20/E21

Workspace and GSearch trade on Google’s product names.

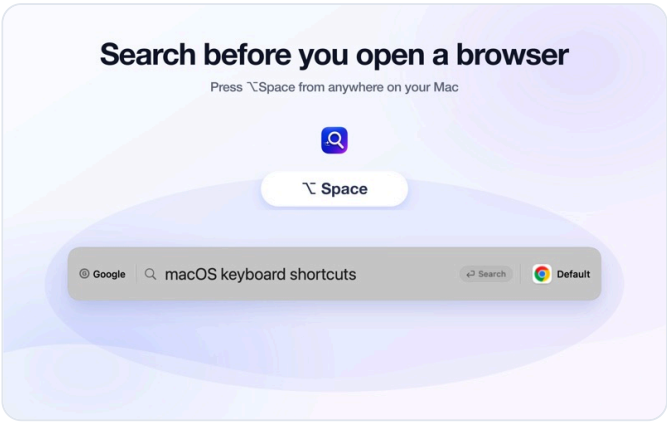

Workspace’s title, subtitle and first screenshot put Google services at the centre of the pitch. Its app icon rearranges four Google-like colours into four equal dots. Its screenshots prominently reproduce recognisable service logos and Gmail windows. The disclaimer says it is independent; it does not change the identity encountered first.

GSearch is more clearly described as a launcher: it builds a search destination and hands it to a browser. Its free tier allows five submitted searches per day with Google and the default browser. The paid tier unlocks unlimited searches and more browser/engine choices. It is a convenience layer, not a Google search subscription.

A payment for a third-party shortcut utility is not automatically fraudulent. The actionable questions are whether the combined name and artwork mislead buyers, whether brand use is authorized, and why the linked privacy explanation conflicts with the store labels.

Workspace’s original promotion uses Google product names and service icons. E17.

GSearch’s original promotion puts Google search and Chrome-default branding in the panel. Its purple app magnifier is a separate design. E17.

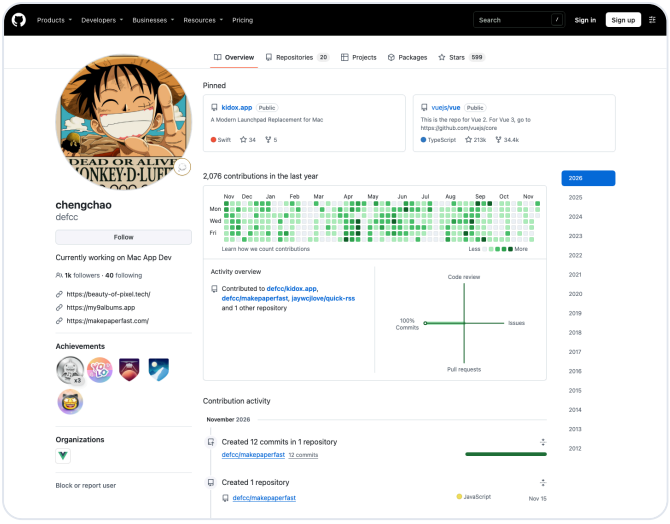

E13/E14/E17/E21/E37

The public identity trail leads to Chongqing, China.

The Apple provider is chao cheng; the linked website brands the portfolio ClyApp. GitHub user defcc, display name chengchao, links exactly beauty-of-pixel.tech. The project support address uses the same defcc handle. That is a stronger connection than a matching name.

Vue’s official emeritus-team card links the exact GitHub account and the publisher’s IndieFollow project, and lists Chongqing, China. This documents the developer identity’s China association. It does not identify citizenship, ethnicity or a registered commercial address; Vue is not implicated in the app findings.

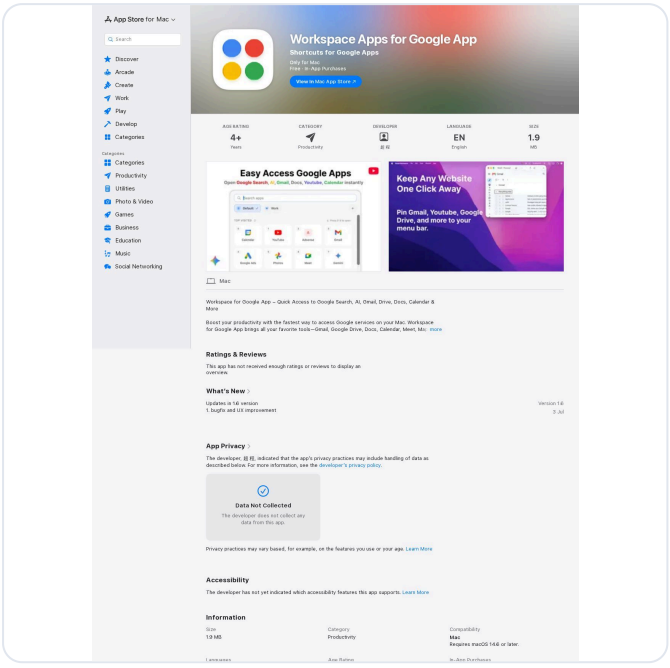

A further ClyApp profile, cal.com/clyapp, links my9albums.app and a paper-generator project but displays New York, US. These are different public profile-location statements, not verified legal addresses. Apple’s DE/IE panels remain non-trader disclosures without a registered business country. The report therefore states the evidenced Chongqing/China association clearly while leaving the unresolved commercial-country fields Unknown.

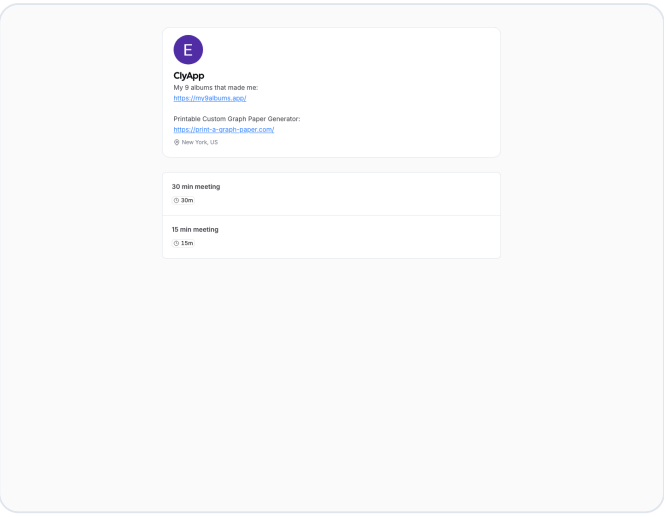

Current GitHub profile links the exact ClyApp domain and identifies Mac app development. E24.

Native capture of the official Vue defcc card: Chongqing, China, with the exact GitHub identity. Professional-profile location, not an Apple trader address. E25.

Supplied Irish Workspace snapshot: provider chao cheng has not identified as a trader. E4.

Further identity check: ClyApp's scheduling profile links the same poster project and displays New York, US. Profile label, not a verified company address. E49.

GitHub: defcc / chengchao Vue's official team page · Core Team Emeriti

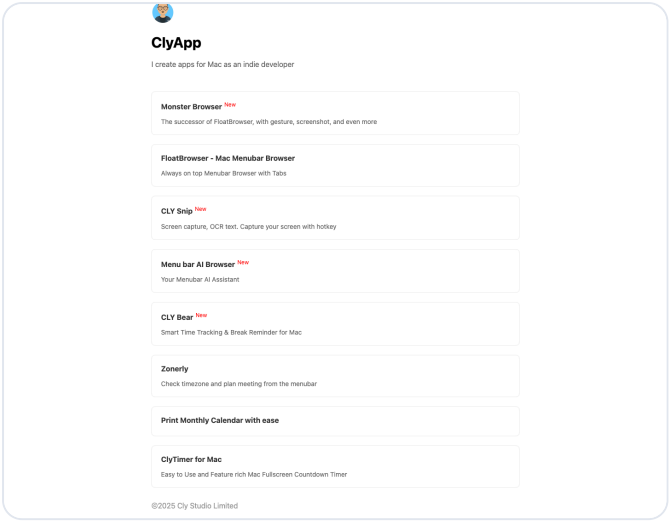

E23/E24/E25/E13 / E49

The company name is visible; the legal identity is incomplete.

The main website footer says Cly Studio Limited. A Hong Kong Companies Registry list records an exact-name CLY Studio Limited, Business Registration Number 76366476, incorporated on 27 March 2024. BRN means Business Registration Number.

The website does not print that number or identify a director, so the legal-entity match remains a lead rather than a verified ownership conclusion. The Monster site instead uses Cly app, LLC. This inconsistent public company naming deserves clarification before consumers can know which legal business they are paying.

A similarly named UK Clyapp business found in search results uses another domain and different products. No reliable bridge to this Apple account was found; a similar company name is not enough. No current corporate status, dissolved-company claim or director name is invented from commercial directories.

ClyApp homepage footer displays Cly Studio Limited and explicitly promotes Monster as FloatBrowser's successor. E22.

E22/E26/E29

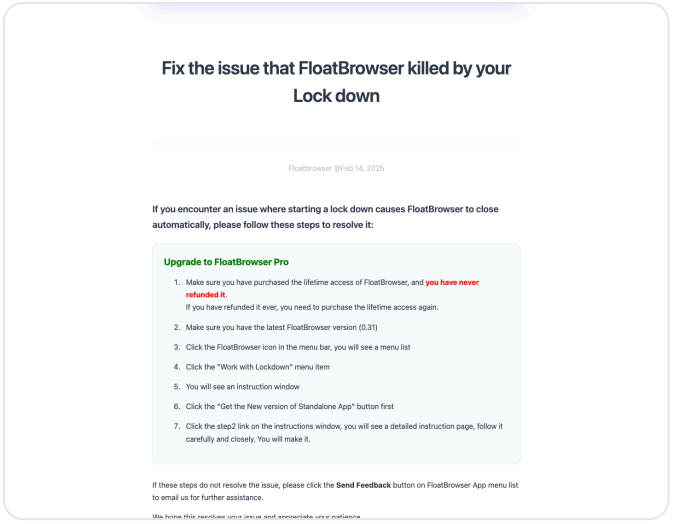

A wider browser business, with an unusual support trail.

Apple returns FloatBrowser, One Chat, MrSeek and CLY Snip on the same account as the four main utilities. The publisher website promotes them together and explicitly labels Monster Browser as FloatBrowser's successor. This is documented product continuity, not evidence of a new Apple account.

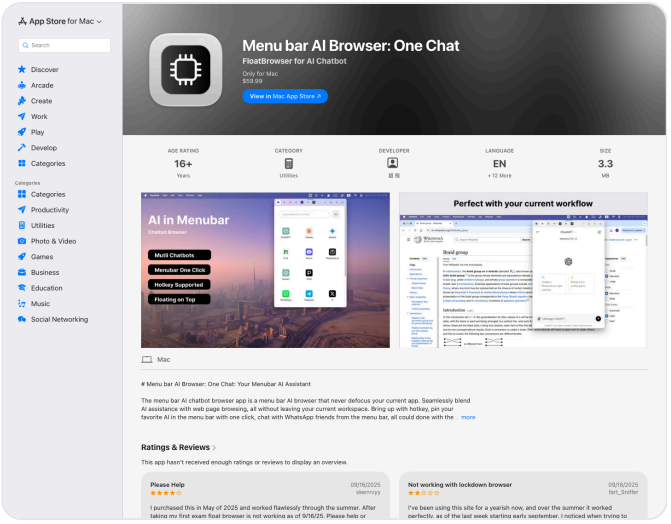

The current FloatBrowser support site still hosts a Lockdown-related help article that directs purchasers towards paid browser products and promotes discreet background operation. One Chat's Apple page contains buyers complaining about exam-browser compatibility. These are published marketing/support statements and individual reviews; actual bypass capability was not tested.

FloatBrowser's current version 0.32, released 11 May 2025, says Lockdown-related branding/features were removed. The still-live support article and successor promotion show why the wider product trail matters. Its posted February date is not treated as proof that every current paragraph existed then.

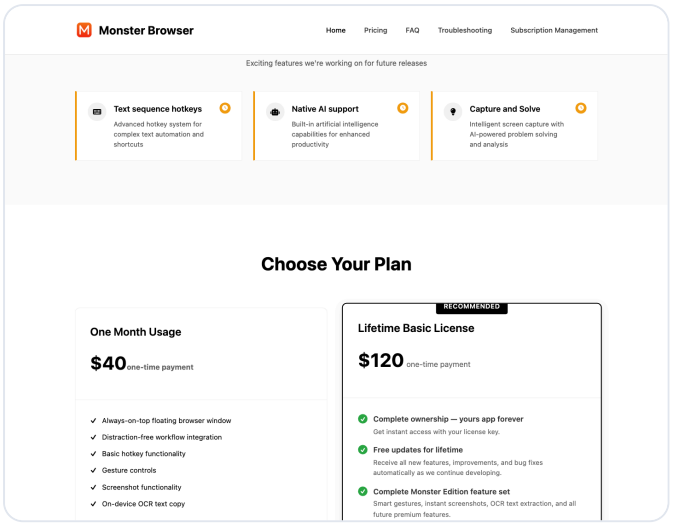

Monster currently advertises $40 for one month of use and $120 for a lifetime basic licence, says there is no trial, and excludes refunds after activation. It also lists some advertised AI functions as coming soon. This is a separate direct-sale offer, not the price of the four main App Store apps; no checkout was used.

Current publisher support article and product cross-promotion, dated 14 February 2025 on the page. Posted date does not establish the date of every current edit. E28.

One Chat's current Apple listing: same account, subtitle FloatBrowser for AI Chatbot, $59.99 and visible compatibility complaints. E30.

Current Monster Browser website: $40 one-month use and $120 lifetime basic offer, separate from App Store prices. E29.

Publisher support article One Chat · exact Apple listing Directly promoted Monster Browser website

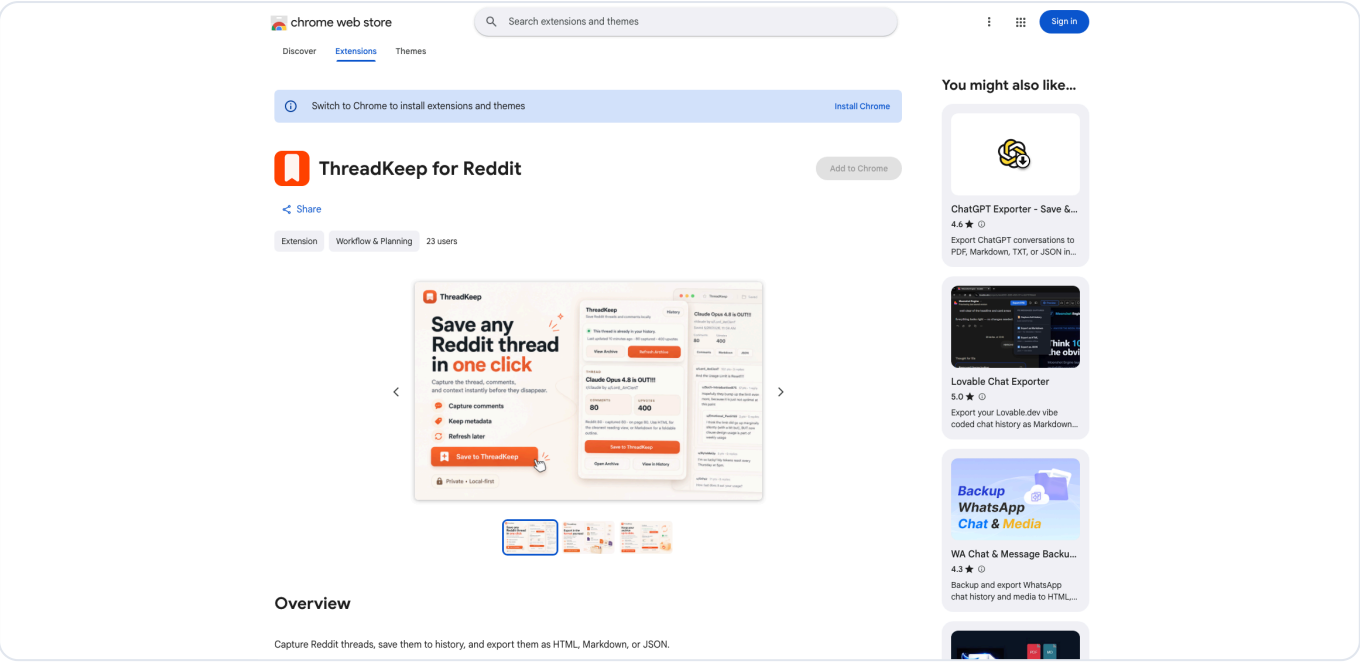

E18/E22/E28/E30/E29

The same contact and policy appear on the Chrome Web Store.

ThreadKeep for Reddit is offered by ClyApp on the Chrome Web Store. It publishes the exact same support address and privacy URL as the ClyApp trail. These two matching identifiers make this a documented cross-store connection.

ThreadKeep describes archiving Reddit threads and discloses handling website content. Its current icon is a white bookmark on orange, not Reddit's mascot. This investigation did not establish that this extension impersonates Reddit or is unsafe; it was not installed.

Other linked projects include the public KidoX source repository and my9albums.app, which the GitHub profile itself lists. Those are product/profile associations, not additional Apple accounts or automatic fraud findings. The older Zonerly site's FloatWidget link still lacks a verified publisher match.

Current Chrome Web Store ThreadKeep entry after dismissing the consent page. Exact shared contact and privacy URL are in the linked store's Details/Privacy sections. E27.

ThreadKeep for Reddit · Chrome Web Store KidoX · public repository of the linked GitHub identity

E27/E24/E31/E32

The other connections, checked one by one.

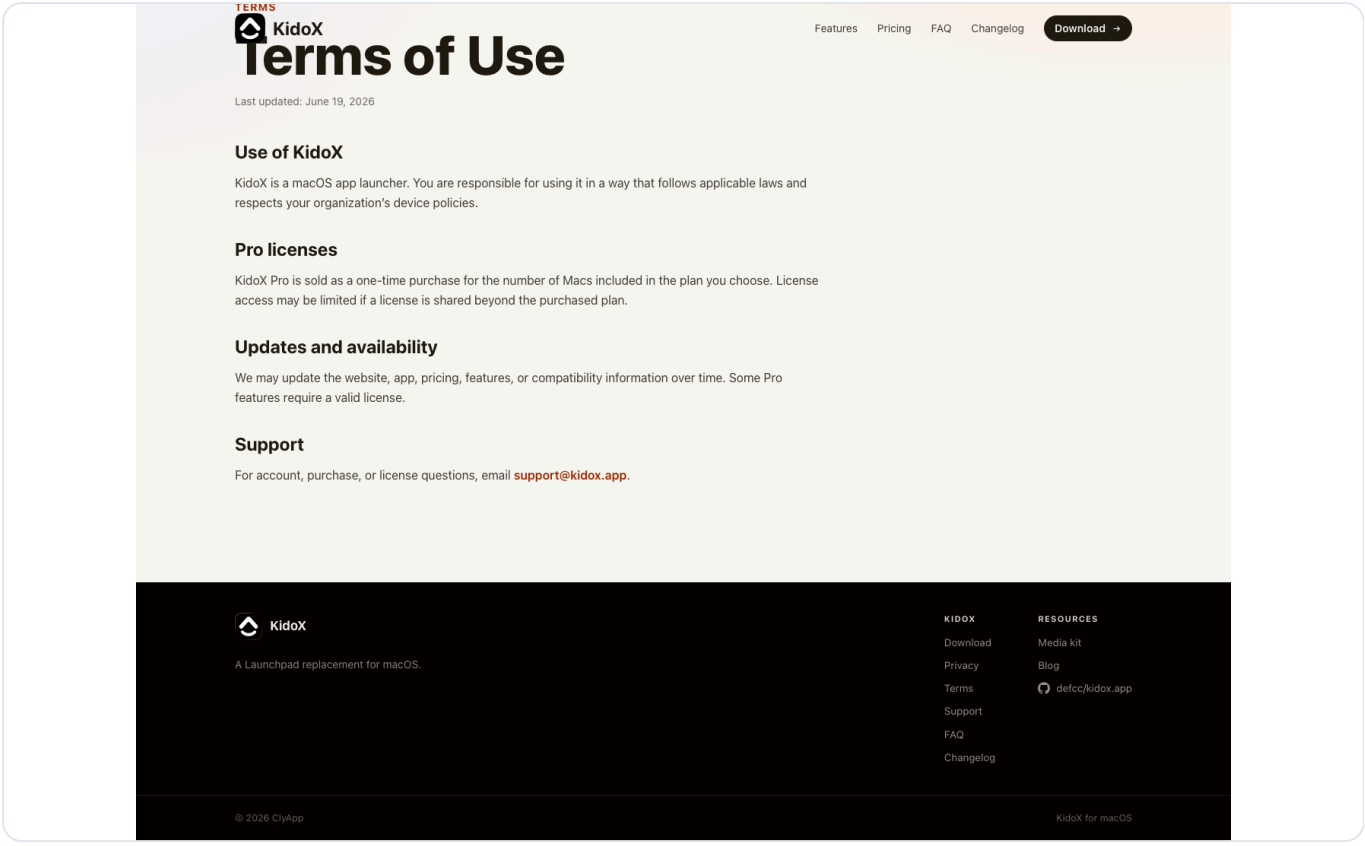

KidoX is a stronger connection than a casual website link: the defcc repository points to kidox.app, and KidoX's own terms link back to that repository and display ClyApp. Its public project source uses the bundle com.clyapps.KidoX. This corroborates the product/brand trail; a source signing-team setting does not establish the shipping signature of the four App Store apps.

MakePaperFast is also a repository under the same exact defcc GitHub account, with makepaperfast.com as its stated homepage. GitHub's profile links my9albums.app directly. That site links the ClyApp scheduling profile, which in turn lists print-a-graph-paper.com. PaperMan's footer explicitly groups My 9 Albums, StorybookAI and CubiZoo under More by us.

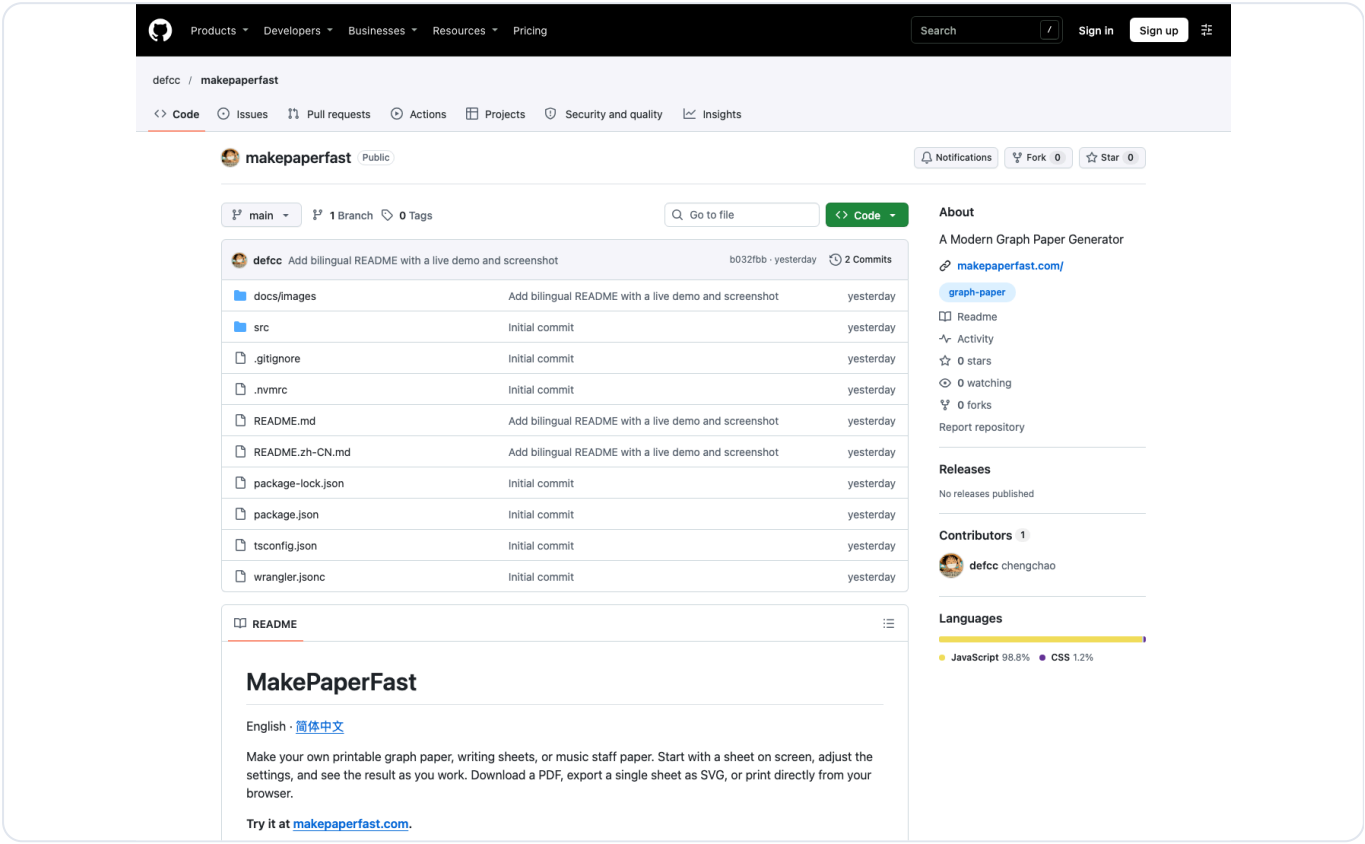

These are documented public project associations with different strengths, not proof that every site shares one legal owner or commits the Google-brand misuse documented in the four main listings. StorybookAI uses a separate contact and describes a two-person team without naming them. No extra Apple developer account or Chinese citizenship was established.

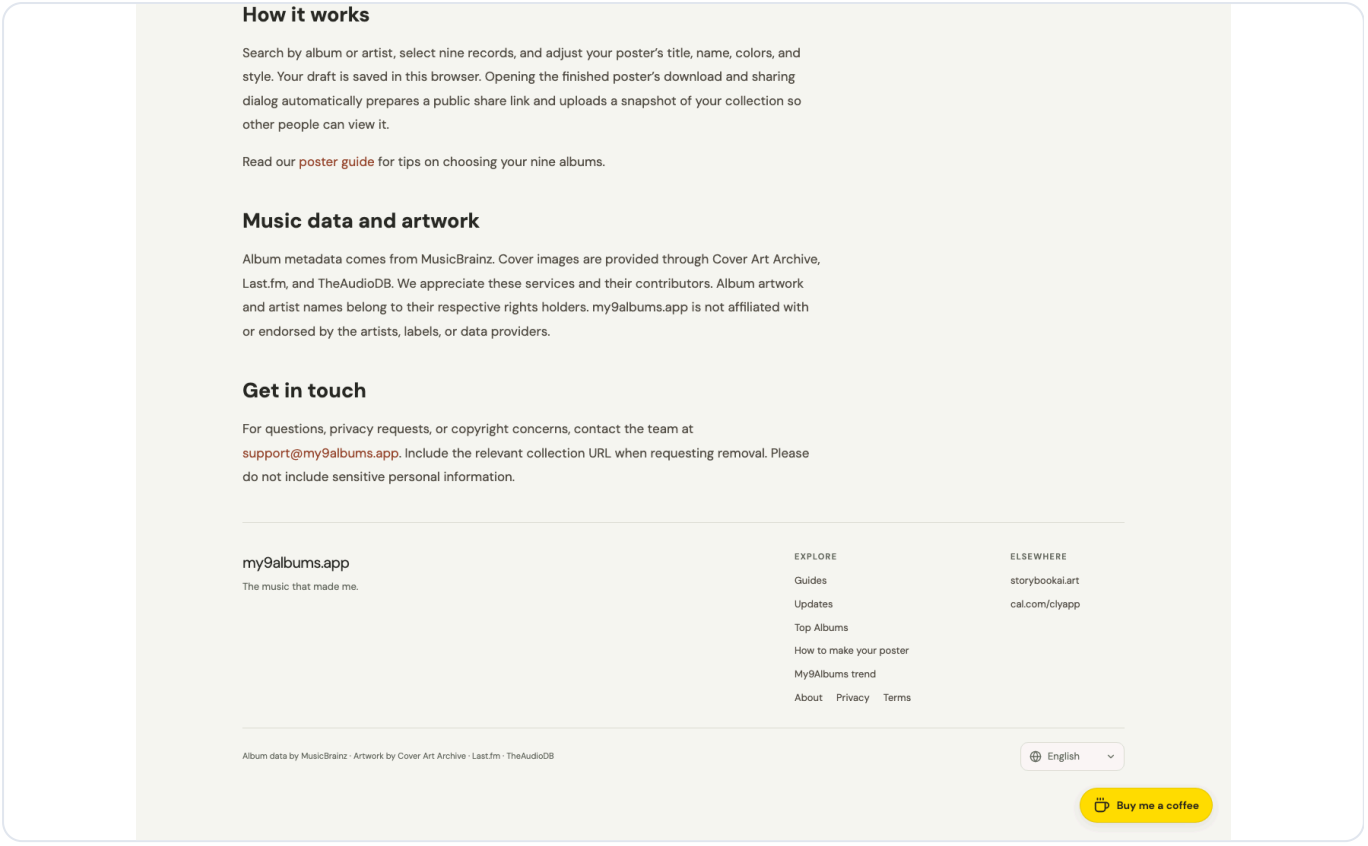

Expanded public project connections: reciprocal KidoX/ClyApp links, same-account GitHub projects, profile links and the explicitly claimed PaperMan portfolio. Location labels and legal ownership remain distinct. E23/E25/E44/E46/E48/E49/E50.

KidoX's own terms identify ClyApp and link the exact defcc repository, corroborating a reciprocal project connection. E44.

MakePaperFast appears under the same defcc GitHub account and identifies its exact website. E46.

The directly identified my9albums.app About page links ClyApp's scheduling profile and StorybookAI. E48.

What each relationship establishes

Project / link	Evidence connecting it	Finding strength
KidoX ↔ defcc / ClyApp	Reciprocal repository/site links and ClyApp footer in first-party terms.	Verified public project/brand association; no second Apple account identified.
MakePaperFast ↔ defcc	Same exact GitHub account owns the repository and lists the product homepage.	Verified public repository/project association.
my9albums.app ↔ defcc	Exact domain on GitHub profile and social-account records.	Verified profile-to-product association.
ClyApp / PaperMan / poster project	my9albums.app links cal.com/clyapp; that ClyApp page links both poster and paper-generator domains.	Documented self-described project association; no registered legal owner identified.
PaperMan → StorybookAI / CubiZoo	First-party footer explicitly groups these domains under More by us.	Verified site portfolio claim; legal ownership and individual misconduct not independently proven.
China / US profile locations	Vue defcc card: Chongqing, China; linked ClyApp scheduling profile: New York, US.	China identity association documented; commercial address and citizenship unresolved.
Hong Kong CLY Studio Limited	Same-name official formation record; main app site has no BRN/director.	Qualified legal-entity lead only.
Other Apple developer accounts	No matching publisher ID or shipping signing identity recovered for another Apple account.	Not established; do not turn website links into an Apple-account network.

KidoX terms · ClyApp copyright and repository link GitHub · defcc/makepaperfast my9albums.app · exact .app domain

ClyApp · public scheduling profile PaperMan · explicit More by us portfolio

E44/E45/E46/E48/E49/E50/E52/E53/E54

The domains provide supporting context, not an owner shortcut.

The publisher domain was registered on 27 April 2023 through Alibaba Cloud/HiChina. Its current DNS route points to a Netlify site. Mail records point to Tencent enterprise mail; public TXT records include mail, Google and Paddle service verification.

Those details identify service providers and configuration. They do not identify another app owner, prove a China address or connect this seller to earlier reported networks. The China association comes from the exact public developer-profile trail, not from the registrar or mail provider.

Archive checks did not recover a dated original-to-Google icon change for these four apps. Two indexes returned empty lists, one timed out and one returned a service error. Current release notes and today's snapshots cannot substitute for missing launch-era artwork.

Domain registration record Current website DNS route Current mail routing

E33/E34/E35/E36/E39/E40/E41/E42

What Apple should review, and why.

The leading impersonation point is the repeated "App for" + Google-brand naming formula, combined with recognisable Google service imagery. Browser Default Opener adds the strongest icon resemblance through a Chrome-like ring and repeated Chrome-led description. These combined identities can mislead users into taking an independent utility for a Google-issued product. Apple should assess that first impression and verify any required permissions.

The privacy contradiction applies to all four main listings and needs a product-specific correction. No court finding, private licence decision, proven credential theft or Apple enforcement reason is asserted. No app was installed, no email account connected and no purchase made.

Observed conduct mapped to current rules

Rule	Requirement in plain English	Documented trigger / assessment
2.3 / 2.3.7 · Metadata	Describe the actual app and use a distinctive name; avoid misleading trademark/name packing.	App for Google Search, Mail App for Gmail and Workspace Apps for Google App foreground Google brands; a separate router calls itself Chrome Browser Default Opener in its description. Apparent misleading identity / metadata concern; rank manipulation not measured.
4.1(a–c) · Copycats and impersonation	Do not imitate another app's identity or use its icon/brand in your own identity without approval.	Chrome-like multicolour ring plus Chrome wording; Google/Gmail-led listings and marks. Overall presentation requires review; no private approval record verified.
5.2.1 / 5.2.2 · Third-party rights and services	Avoid misleading/copycat identity; obtain required rights for third-party service use.	Paid Google-facing utilities and reproduced marks/interfaces. Permission should be checked by Apple; no definitive legal infringement ruling made.

Rule	Requirement in plain English	Documented trigger / assessment
5.1.1(i) · Privacy policy	Explain what the specific product collects, how it is used and third-party access.	Data Not Collected labels versus the exact linked AdMob/device/advertising-data policy. A documented public-disclosure contradiction; actual tracking not established.
4.2 · Minimum functionality	A wrapper should offer useful features beyond a repackaged website.	Listings claim routing, profiles, hotkeys and notifications. Those claimed features must be assessed in review; no violation inferred just from opening a website.

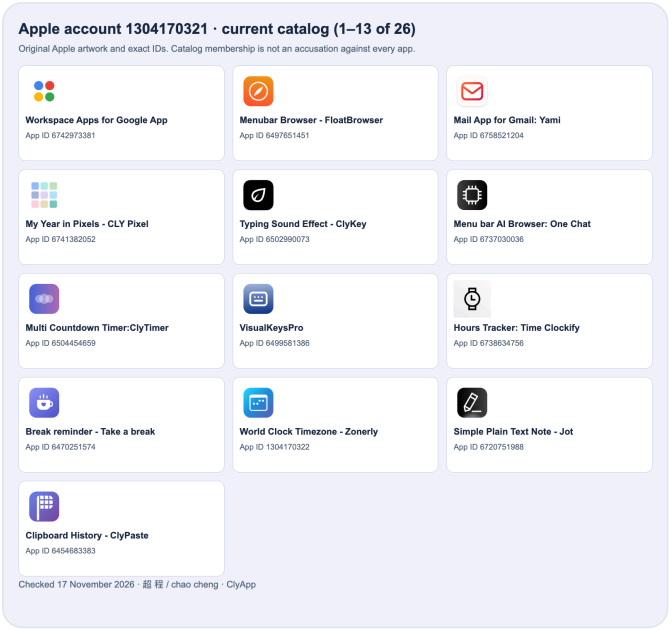

Apple App Review Guidelines Google brand guidance

E38/E37/E21/E17

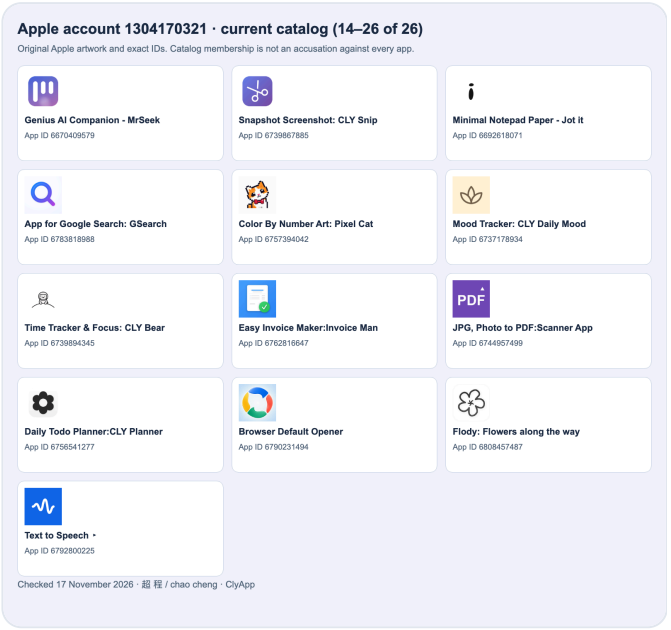

The complete current account: 26 apps, screened separately.

The following original-icon catalog and exact-ID inventory document the wider account. The four Google-facing utilities received the detailed branding, disclosure, pricing and provider review above. The remaining titles, icons and public descriptions were screened; a shared account is not a verdict against every product.

One additional naming lead is Hours Tracker: Time Clockify, app 6738634756. Clockify is also the name of a separate established time-tracking service. The app uses a black watch icon, not a recovered identical Clockify logo. Its naming deserves a separate rights/affiliation check; no confirmed licence breach is claimed here.

Original current Apple artwork, account catalog entries 1–13. Membership is verified; individual findings are separated from the account match. E18.

Original current Apple artwork, account catalog entries 14–26, exact names and IDs. E18.

2017-11-12

Earliest product currently returned under this Apple account

World Clock Timezone - Zonerly, app 1304170322. Current catalog history does not prove unchanged ownership since 2017.

2023-04-27

Publisher domain registered

beauty-of-pixel.tech registration date; registrar is Alibaba Cloud/HiChina. Registrar location is not operator location.

2024-03-27

Same-name Hong Kong company formed

Official weekly registry list records CLY Studio Limited, BRN 76366476. Exact match to website legal operator remains unverified.

2025-04-08

Workspace first-release field

App 6742973381. Later notes add an in-app browser on 8 May 2026; no earlier icon recovered.

2025-05-11

FloatBrowser current version 0.32

Current release notes discuss removing Lockdown-related branding/features. Current support website continues the related product trail.

2026-01-20

Date shown on the shared policy

AdMob policy linked by all four main apps. The date is the page's own label, not a recovered archived version.

2026-07-19

GSearch first release

App 6783818988; version 1.2 on 5 August. Current free tier and Pro limits documented.

2026-08-05

Yami first release

App 6758521204; mobile-style Gmail icon claim assessed against original current Gmail brand reference. Apple version history labels 1.0 on 6 August; API first-release field is 5 August.

2026-08-07

Browser Default Opener first release

App 6790231494, version 1.0. Chrome-like identity and link-routing description captured.

2026-11-17

Four supplied snapshots and fresh investigation

All 46 supplied pages read; 26-app catalog, 18 promotions, current policies, exact identity links, official Google/Apple guidance and qualified company/legacy leads reviewed. Further checks strengthen KidoX and MakePaperFast project links, document the PaperMan portfolio claim and retain the conflicting ClyApp profile-location label.

CHECK THE SOURCES

The records behind this report.

Written investigation followed by all 46 pages of the four supplied PDFs, preserving their visible content and source records. Original app/official icons, all 18 primary promotions, original embedded source screenshots, loaded current site/profile captures and connection diagrams are included. Some later Apple browser requests were rate-limited, so supplied morning screenshots are labelled with their actual capture dates. No software installed/run, account connected, exam-system test, purchase or developer contact. The revised opening leads with the App for + Google-brand naming formula. Expanded public project links are graded separately from Apple-account identity and misconduct findings.

SHA-256: be995d5db698205582be8dae021a7cb77846f5d2b47a85c542acca9bdd45ec4c

E17 / Exact identities for all four main products

All four return developer 1304170321, seller 超 程 and exact bundle identifiers. The Mac products are free to download with paid feature offers. Original current icons and 18 Mac promotions recovered from these records. Fresh HTTP 200.

Open source ↗

SHA-256: cdfa0068198e32fac1f4a2a85f74414438e41f7a83f1ead4186d05c9b92a68c9

E18 / The current Apple account returns 26 products

Apple software lookup returns 26 software records plus one artist record. All have the same developer ID and seller. Catalog spans 12 November 2017 to 23 September 2026. Mac-only lookup returns an artist but no software; this is a filter limitation, not evidence of disappearance. Title, icon and description screening is separate from the four detailed branding/disclosure assessments. Fresh HTTP 200.

Open source ↗

SHA-256: ba683fc949e05d0714ff6606e9fd2b562b123c669afcabb9301c481b3248d8b9

E19 / Visible Apple publisher profile

Public account 超 程, developer ID 1304170321, also identified as chao cheng in EU panels. One Apple account is verified; no additional Apple account was established from the site/profile trail. Fresh HTTP 200.

Open source ↗

SHA-256: fd515630c59f2539462c91a0b42fe42aa53e416269f47bf48712115710102108

E20 / Correct official Google artwork references

Original Apple-hosted icons for Google, Gmail, Chrome, Drive and Gemini, seller Google LLC, developer 281956209. The Chrome and Gmail mobile-app artwork is used as a brand reference, not presented as a native Mac product. GSearch's purple magnifier and Workspace's four dots are not identical to the official Google G. Fresh HTTP 200.

Open source ↗

SHA-256: d4db77def4bf99dee66ca1dd2ab10f9deb2ce73cb84afc6f149abb9c5977b9c8

E21 / The privacy page linked by all four listings

Policy dated 20 January 2026 says the app uses AdMob and describes advertising identifiers, IP/approximate location, device and usage information. It supplies mobile iOS/Android examples and an old iOS advertising-setting instruction, despite the four Mac listings. This conflicts with the published no-data labels and the local-only advertising-free wording of some descriptions. Actual SDK use, traffic, tracking or access to mail was not tested. A wrong generic policy is another possible explanation; either way the public disclosures need correction. Fresh HTTP 200.

Open source ↗

SHA-256: 1699e74775dd4994dac2f48e6987a8b2d4b3c703307e23e523a375843e6fc045

E22 / ClyApp website and explicit successor statement

Exact domain linked by Browser Default Opener. Homepage describes an indie Mac developer, lists FloatBrowser, One Chat, CLY Snip, MrSeek and other products returned on the same Apple account, and explicitly calls Monster Browser the successor of FloatBrowser. Footer displays Cly Studio Limited; it supplies no registration number. Fresh HTTP 200.

Open source ↗

SHA-256: 4186f8b0fbc284e43c9b6414d07958a61419d554281a60670a0b3e505715f4b8

E23 / Public developer identity: GitHub defcc

GitHub account defcc, display name chengchao, links the exact beauty-of-pixel.tech domain. Its API location/company fields are empty. This is not a name-only identity match: exact project domain and public support handle bridge the records. The profile alone does not establish legal ownership or current residence. Fresh HTTP 200.

Open source ↗

SHA-256: a7c32f4804e1ff50a18a7560feab6b3f3beb0ab0c46da5a706de519c804ec717

E24 / Visible GitHub profile links the app website

Profile identifies Mac app development and links beauty-of-pixel.tech and my9albums.app. Public projects are identity/product context, not automatically accused apps. No private repositories or code were run. Fresh HTTP 200.

Open source ↗

SHA-256: a41d445ecc9eca37f96b5be9f3abf331c4ca68a115e10f82e4e27540460c3057

E25 / Official Vue profile identifies Chongqing, China

Rendered Vue Core Team Emeriti card for defcc says Chongqing, China and links exactly github.com/defcc and indiefollow.top. Native card and page captured. Together with GitHub's exact app-site link, this documents a professional-profile China association. It is not an Apple trader declaration, proof of present residence or nationality, and says nothing negative about Vue itself. Fresh HTTP 200.

Open source ↗

SHA-256: f6550bce6879f8eba8653708adbd248ecff15bc744c40a0f42766851ef858691

E26 / Hong Kong official record: same company-name lead

Hong Kong Companies Registry weekly list for 25–31 March 2024, PDF page 25, row 441: CLY Studio Limited, BRN 76366476, incorporated 27 March 2024. The app website uses the same company name but gives no BRN or director identification. The precise legal-entity match, directors and current corporate status remain unverified; no commercial-directory dissolution claim is promoted to an official finding. Fresh HTTP 200.

Open source ↗

SHA-256: 96738182927d7828a2fd08995db9825d25290c2638b0b003778755b37042e434

E27 / Chrome Web Store bridge: ThreadKeep for Reddit

Extension nkbakkpllhfdmfkicmmjagcmdmkgklii is offered by ClyApp and publishes the exact same project contact and beauty-of-pixel.tech privacy URL. This establishes a published contact/policy connection across stores, not another Apple developer account. The extension handles website content according to its store disclosure. No Reddit impersonation, unsafe extension behavior or common legal owner was separately proven; it was not installed. Fresh HTTP 200.

Open source ↗

SHA-256: b54266990c59b580a7421e2e9453a0a7525b803a42c1ed7ca9da5aa491703442

E28 / The publisher's current Lockdown-related support article

Current support article is dated 14 February 2025 and promotes a paid FloatBrowser route plus Monster Browser, One Chat and CLY Snip. The page promises discreet background operation. The posted date is not proof that all current wording existed then; its current version references do not authenticate that date. No examination-system bypass was tested, endorsed or reproduced by this investigation. Fresh HTTP 200.

Open source ↗

SHA-256: 42fbb0c583a8db4310eb3c6b541cde95ec58f42ac5805b28cefacb1a0912f73e

E29 / Monster Browser: explicit same-product-family promotion

Directly promoted as FloatBrowser's successor on the exact publisher site. Current website prices $40 for one month of use and $120 for a Lifetime Basic License, both described as one-time payments; no purchase tested. It says no trial and no refund after activation. Some AI features advertised above are also listed as coming soon. Footer says Cly app, LLC, while the main site says Cly Studio Limited; no legal registration number supplied. Fresh HTTP 200.

Open source ↗

SHA-256: 6925f7e0372a0acf2ac8474f0b1b2b3b6180ab17d31618505ec6b996bf27f2c7

E30 / One Chat corroborates the wider browser trail

Menu bar AI Browser: One Chat, 6737030036, same developer 1304170321, current US price $59.99. Exact subtitle FloatBrowser for AI Chatbot, own neutral chip icon, multi-service screenshots and buyer complaints about Lockdown compatibility. A site link corroborates account membership already proved by Apple. Related product, not a copied Google icon verdict. Fresh HTTP 200.

Open source ↗

SHA-256: dfacdc677bf82f3a3d558d02158b91664236a73c94d1f3a841e366bfc52a2454

E31 / An older linked product site and an unresolved outgoing app link

Zonerly site publishes the same project support handle and links exact ClyPaste/Take a Break products on this account. It also links FloatWidget 6473470057, which is not in the current account catalog; checked lookups return no app and product pages are rate-limited. An outgoing link alone does not establish another publisher or common ownership. FloatWidget is an unresolved historical reference, not a proven removed scam. Fresh HTTP 200.

Open source ↗

SHA-256: ba03fccf82eddaf1e288710d5ecf472e24861e6ffb94b8a34f0a37944532a54c

E32 / FloatWidget exact-ID lookup lead

US exact lookup for 6473470057 returns no software. No current bundle or developer recovered. No confirmed removal or account link inferred from the lookup alone. Fresh HTTP 200.

Open source ↗

SHA-256: 7f5ce663b726607eae2fde2a6dc438052ac0d1681e636de7cc3377c0bb77e047

E33 / Domain registration record

beauty-of-pixel.tech registered 27 April 2023, registrar Alibaba Cloud/HiChina, nameservers dns11/dns12.hichina.com. Published registrar addresses identify the registrar, not the app operator. The checked public response does not identify an app-specific beneficial owner. Fresh HTTP 200.

Open source ↗

SHA-256: 843f3b66eec282257ad711774f62fb7998b71400c331018dfbf6907712803d9e

E34 / Current website hosting route

DNS CNAME points to whimsical-mandazi-43de84.netlify.app with current edge addresses. This supports Netlify routing at the check date; no origin history, shared owner or country is inferred from hosting. Fresh HTTP 200.

Open source ↗

SHA-256: 40591e42af78a279a3af12b3a20499e9a5d3107f7b1894119acadd19d95155fb

E35 / Current mail-server route

Domain MX records point to Tencent enterprise mail mxbiz1.qq.com and mxbiz2.qq.com. Mail provider use is infrastructure context, not proof of a second account, China residence or fraudulent conduct. Fresh HTTP 200.

Open source ↗

SHA-256: c47200a23c2b6e0c1b7b17728dd8215caac66d408d093fcd4340a31b6e66ffdc

E36 / Current verification and mail configuration

SPF includes Tencent mail, and TXT records contain Google site and Paddle verification. These indicate public service configuration, not a verified merchant identity or owner. Verification token values stay in private raw evidence, not the narrative. Fresh HTTP 200.

Open source ↗

SHA-256: 7d0c30444993fbd6a96adddb1ed3075710258bece1b990493c8facdc1c62cb7f

E37 / Google brand-use guidance

Current primary guidance prohibits misleading endorsement, combining Google marks into product names and imitation of distinctive visual identity. Compatible third-party utilities and accurate descriptions are not automatically fraud; the concern is the combined presentation and any unapproved identity use. No private licence or court ruling was recovered. Fresh HTTP 200.

Open source ↗

SHA-256: ceb1c75440ed2b7d5d9b9c6c60b977cbe3eef2927a68603be0ac6ff76d020fc5

E38 / Apple rules mapped to the actual findings

Relevant current clauses: 2.3 and 2.3.7 accurate/distinctive metadata; 4.1(a–c) copycats/impersonation; 5.2.1 protected IP and misleading identity; 5.2.2 permission for third-party service use; 5.1.1(i) accurate privacy policies. Native utility beyond a website matters under 4.2; no violation is presumed merely because the app opens web services. Permission and actual traffic were not tested. Fresh HTTP 200.

Open source ↗

SHA-256: a523799de5ca263b3050c943901c4b08beb39116f60f75e8c6e9c70368fb660d

E39 / Historical archive attempt · search

Search/opener indexes returned empty arrays; Yami timed out; Workspace returned 503. These results do not prove no earlier version existed. No dated generic-to-Google icon replacement or intentional App Review bypass was verified for these four apps. Public version notes are retained without inventing old artwork. Fresh HTTP 200.

Open source ↗

SHA-256: 37517e5f3dc66819f61f5a7bb8ace1921282415f10551d2defa5c3eb0985b570

E40 / Historical archive attempt · opener

Search/opener indexes returned empty arrays; Yami timed out; Workspace returned 503. These results do not prove no earlier version existed. No dated generic-to-Google icon replacement or intentional App Review bypass was verified for these four apps. Public version notes are retained without inventing old artwork. Fresh HTTP 200.

Open source ↗

SHA-256: 37517e5f3dc66819f61f5a7bb8ace1921282415f10551d2defa5c3eb0985b570

E41 / Historical archive attempt · yami

Search/opener indexes returned empty arrays; Yami timed out; Workspace returned 503. These results do not prove no earlier version existed. No dated generic-to-Google icon replacement or intentional App Review bypass was verified for these four apps. Public version notes are retained without inventing old artwork.

Open source ↗

E42 / Historical archive attempt · workspace

Search/opener indexes returned empty arrays; Yami timed out; Workspace returned 503. These results do not prove no earlier version existed. No dated generic-to-Google icon replacement or intentional App Review bypass was verified for these four apps. Public version notes are retained without inventing old artwork. Fresh HTTP 503.

Open source ↗

SHA-256: e084d527921708642a79724e9f0210da659bbc0905c6ce9a3a1f416e4628091c

E43 / An additional name requiring review: Clockify

clockify.me is the official Clockify service. The same Apple account has Hours Tracker: Time Clockify, 6738634756, with a black watch icon and com.sanci.clockify. This name association merits a separate rights/affiliation review; a specific icon copy or licence breach was not established. Fresh HTTP 200.

Open source ↗

SHA-256: d230577382fa5f84707a61bff81889a095280af1a8d9e584c409c603973f9882

E44 / KidoX confirms ClyApp and links back to defcc

The KidoX terms display ClyApp in the footer and link the exact github.com/defcc/kidox.app repository. That repository points back to kidox.app. This is a two-way project/brand association, not merely an outgoing unrelated product link. Terms identify a paid independent launcher, not another verified Apple developer account. No software was downloaded or run. Fresh HTTP 200.

Open source ↗

SHA-256: 1b59443aa0cfc53e0989915f86a8f6726d170a9a984e340c467ae3682e1fe067

E45 / Public KidoX source identifiers

Read-only public project file under github.com/defcc/kidox.app includes bundle com.clyapps.KidoX and project signing-team setting LCR49HJMTK. These are source configuration values, not an observed shipping signature. The four supplied App Store apps have no recovered binary/team signature here, so the value does not prove another Apple account or a shared signing identity. Source commands were not executed. Fresh HTTP 200.

Open source ↗

SHA-256: ae239235123a5904ef7e3d6451e8b4d9261c895f50d18f87e3837b472a8ff962

E46 / MakePaperFast is a repository on the same GitHub account

Official GitHub API identifies defcc/makepaperfast with homepage makepaperfast.com. The same user profile publicly links that domain. The project generates printable paper; public source/account association is verified. No Google impersonation or fraud is imputed to this separate utility. Fresh HTTP 200.

Open source ↗

SHA-256: 3a52c9f4d6f757c0a6c94f52bab01c2de4f4f6b1b6aee52a867899e3826a127b

E47 / The directly identified MakePaperFast website

Current graph-paper generation website matches the repository homepage. This corroborates a product identity, not another App Store publisher, legal entity or misconduct finding. No form or generator submission used. Fresh HTTP 200.

Open source ↗

SHA-256: 83c482478940d7f87d6b3279f15177488dfa12658c3ce60b206ced231d49d8c6

E48 / my9albums.app publishes the next links in the trail

Current About page identifies the exact .app domain, a free poster maker, and links cal.com/clyapp and storybookai.art. The domain is directly listed by GitHub defcc. Other my9albums domains are distinct and are not assumed to share this operator. Fresh HTTP 200.

Open source ↗

SHA-256: d80702d0f4526d6407107834543280259 4a78f624efe5d535ee3c78d42cc6d74

E49 / ClyApp scheduling profile lists two projects and New York, US

Public cal.com/clyapp identifies itself as ClyApp and links my9albums.app and print-a-graph-paper.com. It displays New York, US. This is a profile label, not a verified registered address, residence or citizenship. It differs from the linked Vue defcc professional card that lists Chongqing, China. No appointment was booked and no personal details submitted. Fresh HTTP 200.

Open source ↗

SHA-256: d78110639eb5b0c3a97e5e5c4073defaa8e30e5b1afeb4ef8eee09aa48da880c

E50 / PaperMan claims the linked products as its own portfolio

Official print-a-graph-paper.com About page identifies PaperMan and a footer headed More by us links My 9 Albums, StorybookAI and Sticker Maker at cubizoo.com. This is a direct published portfolio claim, stronger than an unlabelled generic link. It does not independently identify the same legal owner, another Apple account or a fraud finding for the linked products. Fresh HTTP 200.

Open source ↗

SHA-256: e9681b5b2ec69c1d12449b11fe53acc7d07e4aa7b359f7241416ab3020df72ff

E51 / PaperMan contact and operating identity

Contact page identifies PaperMan as the site operator and uses a product-specific support inbox. It does not name chao cheng, a registered legal company or an Apple developer ID. The ClyApp project bridge is the scheduling profile and the explicit portfolio links; matching support emails are not invented. Fresh HTTP 200.

Open source ↗

SHA-256: c25bdcc37d0822e9f392eb9047b0292e1ee1dcf4a05cd5900035429b6a4f1f69

E52 / StorybookAI describes a team of two

Current first-party About page says a team of two builds its personalized storybook service. It does not name those two people or an Apple account. This is a site-described product/team association, not evidence of anyone's nationality or a second developer account. Fresh HTTP 200.

Open source ↗

SHA-256: c43b5a637914f592d0ac4f95a5e5850c134b7463b2b8f1a8971bfa5826d6b027

E53 / StorybookAI has a separate public project contact

Current contact page uses storybookaiart@gmail.com and says a team of two replies. The contact differs from the four Mac apps' policy inbox. The relationship is documented through explicit project links, not a falsely claimed exact email match. Fresh HTTP 200.

Open source ↗

SHA-256: 82231cb171d22550e61b4277a85ef4356331fa533718722f2fedfe1a7be9ef16

E54 / CubiZoo is a further site-claimed product, not a recovered Apple account

CubiZoo privacy page describes its sticker-generation service and product-specific contact. PaperMan lists this domain under More by us, but no exact Apple publisher profile or app ID was recovered for it. No installation, login, image upload or ownership verdict performed. Fresh HTTP 200.

Open source ↗

SHA-256: 3be52187448c45989f15394ff162890507077e02aac4b944a36068aad601f53c

Mac (5)

Description

AN APP FOR GOOGLE SEARCH—RIGHT IN YOUR MAC MENU BAR

GSearch is a native search engine and browser launcher for macOS. Press Option–Space—or click the menu bar icon—type a query, and press Return. Start a Google Search without opening a browser first or interrupting your current workflow.

SEARCH GOOGLE, YOUTUBE, AND MORE

Choose one of five built-in search destinations:
• Google Search for the web
• DuckDuckGo search
• Microsoft Bing search
• GitHub code and repository search
• YouTube search for videos

Switch search engines from the panel whenever your task changes.

OPEN RESULTS IN THE BROWSER YOU WANT

Use your Mac’s default browser or choose another compatible browser installed on your Mac. GSearch asks macOS which apps can open web links, so the Safari browser, Google Chrome browser, Firefox browser, Arc, Brave, and other compatible apps can appear automatically when installed.

PAIR EACH SEARCH ENGINE WITH A BROWSER

Turn on “Remember browser per engine” to keep a separate browser choice for every built-in search service. Open Google Search in Google Chrome, YouTube search in Safari, Bing in Firefox, or create the browser pairing that fits your workflow—without changing the system default browser.

SEARCH FROM ANYWHERE ON macOS

The customizable global hotkey brings the native search panel to the front over any app. Type, press Return, and continue working. Press Escape or click elsewhere, and the panel disappears.

SEARCH OR OPEN A WEB ADDRESS

Use the same field as a search launcher and browser launcher. Enter keywords, or go directly to a full URL, domain, localhost address, or host and port.

BUILT FOR MAC

• Fast keyboard-first workflow
• Native macOS panel
• Menu bar access
• Customizable keyboard shortcut
• Optional launch at login
• Search engine and browser preferences stored locally

PRIVATE BY DESIGN

No account, ads, analytics, or saved search history. GSearch builds the destination URL on your Mac, then hands it to your selected browser. The browser and destination service apply their own privacy policies after you submit.

GSEARCH PRO

The free plan includes up to five submitted searches per local calendar day using Google and your system-default browser. Upgrade to GSearch Pro for unlimited searches, every built-in search destination, your choice of compatible installed browser, and per-engine browser pairing.

Choose a one-year auto-renewable subscription or a lifetime non-consumable purchase. Payment is charged to your Apple ID after confirmation. The one-year plan renews automatically unless canceled at least 24 hours before the end of the current period. You can manage or cancel it in your Apple ID Account Settings.

Terms of Use: https://www.apple.com/legal/internet-services/itunes/dev/stdeula/
Privacy Policy: https://beauty-of-pixel.tech/privacy.html

GSearch is an independent App for Google Search and web launcher. It is not affiliated with, endorsed by, or sponsored by Google, YouTube, Microsoft, DuckDuckGo, GitHub, Apple, Mozilla, or any browser or search engine provider. Google, Google Chrome, YouTube, Firefox, Safari, and other product names are trademarks of their respective owners.

Requires macOS 13 or later.

Appendix — the privacy policy linked from the listing as displayed

Full-page browser capture of https://beauty-of-pixel.tech/privacy.html, taken 2026-11-17 11:26:15 UTC. Cookie-consent overlays (the host's, not the page's content) were hidden before the capture, and Google pages were opened in English.

Privacy Policy

Last Updated: January 20, 2026

We respect your privacy and are committed to protecting your personal information. This Privacy Policy explains how we handle data in our application.

Personal Information

We do NOT directly collect, store, or sell any of your personal information to third parties.

Advertising

Our app uses Google AdMob to display advertisements. AdMob may collect and process certain data to provide personalized advertising experiences.

Information collected by AdMob may include:

- Device information (device model, operating system version)
- Advertising identifiers (IDFA on iOS, AAID on Android)
- IP address and approximate location
- App usage data and ad interaction information

For more information about how Google uses data, please review:

- Google Privacy Policy
- Google AdMob Privacy Information

Your Choices

You can opt out of personalized advertising by:

- **iOS:** Go to Settings > Privacy > Advertising > Enable "Limit Ad Tracking"

Changes to This Policy

We reserve the right to update this Privacy Policy at any time. We will notify you of any changes by posting the new Privacy Policy on this page and updating the "Last Updated" date. Your continued use of the app after any modifications indicates your acceptance of the updated policy.

Contact Us

If you have any questions or concerns about this Privacy Policy, please contact us:

Description

Chrome Browser Default Opener makes your Mac open every link in the browser that fits the task — automatically.

Set it as your default browser, then create simple URL rules. Open work tools in Chrome, personal sites in Safari, development links in Firefox, Microsoft services in Edge, privacy-focused pages in Brave, and everything else in Arc, Dia, Opera, Vivaldi, or another browser on your Mac.

The next time you click a link from Mail, Messages, Slack, Notes, or any other app, it is matched against your rules and sent directly to the browser you selected.

No more copying URLs between browsers. No browser chooser interrupting every click.

HOW IT WORKS

1. Set Chrome Browser Default Opener as your Mac’s default browser.
2. Create rules that connect websites with browsers.
3. Click links normally and let the app choose the right browser.

KEY FEATURES

• Use all your browsers
Chrome, Safari, Firefox, Microsoft Edge, Brave, Arc, Dia, Opera, Vivaldi, Safari Technology Preview, and other browsers installed on your Mac are detected automatically.

• Automatic URL routing
Create rules such as “github.com opens in Safari”, “figma.com opens in Chrome”, or “localhost:* opens in Firefox”. Rules are checked in order, and the first match selects the browser.

• Choose a fallback browser
Pick the browser used for links that do not match any rule. If you have not selected one, the app prefers Chrome and uses Safari when Chrome is unavailable.

• Remove tracking parameters
Automatically clean common advertising and campaign parameters before opening a link. Add your own parameter names or wildcard patterns for more control.

• Local cleanup activity
See which websites contained tracking parameters and which parameter names were removed. Parameter values are never saved.

• Automatic browser discovery
Installed browsers appear automatically and can be used immediately in routing rules or selected as your fallback browser.

• Quick browser access
Launch any installed browser directly from the menu bar without opening the main window.

SUPPORTED BROWSERS

Chrome Browser Default Opener works with:

• Google Chrome
• Safari
• Firefox
• Microsoft Edge
• Brave
• Arc
• Dia
• Opera
• Vivaldi
• Safari Technology Preview
• Other browsers recognized by macOS

PERFECT FOR

• Developers
Open localhost and development URLs in Chrome or Firefox, while keeping everyday browsing in Safari.

• Professionals
Separate work links and personal browsing across different browsers.

• Google and Microsoft users
Send Google Workspace links to Chrome and Microsoft 365 links to Edge automatically.

• Designers and creators
Open Figma, Notion, project tools, and creative platforms in the browser where they work best.

• Privacy-conscious users
Use Brave or Firefox for selected websites and remove common tracking parameters before pages open.

• Multi-browser users
Turn several installed browsers into one organized workflow without repeatedly copying and pasting URLs.

PRIVATE BY DESIGN

Browser rules, fallback settings, tracking protection preferences, and cleanup activity stay on your Mac.

Links are processed locally and are not sent to our servers.

FREE AND PRO

The free version includes up to 10 routed link opens per day and 5 URL rules.

Chrome Browser Default Opener Pro unlocks:

• Unlimited routed link opens
• Unlimited URL rules
• One-click default browser setup
• Browser discovery and installation shortcuts
• Automatic tracking parameter removal

Make Chrome, Safari, Firefox, Edge, Brave, Arc, Dia, Opera, and Vivaldi work together — automatically.

Privacy Policy

Last Updated: January 20, 2026

We respect your privacy and are committed to protecting your personal information. This Privacy Policy explains how we handle data in our application.

Personal Information

We do NOT directly collect, store, or sell any of your personal information to third parties.

Advertising

Our app uses Google AdMob to display advertisements. AdMob may collect and process certain data to provide personalized advertising experiences.

Information collected by AdMob may include:

- Device information (device model, operating system version)
- Advertising identifiers (IDFA on iOS, AAID on Android)
- IP address and approximate location
- App usage data and ad interaction information

For more information about how Google uses data, please review:

- Google Privacy Policy
- Google AdMob Privacy Information

Your Choices

You can opt out of personalized advertising by:

- **iOS:** Go to Settings > Privacy > Advertising > Enable "Limit Ad Tracking"

Changes to This Policy

We reserve the right to update this Privacy Policy at any time. We will notify you of any changes by posting the new Privacy Policy on this page and updating the "Last Updated" date. Your continued use of the app after any modifications indicates your acceptance of the updated policy.

Description

Yami brings your Gmail workflow into a focused macOS workspace.

Open Gmail from the menu bar or a global keyboard shortcut, keep separate profiles for work and personal accounts, and see unread mail without switching through browser tabs.

Key features:
- Menu bar access to Gmail
- Quick compose and inbox shortcuts
- Separate Gmail profiles for different accounts
- Unread message list across accounts
- macOS notifications for new mail
- Private notification mode that hides message details
- Always-on-top workspace option

- Fast account switching with persistent sessions

Yami is useful if you manage multiple Gmail or Google Workspace identities and want a lighter, more direct way to check mail on Mac.

Full-page browser capture of https://beauty-of-pixel.tech/privacy.html, taken 2026-11-17 11:21:20 UTC. Cookie-consent overlays (the host's, not the page's content) were hidden before the capture, and Google pages were opened in English.

Privacy Policy

Last Updated: January 20, 2026

We respect your privacy and are committed to protecting your personal information. This Privacy Policy explains how we handle data in our application.

Personal Information

We do NOT directly collect, store, or sell any of your personal information to third parties.

Advertising

Our app uses Google AdMob to display advertisements. AdMob may collect and process certain data to provide personalized advertising experiences.

Information collected by AdMob may include:

- Device information (device model, operating system version)
- Advertising identifiers (IDFA on iOS, AAID on Android)
- IP address and approximate location
- App usage data and ad interaction information

For more information about how Google uses data, please review:

- Google Privacy Policy
- Google AdMob Privacy Information

Your Choices

You can opt out of personalized advertising by:

- **iOS:** Go to Settings > Privacy > Advertising > Enable "Limit Ad Tracking"

Changes to This Policy

We reserve the right to update this Privacy Policy at any time. We will notify you of any changes by posting the new Privacy Policy on this page and updating the "Last Updated" date. Your continued use of the app after any modifications indicates your acceptance of the updated policy.

App Privacy

Data Not Collected

Icon compared with the official apps of the brands it mentions

 **This app**	
 Google Gemini by Google official gemini app · App ID 6477489729	**36%** different
 Google Drive by Google official google app · App ID 507874739	**34%** different
 Gmail - Email by Google by Google official gmail app · App ID 422689480	**25%** different
 Google Chrome by Google official chrome app · App ID 535886823	**23%** different
 Microsoft Teams by Microsoft Corporation official teams app · App ID 1113153706	**14%** different
 YouTube by Google official youtube app · App ID 544007664	**11%** different

The brands are those named in the listing (name, subtitle, description, text in the screenshots); the official app of a brand is the App Store app with the brand in its name and the most ratings. Similarity is an automatic estimate; from 52% the icons count as similar.

Description

Workspace for Google App – Quick Access to Google Search, AI, Gmail, Drive, Docs, Calendar & More

Boost your productivity with the fastest way to access Google services on your Mac. Workspace for Google App brings all your favorite tools—Gmail, Google Drive, Docs, Calendar, Meet, Maps, YouTube, and more—into one convenient place. Whether you're checking email, managing your schedule, joining video calls, or collaborating on docs, it’s all just a click away.

No more hunting through browser tabs or cluttered bookmarks. Open your go-to Google apps like Gmail, Docs, Drive, and Calendar with a single click or a custom global hotkey. Whether you're launching YouTube, jumping into a Meet call, exploring Maps, or trying the latest from Gemini AI, checking email, managing your schedule, joining video calls, or collaborating on docs, this app keeps everything just one shortcut away.

Perfect for:
- Students accessing Google Classroom, Docs, and Drive for schoolwork
- Professionals who rely on Gmail, Google Calendar, Meet, and Chat
- Remote workers juggling Google Drive, Docs, Sheets, and Slides
- Teams using Google Meet, Chat, and Calendar for collaboration
- Anyone who wants faster access to YouTube, Maps, Translate, or Gemini

Key Features:
- One-click access to all major Google apps from your Mac menu bar
- Pin your favoriate google service like Gmail, Docs, Calendar, Search to Menubar
- Assign global hotkeys for instant app launching — open Gmail, Docs, or even Translate in seconds
- Manage and switch your Google accounts in one place
- Customize your layout to keep your favorite GApps front and center
- Lightweight, minimal, and built for fast access
- Works seamlessly for multitaskers, creators, professionals, and power users

Hotkey / shortcut:
Global hotkey
1. Launcher Panel Hotkey: you could set a global hotkey to toggle the panel in the setting window
2. Specific Google App Hotkey: you could set a global hotkey to a specific app in the app manage window

Launcher Panel hotkey
1. When you are in the panel window, press ESC to hide to panel quickly
2. When you are in the panel window, press Command to show / hide the quick numersic shortcuts.
3. Press Arrow Left / Right / Top / Down to navigate the selected google app item, press enter to open the selected one
4. When the Launcher Panel shows, there are numersic shortcuts that show on the google app items, you could press the number key to open the google app

Boost your productivity and bring the full power of Google apps to your menu bar.

Download Workspace for Google App today — the ultimate Google app shortcut for Mac.

Privacy Policy

Last Updated: January 20, 2026

We respect your privacy and are committed to protecting your personal information. This Privacy Policy explains how we handle data in our application.

Personal Information

We do NOT directly collect, store, or sell any of your personal information to third parties.

Advertising

Our app uses Google AdMob to display advertisements. AdMob may collect and process certain data to provide personalized advertising experiences.

Information collected by AdMob may include:

- Device information (device model, operating system version)
- Advertising identifiers (IDFA on iOS, AAID on Android)
- IP address and approximate location
- App usage data and ad interaction information

For more information about how Google uses data, please review:

- Google Privacy Policy
- Google AdMob Privacy Information

Your Choices

You can opt out of personalized advertising by:

- **iOS:** Go to Settings > Privacy > Advertising > Enable "Limit Ad Tracking"

Changes to This Policy

We reserve the right to update this Privacy Policy at any time. We will notify you of any changes by posting the new Privacy Policy on this page and updating the "Last Updated" date. Your continued use of the app after any modifications indicates your acceptance of the updated policy.

Contact Us

If you have any questions or concerns about this Privacy Policy, please contact us:
